Nuclear Deterrence And Global Security In Transition:

Nuclear Deterrence And Global Security In Transition David Goldfischer, 2019-04-08 This book contains papers presented at a conference held at the University of California's Institute on Global Conflict and Cooperation in 1991. The papers reflect the spectrum of thought in the expert community that is likely to frame the policy debate over the future of nuclear deterrence.

Global Trends and Transitions in Security Expertise James McGann, 2017-11-08 The scope of Security and International Affairs research has expanded tremendously since the end of the Cold War to include topics beyond the realm of war studies or military statecraft. The field once devoted solely to the study of conventional military and nuclear security issues has diversified to include foci often considered nontraditional including peace and conflict, political, economic, environmental, and human security. In this exciting new volume, McGann has undertaken a quantitative and qualitative study of SIA think tanks looking at global and regional trends in their research. He argues that the end of the Cold War marked a fundamental shift within the field of defense and security studies among think tanks and academics. Tracking the evolution of security as understood by researchers and policymakers is vital as the world follows the path of the Four Mores: more issues, more actors, more competition, and more conflict. As we move forward into a world of rapid change and ubiquitous uncertainty, think tanks will only become more prominent and influential. The volume concludes with an assessment of the future of Security and International Affairs studies and raises the possibility of a return to a traditional security focus driven by recent events in Europe and the Middle East. This will be an important resource for students and scholars of security studies, global governance, and think tanks.

South Asian Security and International Nuclear Order Mario Esteban Carranza, 2016-04-01 Mario Carranza studies in depth the linkages between Indo-Pakistani nuclear relations and the International Nuclear Order. He critically analyzes the de facto recognition by the United States of India and Pakistan as nuclear weapon states and looks at the impact of that recognition on the International Nuclear Order and its linchpin, the Nuclear Non-Proliferation Treaty (NPT). The book provides a critical analysis of the New International Nuclear Order sponsored by the United States after the September 11 terrorist attacks and the place of India and Pakistan in that order. The author considers the survival of India and Pakistan in relation to a strategy of nuclear deterrence and debates the possibility of establishing a robust nuclear arms control regime in South Asia as part of a broader effort to revive global nuclear arms control and disarmament negotiations.

Deterrence and the New Global Security Environment Ian R. Kenyon, John Simpson, 2013-10-18 This collection of papers rigorously examines the current place of deterrence in international security relations, delivering the best of contemporary thinking. This is a special issue of the leading journal *Contemporary Security Policy*. It shows how and why nuclear deterrence was the central organizing mechanism for international security relations in the second half of the twentieth century. It has been replaced by a new global security environment in which the central role of deterrence, both nuclear and otherwise, appears to have diminished.

The Cold War has been succeeded by a new state of play This book will be of interest to students of military and naval history and security studies
