Nuclear Localization Of Growth Factors And Of Monoclonal Antibodies:

Nuclear Localization of Growth Factors and of Monoclonal Antibodies Ewa Rakowicz-Szulczynska, 1993-10-13
Nuclear Localization of Growth Factors and of Monoclonal Antibodies focuses on how an additional class of chromatin receptors is directly involved in mediation of the action of growth factors on the gene regulation level. The book describes a new intracellular pathway of growth factors and presents methods for identifying nuclear antigens with an epitopic homology of the cell surface antigens. It teaches how to distinguish monoclonal antibodies that penetrate the cell and localize in the nucleus from those that act only on the cell surface. New light is shed on the mechanisms of malignant transformation and new approaches to developing anti cancer and anti HIV drugs are covered. The book will be important for oncologists, biochemists, cell biologists, pharmaceutical researchers, investigative pathologists, neurochemists and immunologists.

Renin Angiotensin System and the Heart Walmor C. De Mello, 2004-04-30
Recent studies have shown that the heart possesses an intrinsic renin angiotensin system that is controlled by tissue specific parameters that are activated by biomechanical stress. This book reviews the latest information on the way in which both the plasma and cardiac renin angiotensin systems affect heart function. It covers the cell and molecular biology of these systems with contributions on renin synthesis, uptake and the intracellular signalling pathways. Particular insight comes from transgenic mouse models in which either mouse or human genes for various components of the renin angiotensin system are expressed. Other topics covered include wound healing as well as the trophic effects of aldosterone. Contains the most recent findings on the renin angiotensin system and the heart. Written by an international team of distinguished scientists. Covers both the cellular and molecular basis of the renin angiotensin system and the clinical relevance of this research. *Signaling Pathways in*

Squamous Cancer Adam B. Glick, Carter Van Waes, 2010-11-25
Squamous epithelia form the lining surface of tissues in contact with the environment: the skin, oral mucosa, esophagus and respiratory tract, the genital tract and several other specialized tissues. These tissues are at highest risk for exposure to environmental carcinogens such as UV, tobacco smoke and infectious agents. Cancers that form in squamous epithelia are among the most common human solid tumors and have high morbidity and mortality. These cancers include squamous cell carcinoma of the skin, oral cancer, head and neck and esophageal cancer, certain lung cancers and cervical cancer. We propose to organize the book so that the early chapters will focus on individual pathways and more specific mechanisms in both normal function and cancer, while the later chapters will be more integrative and include overviews of biomarkers and therapeutic development. This should increase interest for clinically oriented researchers. All authors will be encouraged to provide a balanced review in addition to highlighting their own work. Tissue-Specific Vascular Endothelial Signals and Vector Targeting, Part B, 2010-10-27
The field of genetics is rapidly evolving and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. This serial continually publishes important reviews of the broadest interest to geneticists and their colleagues in

affiliated disciplines Includes important reviews of the broadest interest to geneticists and their colleagues in affiliated disciplines providing researchers an overview and synthesis of the latest findings in the area Presents up to date research from leaders in the field

Comprehensive Treatise on Fibroma: Understanding, Diagnosis, and Management Dr. Spineanu Eugenia, 2025-03-12 Explore the comprehensive treatise on fibroma delving into its intricate facets from definition to cutting edge precision medicine approaches This meticulously crafted guide navigates through epidemiology etiology and diagnostic modalities offering insights into genetic mutations signaling pathways and emerging therapies Unravel the complexities of fibroma types cellular composition and prognostic factors backed by the latest advancements in imaging technology and clinical trials Dive into the world of precision medicine where personalized therapies and collaborative efforts revolutionize fibroma management From surgical techniques to integrative approaches this treatise empowers clinicians researchers and patients alike with invaluable knowledge for informed decision making and improved treatment outcomes Discover the future of fibroma care within these pages where science meets compassion in the pursuit of better health and well being

Cumulative Subject Index, 1998-10-19 This Series provides a comprehensive survey of the major topics in the field of developmental biology The volumes are valuable to researchers in animal and plant development as well as to students and professionals who want an introduction to cellular and molecular mechanisms of development The Series has recently passed its 30 year mark making it the longest running forum for contemporary issues in developmental biology

Intracellular Antibodies Antonino Cattaneo, Silvia Biocca, 2013-03-09 Recent advances in the field of recombinant antibodies have permitted the manipulation of genes encoding specific antibodies thus allowing their ectopic expression in a wide variety of non lymphoid cells This volume describes how the ectopic expression of antibodies as secreted or as intracellularly retargeted molecules can be exploited to block biological functions or to confer new phenotypic traits e g resistance to a virus This is the first book describing this emerging technology which is receiving increasing attention for application in many different fields and biological systems from human gene therapy to plant biotechnology

Advances in Enzyme Regulation George Weber, 2002-09-19 Volume 42 lives up to its goal of advancing a few steps ahead of the general front of mammalian enzymic and metabolic regulation studies This volume contains papers of 25 outstanding scientists working at the cutting edge of metabolic regulation Much of the volume focuses on novel aspects of signal transduction with an emphasis on nuclear expression One of the highlights of this volume is the Special Symposium Lecture This was given for 15 years by Sir Hans A Krebs who passed away 20 years ago It was now given by Professor Sir Hans L Kornberg University Professor at Boston University These volumes continue to be a source of information and inspiration and a laboratory and advanced teaching companion The immediate and long range significance of these cutting edge presentations of these novel topics should be immediately clear to the reader

Immunocytochemistry for Steroid Receptors Louis P. Pertschuk, 1990-08-15 A comprehensive review of the literature on steroid hormone receptor immunocytochemistry It includes

the development of the first monoclonal antireceptor antibody and initial procedures designed to localize steroid receptors in situ up to the present The step by step instructions provide easy reading of topics such as tissue handling processing and interpretation This text places particular emphasis on the studies of human material especially mammary carcinoma It presents specific details with chapters on estrogen and progesterone receptors in breast malignancies and benign breast disease Each section of this outstanding book contains comprehensive photomicrographs that illustrate the most salient features discussed Detailed graphs pertaining to theoretical particulars concerning technology and the relationship between image analysis and endocrine response are also included This monograph is an excellent resource for all researchers concerned with hormone dependent tissues pathologists who have an interest in working with novel techniques for localizing steroid hormone receptors and oncologists who must use assay results in the treatment of breast cancer **Molecular Biology of the Cell** ,2005
