Nuclear Tech Talk Ruth S. Radlauer, Edward Radlauer, 1985-04-01 A dictionary of words and terms with nuclear associations from AEC to zero power reactor **Nuclear Tech Talk** Ed Radlauer, Ruth Radlauer, 1985 A dictionary of words and terms with nuclear associations from AEC to zero power reactor *Nuclear Power* David Elliott, 2017-05-02 This book looks at the early history of nuclear power at what happened next and at its longer term prospects The main question is can nuclear power overcome the problems that have emerged It was once touted as the ultimate energy source freeing mankind from reliance on dirty expensive fossil energy Sixty years on nuclear only supplies around 11.5% of global energy and is being challenged by cheaper energy options While the costs of renewable sources like wind and solar are falling rapidly nuclear costs have remained stubbornly high Its development has also been slowed by a range of other problems including a spate of major accidents security concerns and the as yet unresolved issue of what to do with the wastes that it produces In response a new generation of nuclear reactors is being developed many of them actually revised versions of the ideas first looked at in the earlier phase Will this new generation of reactors bring nuclear energy to the forefront of energy production in the future *Our Energy Future* Don E. Albrecht, 2014-07-25 Rapid changes in energy production and consumption are having major socioeconomic implications for the communities of rural America Technological developments in horizontal drilling hydraulic fracturing fracking nuclear energy biofuels wind and solar energy have significantly increased domestic energy production and the production of energy from renewable sources has encouraged energy efficiency Yet severe concerns persist and policy decisions on energy issues will have profound implications for all Americans and rural communities where consequences are experienced most directly Thus the time is appropriate for a careful exploration of the socioeconomic implications of our energy future The purpose of this book is to present timely and scientifically sound information on energy policy socioeconomic aspects of energy production and consumption with a focus on rural areas The book presents the latest research by top scholars with the goal of clarifying options and providing the basis for informed policy decisions **The Six-Party Talks on North Korea** Mi-yeon Hur, 2018-01-03 The book traces the past decade of dynamic interactions among the concerned states involved in the Six Party Talks on North Korean nuclear programs Unlike existing studies which usually dissect incidents of the talks the book provides a comprehensive systemic analysis of the Six Party Talks process from A to Z These new insights into the nuclear drama in the Northeast Asian region will be of value to scholars policy makers and analysts *Future Electricity Technologies and Systems* Tooraj Jamasb, William J. Nuttall, Michael G. Pollitt, 2006-07-20 Publisher Description *Organizational Cultures and the Management of Nuclear Technology* Russell Kirk, 2017-07-05 Nuclear technology has been an organizing premise of the international system since 1945 Eight countries have officially acknowledged the possession of nuclear weapons Many countries have harnessed the atom for electricity generation and other civilian uses Roughly 440 commercial nuclear reactors operate in thirty countries

providing 14 percent of the world's electricity Volatile oil prices and concerns about climate change have led newly emerging economies in Asia to express keen interest in using nuclear energy to meet growing energy demands Since the basic technological apparatus for both civilian and military nuclear programs is the same there are concerns about the potential spread of dual use technology The future stability of the international order depends on the responsible management of their nuclear assets by nuclear powers The relationship between civilian authorities and the military takes on special significance in states with nuclear weapons or near weapon capability The constitutional balance of powers the delegation of authority during wartime and peace influences from public opinion and bureaucratic structures on the formulation of doctrine crisis management and communications with the international media and the general public are influenced by civil military relations and organizational culture This volume will be of broad interest to scholars of civil military relations political science and political sociology

Sustaining Earth's Energy Resources Ann Heinrichs, 2011 Energy consumption is on the rise worldwide Without easily available energy resources life would not continue as we know it As fossil fuel supplies dwindle other sources of energy are needed to take their place In *Sustaining Earth's Energy Resources* explore the challenges facing the world today as it strives to tap into renewable forms of energy Book jacket

Talking to the Enemy Dalia Dassa Kaye, 2007-09-21 This monograph examines security related track two diplomacy efforts in the Middle East and South Asia including how such efforts have socialized participants into thinking about security in more cooperative terms and whether the ideas generated in track two forums have been acknowledged at the societal level or influenced official policy Kaye concludes with suggestions on how to improve future track two efforts
