Mobile Agents Gian P. Picco, 2003-06-30 Recent years have witnessed the appearance of new paradigms for designing distributed applications where the application components can be relocated dynamically across the hosts of the network This form of code mobility lays the foundation for a new generation of technologies architectures models and applications in which the location at which the code is executed comes under the control of the designer rather than simply being a configuration accident Among the various flavors of mobile code the mobile agent paradigm has become particularly popular Mobile agents are programs able to determine autonomously their own migration to a different host and still retain their code and state or at least a portion thereof Thus distributed computations do not necessarily unfold as a sequence of requests and replies between clients and remote servers rather they encompass one or more visits of one or more mobile agents to the nodes involved Mobile code and mobile agents hold the potential to shape the next generation of technologies and models for distributed computation The first steps of this process are already evident today Web applets provide a case for the least sophisticated form of mobile code Java based distributed middleware makes increasing use of mobile code and the first commercial applications using mobile agents are starting to appear

**The Logic of Intentional Objects** Jacek Pasniczek, 2013-03-14 Intentionality is one of the most frequently discussed topics in contemporary phenomenology and analytic philosophy This book investigates intentionality from the point of view of intentional objects According to the classical approach to this concept whatever can be consciously experienced is regarded as an intentional object Thus not only ordinary existing individuals but also various kinds of non existents and non individuals are considered as intentional including such bizarre entities as quantifier objects some dog every dog Alexius Meinong an Austrian philosopher is particularly well known as the inventor of an abundant ontology of objects among which even incomplete and impossible ones like the round square find their place Drawing inspirations from Meinong s ideas the author develops a simple logic of intentional objects M logic M logic closely resembles classical first order logic and as opposed to the formally complicated contemporary theories of non existent objects it is much more friendly in apprehending and applications However despite this resemblance the ontological content of M logic far exceeds that of classical logic In this book formal investigations are intertwined with philosophical analyses On the one hand M logic is used as a tool for investigating formal features of intentional objects On the other hand the study of intentionality phenomena suggests further ways of extending and modifying M logic Audience The book is addressed to logicians cognitive scientists philosophers of language and metaphysics with either a phenomenological or an analytic background

Walker, 1998 The question of selfhood in Renaissance texts constitutes a scholarly and critical debate of almost unmanageable proportions The author of this work begins by questioning the strategies with which male writers depict powerful women Although Spenser's Britomart Shakespeare's Cleopatra and Milton's Eve figure selfhood very differently and to very different ends they do have two significant elements in common mirrors and transformations that diminish the power of the female self      **Lexical Specification and Insertion** Peter Coopmans, Martin B.H. objects in warding off physical and psychic fragmentation Lorde's life writing reveals how losing a breast to cancer is experienced as yet another attack directed toward her racially and sexually vilified body Sedgwick's memoir and breast cancer advice column negotiate her morbidity by disseminating a public discourse of love and pedagogy Lin concludes with an analysis of reparative efforts at the rival Freud Museums in London and Vienna The disassembled Freudian archive like the subjectivities in dissolution upon which the book focuses shows how the labor of integration is tethered to persistent discontinuities Freud's *Jaw* asks what are the psychic effects of surviving in proximity to one's mortality and it suggests that violences stemming from social cultural and biological environments condition the burden of such injury Drawing on psychoanalyst Melanie Klein's concept of reparation wherein constructive forces are harnessed to repair damage to internal psychic objects Lin proposes that the prospect of imminent destruction paradoxically incites creativity The afflicted are obliged to devise means to reinstate at least temporarily their destabilized physical and psychic unity through creative reparative projects of love and writing
