Andy & Sofia Andres Trevino, Kate Kruschwitz, 2012-03-12 In an incubated petri dish in a Boston laboratory a cluster of eight living cells holds the key to a daring new era of medical science

These cells come from a human embryo containing genetic material from my wife Paulina and me obtained through in vitro fertilization IVF Research using these cells holds enormous potential to cure a fatal disease saving the lives of countless children and relieving their families of unspeakable pain We lived that pain ourselves When our son was born we didn't know what a tortuous road stretched ahead of us how our baby would suffer and how we'd suffer with him We didn't know he'd spend nearly 1 000 days in seven different hospitals see more than 300 doctors and swerve close to death many times We didn't know we'd have to take matters into our own hands to find the medical miracle that would save him Nine years ago Paulina and I embarked on a desperate quest We needed to create a baby with the right genetic profile whose umbilical cord blood could save our 2 year old son Andy dying from a rare genetic disease The baby would also have to be free of the inherited disease killing our son After three years and five IVF cycles and with the critical intervention of a novel medical technology called pre implantation genetic diagnosis PGD our daughter Sofia was born Her cord blood stem cells transplanted into her brother via blood transfusion replaced his faulty immune system and saved his life Today we are blessed that Andy 11 and Sofia 6 are both healthy beautiful children In gratitude Paulina and I donated the remaining frozen IVF embryos the ones that could never be used because they carried the flawed gene causing the disease to the Stem Cell Research Program at Children's Hospital Boston where Andy's disease was diagnosed and cured Scientists there were able to develop two new stem cell lines whose unique genetic properties will help researchers learn how Andy's disease and many others develop From that knowledge will come treatments and cures My wife and I know our story and its difficult moral choices is highly controversial We've chosen to share it to give the issue a human face and voice and to give hope to other families facing similar dilemmas
