The Privatization of Policing Brian Forst,Peter K. Manning,1999-06-10 The increasing reliance on private security services raises questions about the effects of privatization on the quality of public police forces particularly in high crime low income areas In an effective pro and con format two experts on policing offer two strikingly different perspectives on this trend towards privatization In the process they provide an unusually thoughtful discussion of the origins of both the public police and the private security sectors the forces behind the recent growth of private security operations and the risks to public safety posed by privatization In his critique of privatization Peter K Manning focuses on issues of free market theory and management practices such as Total Quality Management that he believes are harmful to the traditional police mandate to control crime He questions the appropriateness of strategies that emphasize service to consumers For Brian Forst the free market paradigm and economic incentives do not carry the same stigma He argues that neither public nor private policing should have a monopoly on law enforcement activities and he predicts an even more varied mix of public and private police activities than are currently available Following the two main sections of the book each author assesses the other s contribution reflecting on not just their points of departure but also on the areas in which they agree The breadth and depth of the discussion makes this book essential for both scholars and practitioners interested in policing generally and privatization in particular

Hollowed Out David Madland, 2015-06-24 For the past several decades politicians and economists have thought that high levels of inequality were good for the economy But an economy that works only for the rich simply doesn't work Because the middle class is so weak America's economy now suffers from the kinds of problems that plague less developed countries Privileged elites more frequently secure special treatment from a government that wastes money and stifles competition Children's opportunities are excessively determined by the wealth of their parents Societal distrust has increased making business transactions needlessly difficult Consumer

demand has weakened and become unstable which has helped fuel the Great Recession and has made the recovery painfully slow As Hollowed Out explains to have strong and sustainable growth the economy needs to work for everyone and grow from the middle out This new middle out theory aims to supplant trickle down economics the theory that was so wrong about inequality and our economy and did so much damage to our nation This new thinking has the potential to shape economic policymaking for generations Provided by publisher *Regulating the Security Industry* Mahesh Nalla,Tim

Prenzler,2020-01-24 It is widely acknowledged that the size of the security industry has increased in virtually every country around the world often eclipsing conventional police forces in personnel numbers and expenditures Security providers differ from law enforcement officers in many ways yet the nature of their crime reduction activities brings them into frequent contact with citizens drawing to the forefront issues of training professionalism and accountability Unlike police officers whose training and licensing standards are well established regulations for security providers are often minimalist or entirely absent This volume brings together research on regulatory regimes and strategies from around the globe covering both the large private security sector and the expanding area of public sector non police protective security It examines the nature and extent of licensing and monitoring and the minimum standards imposed on the industry by governments across the world The chapters in this book were originally published in the International Journal of Comparative and Applied Criminal Justice

Policing Transnational Crime Saskia Hufnagel,Anton Moiseienko,2020-06-04 As the threats posed by organised crime and terrorism persist law enforcement authorities remain under pressure to suppress the movement or flows of people and objects that are deemed dangerous This collection provides a broad overview of the challenges and trends of the policing of flows How these threats are constructed and addressed by governments and law enforcement agencies is the unifying thread of the book The concept of flows is interpreted broadly so as to include the trafficking of illicit substances trade in antiquities and legal and illegal migration including cross border travel by members of organised crime groups or foreign fighters The book focuses especially on the responses of governments and law enforcement agencies to the changing nature and intensity of flows The contributors comprise a mix of lawyers sociologists historians and criminologists who address both formal legal and practical on the ground approaches to the policing of flows The volume invites reflection on whether the existing tool kit of governments and law enforcement agencies is adequate in this changing environment and how it could be modernised for example by increased reliance on technology or by reappraising the role of the private sector As such the book will be useful not only for academics and practitioners who work on security related matters but also more generally to those who are interested in what the near term future of policing is likely to look like and how the balance between law enforcement on the one hand and human rights and civil liberties on the other can be achieved **Terrorism and Homeland Security** Philip Purpura,2011-08-29 Terrorism and Homeland Security An Introduction with Applications provides a comprehensive introduction to the problem of terrorism and to its solution Homeland Security In addition to its extensive treatment of
