Journalism at the End of the American Century, 1965-Present James Brian McPherson, 2006-06-30 McPherson captures the best and worst aspects of American journalism since 1965 The press has evolved into a conglomeration of entities that today can be described as pervasive entertaining and justifiably mistrusted In some ways today's press offers the best journalism Americans have ever seen In other ways the modern news media fall short of the ideals held by most of those who care about journalism and far short of the promise they once seemed to offer in terms of helping create an enlightened democracy Neither a paean to the press nor an exercise in media bashing this book finds much to criticize and to praise about recent American journalism while illustrating that traditional journalistic values have diminished in importance not just for many of those who control the media but also for the media consumers who most need good journalism Chapters are devoted to various themes that include social unrest the influence of entertainment values technological shifts media

consolidation and corporatization issues of content versus context new kinds of news media and why the 1970s may have been the high point of American journalism Events and issues given extra attention include the rise of television news and later CNN the Civil Rights Movement and other race related issues the Women s Movement various forms of alternative journalism wars in Vietnam and Iraq investigative journalism the World Trade Center attacks the Clinton Lewinsky scandal the 2000 and 2004 presidential campaigns and elections civic journalism and journalism scandals **American Journalism** W. David Sloan, Lisa Mullikin Parcell, 2014-01-10 News consumers made cynical by sensationalist banners AMERICA STRIKES BACK THE TERROR OF ANTHRAX and lurid leads might be surprised to learn that in 1690 the newspaper Publick Occurrences gossiped about the sexual indiscretions of French royalty or seasoned the story of missing children by adding that barbarous Indians were lurking about before the disappearance Surprising too might be the media s steady adherence to if continual tugging at its philosophical and ethical moorings These 39 essays written and edited by the nation s leading professors of journalism cover the theory and practice of print radio and TV news reporting Politics and partisanship press and the government gender and the press corps presidential coverage war reportage technology and news gathering sensationalism each subject is treated individually Appropriate for interested lay persons students professors and reporters Instructors considering this book for use in a course may request an examination copy here **The Bulletin of the American Society of Newspaper Editors** American Society of Newspaper Editors, 1995 **Rewriting the Newspaper** Thomas R. Schmidt, 2019-06-19 Between the 1970s and the 1990s American journalists began telling the news by telling stories They borrowed narrative techniques transforming sources into characters events into plots and their own work from stenography to anthropology This was more than a change in style It was a change in substance a paradigmatic shift in terms of what constituted news and how it was being told It was a turn toward narrative journalism and a new culture of news propelled by the storytelling movement Thomas Schmidt analyzes the expansion of narrative journalism and the corresponding institutional changes in the American newspaper industry in the last quarter of the twentieth century In doing so he offers the first institutionally situated history of narrative journalism s evolution from the New Journalism of the 1960s to long form literary journalism in the 1990s Based on the analysis of primary sources industry publications and oral history interviews this study traces how narrative techniques developed and spread through newsrooms advanced by institutional initiatives and a growing network of practitioners proponents and writing coaches who mainstreamed the use of storytelling Challenging the popular belief that it was only a few talented New York reporters Tome Wolfe Jimmy Breslin Gay Talese Joan Didion and others who revolutionized journalism by deciding to employ storytelling techniques in their writing Schmidt shows that the evolution of narrative in late twentieth century American Journalism was more nuanced more purposeful and more institutionally based than the New Journalism myth suggests Within the Veil Pamela Newkirk, 2002-09 A candid front line report on the continuing battle to integrate America s newsrooms and news coverage now available in paperback

Maps with the News Mark Monmonier,2018-12-01 Maps with the News is a lively assessment of the role of cartography in American journalism Tracing the use of maps in American news reporting from the eighteenth century to the 1980s Mark Monmonier explores why and how journalistic maps have achieved such importance A most welcome and thorough investigation of a neglected aspect of both the history of cartography and modern cartographic practice Mapline A well written scholarly treatment of journalistic cartography It is well researched thoroughly indexed and referenced amply illustrated Judith A Tyner Imago Mundi There is little doubt that Maps with the News should be part of the training and on the desks of all those concerned with producing maps for mass consumption and also on the bookshelves of all journalists graphic artists historians of cartography and geographic educators W G V Balchin Geographical Journal A definitive work on journalistic cartography Virginia Chipperfield Society of University Cartographers Bulletin

Chasing Newsroom Diversity Gwyneth Mellinger,2013-03-16 Social change triggered by the Civil Rights Movement in the 1960s sent the American Society of Newspaper Editors ASNE on a fifty year mission to dismantle an exclusionary professional standard that envisioned the ideal journalist as white straight and male In this book Gwyneth Mellinger explores the complex history of the decades long ASNE diversity initiative which culminated in the failed Goal 2000 effort to match newsroom demographics with those of the U S population Drawing upon exhaustive reviews of ASNE archival materials Mellinger examines the democratic paradox through the lens of the ASNE an elite organization that arguably did more than any other during the twentieth century to institutionalize professional standards in journalism and expand the concepts of government accountability and the free press The ASNE would emerge in the 1970s as the leader in the newsroom integration movement but its effort would be frustrated by structures of exclusion the organization had embedded into its own professional standards Explaining why a project so promising failed so profoundly Chasing Newsroom Diversity expands our understanding of the intransigence of institutional racism gender discrimination and homophobia within democracy
