Gregory S. Paul,2002-05 This book synthesises the growing body of evidence which suggests that modern day birds have evolved from theropod dinosaurs of prehistoric times The author argues that the ancestor descendant relationship can also be reversed Reimagining Dinosaurs in Late Victorian and Edwardian Literature Richard Fallon,2021-11-04

When the term dinosaur was coined in 1842 it referred to fragmentary British fossils In subsequent decades American discoveries including Brontosaurus and Triceratops proved that these so called terrible lizards were in fact hardly lizards at all By the 1910s dinosaur was a household word Reimagining Dinosaurs in Late Victorian and Edwardian Literature approaches the hitherto unexplored fiction and popular journalism that made this scientific term a meaningful one to huge transatlantic readerships Unlike previous scholars who have focused on displays in American museums Richard Fallon argues that literature was critical in turning these extinct creatures into cultural icons Popular authors skilfully related dinosaurs to wider concerns about empire progress and faith some of the most prominent like Arthur Conan Doyle and Henry Neville Hutchinson also disparaged elite scientists undermining distinctions between scientific and imaginative writing The rise of the dinosaurs thus accompanied fascinating transatlantic controversies about scientific authority
