Radical Philosophy Reader Roy Edgley, Richard Osborne, 1985 **Socialism, Feminism and Philosophy** Sean Sayers, Peter Osborne, 1990 Anthology of articles that have appeared in the journal *Radical Philosophy* It covers topics in social and moral philosophy which are central to current controversies on the left engaging with contemporary issues in critical terms **Radical Philosophy**, 2013 **A Marxist Education** Wayne Au, 2018-06-05 *Dialectics of Education* is a rich collection of essays analyzing both the role of education in shaping ideology in the United States and the political implications of struggles for educational justice This book seeks to recover and reframe the dialectical materialist tradition in critical education studies and carries this tradition forward into theory and practice relevant for today Building on the tradition of the groundbreaking book *Schooling in Capitalist America* that was first published in 1976 author Wayne Au presents a Marxist perspective on educational policies and pedagogy and the highlights the potential for struggle in both the political arena and the classroom This book is an essential tool in the growing resistance against the privatization of education and for the struggle for educational rights for all students regardless of ethnicity or social status

Rationalizing Culture Georgina Born, 2023-09-01 Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization the renowned Institut de Recherche et de Coordination Acoustique Musique IRCAM in Paris As a year long participant observer Born studied the social and cultural economy of an institution for research and production of avant garde and computer music She gives a unique portrait of IRCAM s composers computer scientists technicians and secretaries interrogating the effects of the cultural philosophy of the controversial avant garde composer Pierre Boulez who directed the institute until 1992 Born depicts a major artistic institution trying to maintain its status and legitimacy in an era increasingly dominated by market forces and in a volatile political and cultural climate She illuminates the erosion of the legitimacy of art and science in the face of growing commercial and political pressures By tracing how IRCAM has tried to accomodate these pressures while preserving its autonomy Born reveals the contradictory effects of institutionalizing an avant garde Contrary to those who see postmodernism representing an accord between high and popular culture Born stresses the continuities between modernism and postmodernism and how postmodernism itself embodies an implicit antagonism toward popular culture Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization the renowned Institut de Recherche et de Coordination Acoustique Musique IRCAM in Paris As a year long participant observer Born studied **Being English** Julian Wolfreys, 1994-09-30 Drawing on recent developments concerning national identity in post Marxist criticism and Derridean philosophy Wolfreys looks at the ways in which literature is used to represent the English middle classes to themselves using texts by Coleridge Wordsworth Arnold Gaskell Collins Eliot and Trollope *The Philosopher and His Poor* Jacques Rancière, 2004-04-23 Rancière s account of Western philosophical thought from Plato to Bourdieu argues that philosophers depend on an ideal poor for

their own analyses but preclude them from abstract thought

Historical Dictionary of Marxism Elliott Johnson, David Walker, Daniel Gray, 2014-09-09 The second edition of the Historical Dictionary of Marxism covers the basics of Karl Marx's thought, the philosophical contributions of later Marxist theorists, and the extensive real world political organizations and structures his work inspired. That is, the myriad political parties, organizations, countries, and leaders who subscribed to Marxism as a creed. This text includes a chronology, an introductory essay, and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on important personalities, both thinkers and doers, political parties and movements, and major communist or ex-communist countries. This book is an excellent access point for students, researchers, and anyone wanting to know more about Marxism.

Ideology Terry Eagleton, 1991 His thought is redneck, yours is doctrinal, and mine is deliciously supple. Ideology has never been so much in evidence as a fact and so little understood as a concept as it is today. From the left, it can often be seen as the exclusive property of ruling classes, and from the right, as an arid and totalizing exception to their own common sense. For some, the concept now seems too ubiquitous to be meaningful; for others, too cohesive for a world of infinite difference. Here, in a book written for both newcomers to the topic and those already familiar with the debate, Terry Eagleton unravels the many different definitions of ideology and explores the concept's tortuous history from the Enlightenment to postmodernism. Ideology provides lucid interpretations of the thought of key Marxist thinkers and of others such as Schopenhauer, Nietzsche, Freud, and the various poststructuralists. As well as clarifying a notoriously confused topic, this new work by one of our most important contemporary critics is a controversial political intervention into current theoretical debates. It will be essential reading for students and teachers of literature and politics.

Modern Environmentalism David Pepper, 2002-06-01 Modern Environmentalism presents a comprehensive introduction to environmentalism, the origins of its main beliefs and ideas, and how these relate to modern environmental ideologies. Providing a historical overview of the development of attitudes to nature and the environment in society, the book examines key environmentalist ideas, influences, and movements. Science's role in mediating our view of nature is emphasised throughout. This entirely new account draws on the explosion of writing on socio-environment relations since Pepper's earlier work, *The Roots of Modern Environmentalism*.

Western Conceptions of the Individual Brian Morris, 2024-11-01 This is a comprehensive study of the varying conceptions of the human subject in the Western intellectual tradition. Although informed by an anthropological perspective, the author draws on material from all the major intellectual disciplines that have contributed to this tradition and offers biographical and theoretical vignettes of all the major Western scholars. By scrutinizing the classical texts of the Western tradition, he succeeds in delineating the differing conceptions of the human individual which emerge from these writings and gives a guide to the most important ideas in Western cultural traditions.

Hegel, Marx and the Contemporary World Kaveh Boiveiri, Emmanuel Chaput, 2016-06-22 This book is the result of a three-day conference held in April 2014 at the University of Montreal, Canada, discussing the relevance of the work of Hegel.

and Marx in today's world particularly with regard to the ecological economic political and anthropological crisis facing humanity. Accordingly, the book is an exploration of the specific nature of the crisis we face both in our everyday lives and in the realm of theory. However, if indeed the necessity of a proper critique (Kritikos) is intimately linked to a state of crisis (Krisis), the conceptual frame necessary to produce such a critique may itself be in crisis. Among the vast number of critical oppositions to contemporary capitalism, what are the keys available to understand the present forms of human conditions, alienation and exploitation? Controversies and divisions among the different tendencies within the critical tradition tend to highlight the point that there is also a theoretical crisis which prevents a proper diagnosis of the actual crisis and prevents in turn a proper plan of action from being established. Looking back to Marx and Hegel allowed a return, if not to the sources at least to two unavoidable influences among the various critical approaches to capitalism. Be it with or against Hegel and/or Marx, the criticisms of modernity, post-modernity and capitalism cannot neglect the shadows of these thinkers. Both Marx's and Hegel's philosophical, sociological and political enterprises must be linked historically to the will to diagnose and solve what they saw as the most important crises of their own time. From Hegel's case, the spiritual crisis which followed the advent of modernity and its accompanying turmoil to the social and political crisis caused by capitalism and the advent of a new industrial society in Marx's case. Both intellectual ventures are at every turn haunted by the notion of crisis. This book will appeal to anyone interested in Hegel's and Marx's philosophical and political theories. Not only does it provide the historical context necessary to understand properly the relation between Marx and Hegel, but it also places the relevance of their teachings for the contemporary reader in perspective.

Bicycle Citizens Robin M. LeBlanc, 2023-09-01 While the typical Japanese male politician glides through his district in air-conditioned taxis, the typical female voter trundles along the side streets on a simple bicycle. In this first ethnographic study of the politics of the average female citizen in Japan, Robin LeBlanc argues that this taxi-bicycle contrast reaches deeply into Japanese society. To study the relationship between gender and liberal democratic citizenship, LeBlanc conducted extensive ethnographic fieldwork in suburban Tokyo among housewives, volunteer groups, consumer cooperative movements and the members of a committee to reelect a female Diet member who used her own housewife status as the key to victory. LeBlanc argues that, contrary to popular perception, Japanese housewives are ultimately not without a political world. Full of new and stimulating material, engagingly written and deft in its weaving of theoretical perspectives with field research, this study will not only open up new dialogues between gender theory and broader social science concerns but also provide a superb introduction to politics in Japan as a whole. While the typical Japanese male politician glides through his district in air-conditioned taxis, the typical female voter trundles along the side streets on a simple bicycle. Forms of Fanonism Reiland Rabaka, 2010-03-08 When Frantz Fanon's critiques of racism, sexism, colonialism, capitalism and humanism are brought into the ever-widening orbit of African critical theory, something unprecedented in the annals of African

intellectual history happens five distinct forms of Fanonism emerge Forms of Fanonism Frantz Fanon's Critical Theory and the Dialectics of Decolonization is discursively distinguished from other engagements of Fanon's thought and texts insofar as it is the first study to consciously examine his contributions to Africana Studies and critical theory or rather the Africana tradition of critical theory Forms of Fanonism identifies and intensely analyzes Fanon's contributions to the deconstruction and reconstruction of Africana Studies radical politics and critical social theory In highlighting his unique solutions to the problems of racism sexism colonialism capitalism and humanism five distinct forms of Fanonism materialize These five forms of Fanonism allow contemporary critical theorists to innovatively explore the ways in which his thought and texts can be dialectically put to use in relieving the wretched experience of this generation's wretched of the earth Critics can also apply these forms to deconstruct and reconstruct Africana Studies radical politics and critical social theory using their anti-imperialist interests Throughout Forms of Fanonism Reiland Rabaka critically dialogues with Fanon incessantly asking his corpus critical questions and seeking from it crucial answers This book in short solemnly keeps with Fanon's own predilection for connecting critical theory to revolutionary praxis by utilizing his thought and texts as paradigms and points of departure to deepen and develop the Africana tradition of critical theory

Outstanding Academic Title 2012 Critical Curriculum Studies offers a novel framework for thinking about how curriculum relates to students understanding of the world around them Wayne Au brings together curriculum theory critical educational studies and feminist standpoint theory with practical examples of teaching for social justice to argue for a transformative curriculum that challenges existing inequity in social educational and economic relations Making use of the work of important scholars such as Freire Vygotsky Hartsock Harding and others Critical Curriculum Studies argues that we must understand the relationship between the curriculum and the types of consciousness we carry out into the world *Virginia Woolf and Being-in-the-world* Emma Simone,2017-04-19 Breaking fresh ground in Woolfian scholarship this study presents a timely and compelling interpretation of Virginia Woolf's textual treatment of the relationship between self and world from the perspective of the philosophy of Martin Heidegger Drawing on Woolf's novels essays reviews letters diary entries short stories and memoirs the book explores the political and the ontological as the individual's connection to the world comes to be defined by an involvement and engagement that is always already situated within a particular physical societal and historical context Emma Simone argues that at the heart of what it means to be an individual making his or her way in the world the perspectives of Woolf and Heidegger are founded upon certain shared concerns including the sustained critique of Cartesian dualism particularly the resultant binary oppositions of subject and object and self and Other the understanding that the individual is a temporal being an emphasis upon intersubjective relations insofar as Being in the world is defined by Being with Others and a consistent emphasis upon average everydayness as both determinative and representative of the individual's relationship to and with the world Jurisprudence as Ideology , Camus, Philosophe Matthew

Sharpe,2015-08-25 Camus Philosophe To Return to our Beginnings is the first book on Camus to read Camus in light of and critical dialogue with subsequent French and European philosophy It argues that while not an academic philosopher Albert Camus was a philosophe in more profound senses looking back to classical precedents and the engaged French lumi res of the 18th century Aiming his essays and literary writings at the wider reading public Camus criticism of the forms of political theology enshrined in fascist and Stalinist regimes singles him out markedly from more recent theological and messianic turns in French thought His defense of classical thought turning around the notions of natural beauty a limit and mesure makes him a singularly relevant figure given today's continuing debates about climate change as well as the way forward for the post Marxian Left
