Congress and of All Departments of the Government of the United States for the Period from ... to ... ,** **Killing Shore** K. A. Nelson, 2025-08-05 I thought that this was going to be another of those books puffing up the American side of WWII It most certainly isn't K A Nelson tells an interesting story illuminating a theatre of the North Atlantic campaign that has been comparatively neglected and he tells it well Recommended The Naval Review It is January 1942 Six weeks after the United States entered World War II Imperial Japan is annihilating American forces across the Far East while the Nazis stand triumphant over much of Europe Adolf Hitler's forces are about to commence an assault along the East Coast of the United States but this Atlantic Pearl Harbor would prove far more devastating than Japan's attack on Hawaii The wolves are closing in and few Americans realize their beaches and coastal cities are about to witness the worst naval defeat in American history The Western Hemisphere holds the key to victory for the beleaguered Allies but only if the vast economic and military resources of North and South America can be carried across the Atlantic by Allied merchant ships These civilian manned cargo vessels are the backbone of the American war economy and the lifeline enabling Britain and the Soviet Union to survive but Hitler's favorite admiral also knows this and he has set in motion a plan of unprecedented boldness Germany's dreaded submarines or U boats are going to the United States The fiery months that followed would pit American servicemen against German U boat sailors in a desperate struggle that stained East Coast waters with oil and blood In the crosshairs of

this deadly cat and mouse game was a stalwart contingent of civilian mariners who crewed the tankers and freighters supplying the war against the Axis Powers. Thousands of them would perish as hundreds of merchant ships were sunk. Every American coastal state became a battlefield in 1942 and the events that transpired off New Jersey illustrate the perils and brutality of this forgotten campaign. The seafloor along the Garden State is today strewn with shipwrecks that bear witness to the innumerable ways to die faced by friend and foe alike only miles from the boardwalk. Though these seafarers' lives were forfeit, the battle they fought would decide the fates of millions.

Geographical Fieldwork in the 21st Century Kendra McSweeney, Antoinette WinklerPrins, 2021-05-31 Fieldwork is a hallmark of geographical scholarship encompassing all the approaches by which we learn first hand about the world. Too often though fieldwork details the challenges, the failures and methodological mash up used are left out of geographers' published work. This accessible collection brings together 18 of those too often overlooked stories and reveals the ongoing vibrancy of geographical fieldwork today. The 32 authors span many of geography's subfields and their work incorporates multiple methodological traditions: ethnographic, digital, archival, mixed and more. With short, readable contributions, *Geographical Fieldwork in the 21st Century* offers an ideal resource for students across the social sciences who are wrangling with the process of fieldwork. It shows fieldwork's core attributes: innovation, commitment and serendipity are alive and well. But this collection also illustrates just how fieldwork is changing as our ability to learn about the world is shaped by new pressures of the 21st century: neoliberal academy, by the proliferation of new technologies and by the growing social demand for collaborative, engaged and ethical scholarship. The chapters in this book were originally published as a special issue of the journal *Geographical Review*.

Autodesk 3ds Max 2011: A Comprehensive guide Cadcam Technologies, **Human-Computer Interaction** Steve Howard, Judy Hammond, Gitte Lindgaard, 2013-06-05 The theme of the 1997 INTERACT conference, 'Discovering New Worlds of HCI', signals major changes that are taking place with the expansion of new technologies into fresh areas of work and leisure throughout the world and new pervasive, powerful systems based on multimedia and the internet. HCI has a vital role to play in these new worlds to ensure that people using the new technologies are empowered rather than subjugated to the technology that they increasingly have to use. In addition, outcomes from HCI research studies over the past 20 years are now finding their way into many organisations and helping to improve and enhance work practices. These factors have strongly influenced the INTERACT 97 Committee when creating the conference programme with the result that besides the more traditional HCI research and education focus found in previous INTERACT conferences, one strand of the 1997 conference has been devoted to industry and another to multimedia. The growth in the IFIP TC13 committee itself reflects the expansion of HCI into new worlds. Membership of IFIP TC13 has risen to now include representatives of 24 IFIP member country societies from many parts of the world. In 1997 IFIP TC13 breaks new ground by holding its sixth INTERACT conference in the Asia Pacific region. This is a significant departure from previous INTERACT conferences that were all held in Europe and is especially important.
