Radionuclide Imaging of Infection and Inflammation

Elena Lazzeri, Alberto Signore, Paola Anna Erba, Napoleone Prandini, Annibale Versari, Giovanni D'Errico, Giuliano Mariani, 2021-01-23 This atlas explores the latest advances in radionuclide imaging in the field of inflammatory diseases and infections which now typically includes multimodality fusion imaging e.g. in SPECT CT and in PET CT. In addition to describing the pathophysiologic and molecular mechanisms on which the radionuclide imaging of infection/inflammation is based, the clinical relevance and impact of such procedures are demonstrated in a collection of richly illustrated teaching cases which describe the most commonly observed scintigraphic patterns as well as anatomic variants and technical pitfalls. Special emphasis is placed on using tomographic multimodality imaging to increase both the sensitivity and specificity of radionuclide imaging. The aim of the second edition of this book is to update the first published in 2013 by reflecting the changes in this rapidly evolving field. Particular attention is paid to the latest advances in the radionuclide imaging of infection and inflammation including the expanding role of hybrid imaging with ¹⁸F FDG PET CT. SPECT CT without neglecting new radiotracers proposed for the imaging of infection/inflammation. Written by respected experts in the field, the book will be an invaluable tool for residents in nuclear medicine as well as for other specialists.

Brunner & Suddarth's Textbook of Medical-surgical Nursing Suzanne C. O'Connell Smeltzer, Brenda G. Bare, Janice L. Hinkle, Kerry H.
