Royal Marsden Manual of Cancer Nursing Procedures Sara Lister, Lisa Dougherty, Louise McNamara, 2018-11-19 The Royal Marsden is the world's first hospital dedicated to cancer diagnosis treatment research and education a centre of excellence with an international reputation for ground breaking research and pioneering the very latest in cancer treatments and technologies as well as specialising in cancer diagnosis and education This companion volume to the internationally successful The Royal Marsden Manual of Clinical Nursing Procedures is designed to support practitioners who work specifically with oncology patients by providing detailed evidence based procedures and rationale and problem solving guidance on all aspects of oncology nursing The Royal Marsden Manual of Cancer Nursing Procedures Is organized and structured to represent the needs of the patient along their care pathway Provides the latest evidence underpinning all procedures Includes information on haematological procedures pain assessment and management wound care oncological emergencies and end of life care Gives detailed guidelines on supporting patients living with cancer with practical information on such things as benefits exercise and nutrition The Royal Marsden Manual of Cancer Nursing Procedures is an invaluable definitive resource for all those involved in the provision of cancer care and support to patients and their families

Alexander's Nursing Practice - E-Book Ian Peate, 2024-04-04 Selected for 2025 Doody's Core Titles in Long Term

Care and Home Care Alexander's Nursing Practice Hospital and Home Sixth Edition is the most comprehensive textbook available for undergraduate nursing students today. This resource will prepare students for their future role as healthcare professionals in a variety of settings. It covers all the basics of nursing including care of patients with common disorders, core nursing issues like medicines management and infection prevention and control, and how to nurse specific patient groups. The sixth edition has been fully updated to incorporate the latest evidence, policies and registration requirements, and reflects the transformative changes currently occurring in healthcare policies, procedures and technologies. With a host of features to enhance the learning and teaching experience, this book will make a significant contribution to preparing compassionate nurses who will deliver patient-centred, high quality and holistic care. Designed to help the reader navigate the demands of the latest NMC educational requirements, the expert team of contributors led by renowned editor Ian Peate OBE FRCN, fully updated with the latest evidence and trends, incorporates the latest practice guidelines, research findings and clinical standards relevant to the nursing field. Addresses the role of nurses in primary care settings, general practice nursing responsibilities, chronic disease management, health screening and the delivery of integrated patient-centred care within the UK primary care landscape. Richly illustrated throughout to reinforce key concepts, demonstrate clinical procedures and engage students in active learning. Includes a wide range of helpful learning features including case studies and critical thinking exercises, helps the reader to analyse complex situations, make evidence-based decisions and communicate effectively with patients and healthcare team members. Pedagogical features to help students navigate the textbook, organise their learning and review key concepts efficiently. Supplemented with online material including MCQs, image bank, critical thinking questions, extra online material, supplementary text, website, figure references and extra online images. **Practical Radiation Oncology Physics E-Book** Sonja Dieterich, Eric Ford, Daniel Pavord, Jing Zeng, 2015-06-24. Perfect for radiation oncologists, medical physicists and residents in both fields. Practical Radiation Oncology Physics provides a concise and practical summary of the current practice standards in therapeutic medical physics. A companion to the fourth edition of Clinical Radiation Oncology by Drs Leonard Gunderson and Joel Tepper, this indispensable guide helps you ensure a current state of the art clinical practice. Covers key topics such as relative and in vivo dosimetry, imaging and clinical imaging, stereotactic body radiation therapy and brachytherapy. Describes technical aspects and patient-related aspects of current clinical practice. Offers key practice guideline recommendations from professional societies throughout, including AAPM, ASTRO, ABS, ACR, IAEA and others. Includes therapeutic applications of x-rays, gamma rays, electron and charged particle beams, neutrons and radiation from sealed radionuclide sources, plus the equipment associated with their production, use, measurement and evaluation. Features a 'For the Physician' box in each chapter which summarizes the key points with the most impact on the quality and safety of patient care. Provides a user-friendly appendix with annotated compilations of all relevant recommendation documents. Medicine eBook is accessible on a variety of devices. Davidson's Principles and
