Roman Camps In England The Field Archaeology:

Roman Camps in England Humphrey Welfare, Vivien Grace Swan, 1995 This text concentrates on the temporary Roman camps that were constructed of which over 130 have been discovered in England In this study each of the camps is described and illustrated with photographs and plans An introductory essay sets out how the army chose the site for each camp and the ways in which the lie of the land affected the design of the defences This book should be of interest to all those who wish to know more about the archaeology of the Roman Empire the practicalities of ancient warfare and the workings of the military mind

Roman Camps in Britain Rebecca H. Jones, 2012-02-15 An overview of the archaeology of Roman camps from a respected authority

England Timothy Darvill, Jane Timby, Paul Stamper, 2002 Traveling around England is in many senses a journey back in time On all sides and sometimes even under the road or footpath itself there are fragments of the ancient past alongside the clutter of the modern world Medieval villages castles ancient churches and Roman villas are commonplace and take us back to the time of Christ And far older yet equally abundant are the barrows hillforts stone circles camps standing stones trackways and other relics of prehistoric times Now thanks to these three archaeologists each a specialist in one of the three periods covered by the Guide prehistoric Roman and medieval readers have the chance to not only explore but to understand in context these fascinating sites and ruins In addition to reporting on such well known sites as Stonehenge and Hadrian's Wall and cities such as London and York which themselves offer a wealth of archaeological remains the book also covers smaller lesser known sites throughout the country An introductory section provides background to the monuments and a reference section provides definitions further reading and information about museum collections Finally there are 200 photographs plans and maps that depict and describe these ancient remains in detail

An Archaeology of Town Commons in England Mark Bowden, Graham Brown, Nicky Smith, 2014-07-15 This is the first published overview of the archaeology of urban common land By recognising that urban common land represents a valid historical entity this book contributes towards successful informed conservation It contains a variety of interesting and illuminating illustrations including contemporary and archive photographs Historically towns in England were provided with common lands for grazing the draft animals of townspeople engaged in trade and for the pasturing of farm animals in an economy where the rural and the urban were inextricably mixed The commons yielded wood minerals fruits and wild animals to the town's inhabitants and also developed as places of recreation and entertainment as extensions of domestic and industrial space and as an arena for military religious and political activities However town commons have been largely disregarded by historians and archaeologists the few remaining urban commons are under threat and are not adequately protected despite recognition of their wildlife and recreational value In 2002 English Heritage embarked upon a project to study town commons in England to match its existing initiatives in other aspects of the urban scene The aim was to investigate through a representative sample the archaeological content and Historic Environment value of urban commons in England and to

prompt appropriate conservation strategies for them The resulting book is the first overview of the archaeology of town commons a rich resource because of the relatively benign traditional land use of commons which preserves the physical evidence of past activities including prehistoric and Roman remains as well as traces of common use itself The recognition of town commons as a valid historical entity and a valued part of the modern urban environment is an important first step towards successful informed conservation An important consideration for the future is maintaining the character of town commons as a different sort of urban open space distinct from parks and public gardens

The Handbook of British Archaeology Lesley Adkins,Roy Adkins,Victoria Leitch,2017-04-13 For over 25 years The Handbook of British Archaeology has been the foremost guide to archaeological methods artefacts and monuments providing clear explanations of all specialist terms used by archaeologists This completely revised and updated edition is packed with the latest information and now includes the most recent developments in archaeological science Meticulously researched every section has been extensively updated by a team of experts There are chapters devoted to each of the archaeological periods found in Britain as well as two chapters on techniques and the nature of archaeological remains All the common artefacts types of sites and current theories and methods are covered The growing interest in post medieval and industrial archaeology is fully explored in a brand new section dealing with these crucial periods Hundreds of new illustrations enable instant comparison and identification of objects and monuments from Palaeolithic handaxes to post medieval gravestones Several maps pinpoint the key sites and other features include an extensive bibliography and a detailed index The Handbook of British Archaeology is the most comprehensive resource book available and is essential for anyone with an interest in the subject from field archaeologists and academics to students heritage professionals Time Team followers and amateur enthusiasts

Roman and Medieval Exeter and their Hinterlands Stephen Rippon,Neil Holbrook,2021-04-30 This first volume presenting research carried out through the Exeter A Place in Time project provides a synthesis of the development of Exeter within its local regional national and international hinterlands Exeter began life in c AD 55 as one of the most important legionary bases within early Roman Britain and for two brief periods in the early and late 60s AD Exeter was a critical centre of Roman power within the new province When the legion moved to Wales the fortress was converted into the civitas capital for the Dumnonii Its development as a town was however relatively slow reflecting the gradual pace at which the region as a whole adapted to being part of the Roman world The only evidence we have for occupation within Exeter between the 5th and 8th centuries is for a church in what was later to become the Cathedral Close In the late 9th century however Exeter became a defended burh and this was followed by the revival of urban life Exeter s wealth was in part derived from its central role in the south west s tin industry and by the late 10th century Exeter was the fifth most productive mint in England Exeter s importance continued to grow as it became an episcopal and royal centre and excavations within Exeter have revealed important material culture assemblages that reflect its role as an international port

The Oxford Handbook of Roman Britain

Martin Millett, Louise Revell, Alison Jane Moore, 2016 This handbook is currently in development with individual articles publishing online in advance of print publication At this time we cannot add information about unpublished articles in this handbook however the table of contents will continue to grow as additional articles pass through the review process and are added to the site Please note that the online publication date for this handbook is the date that the first article in the title was published online Roman Britain is a critical area of research within the provinces of the Roman empire Within the last 15 20 years the study of Roman Britain has been transformed through an enormous amount of new and interesting work which is not reflected in the main stream literature **The Secret History of the Roman Roads of Britain** M.C.

Bishop, 2014-02-28 There have been many books on Britain's Roman roads but none have considered in any depth their long term strategic impact Mike Bishop shows how the road network was vital not only in the Roman strategy of conquest and occupation but influenced the course of British military history during subsequent ages The author starts with the pre Roman origins of the network many Roman roads being built over prehistoric routes before describing how the Roman army built developed maintained and used it Then uniquely he moves on to the post Roman history of the roads He shows how they were crucial to medieval military history try to find a medieval battle that is not near one and the governance of the realm fixing the itinerary of the royal progresses Their legacy is still clear in the building of 18th century military roads and even in the development of the modern road network Why have some parts of the network remained in use throughout The text is supported with clear maps and photographs Most books on Roman roads are concerned with cataloguing or tracing them or just dealing with aspects like surveying This one makes them part of military landscape archaeology [Roman Camps in Scotland](#) Rebecca H. Jones, 2011 Scotland contains a wealth of Roman camps and this book is a companion volume to earlier publications of camps in England and Wales As the northern frontier zone of Britain subject to repeated campaigns by the Roman army the area possesses a wide and fascinating range of camp sites recorded both as earthwork remains and through cropmarkings from the air The field evidence is discussed against the background of Roman army campaigns with each of the camps described and illustrated in a detailed gazetteer The book is illustrated throughout with plans maps and photographs and will be of interest to all those who wish to know more about the archaeology of the Roman army its campaigns in northern Britain and the ancient military mind [A Companion to Roman Britain](#) Malcolm Todd, 2008-04-15 This major survey of the history and culture of Roman Britain spans the period from the first century BC to the fifth century AD Major survey of the history and culture of Roman Britain Brings together specialists to provide an overview of recent debates about this period Exceptionally broad coverage embracing political economic cultural and religious life Focuses on changes in Roman Britain from the first century BC to the fifth century AD Includes pioneering studies of the human population and animal resources of the island [Roman Britain](#) David Colin Arthur Shotter, 2004 Roman Britain offers a concise introduction to the Roman occupation of Britain drawing on the wealth of recent scholarship to explain the progress of the

Romans and their objectives in conquering Britain **The Roman Invasion of Britain** Birgitta Hoffmann,2013-08-21 The purpose of this book is to take what we think we know about the Roman Conquest of Britain from historical sources and compare it with the archaeological evidence which is often contradictory Archaeologists and historians all too often work in complete isolation from each other and this book hopes to show the dangers of neglecting either form of evidence In the process it challenges much received wisdom about the history of Roman Britain Birgitta Hoffmann tackles the subject by taking a number of major events or episodes such as Caesar's incursions Claudius invasion Boudicca's revolt presenting the accepted narrative as derived from historical sources and then presenting the archaeological evidence for the same The result of this innovative approach is a book full of surprising and controversial conclusions that will appeal to the general reader as well as those studying or teaching courses on ancient history or archaeology **Roman Military Equipment**

from the Punic Wars to the Fall of Rome, second edition M. C. Bishop,John Coulston,2006-04-22 Rome's rise to empire is often said to have owed much to the efficiency and military skill of her armies and their technological superiority over barbarian enemies But just how advanced was Roman military equipment What were its origins and how did it evolve The authors of this book have gathered a wealth of evidence from all over the Roman Empire excavated examples as well as pictorial and documentary sources to present a picture of what range of equipment would be available at any given time what it would look like and how it would function They examine how certain pieces were adopted from Rome's enemies and adapted to particular conditions of warfare prevailing in different parts of the Empire They also investigate in detail the technology of military equipment and the means by which it was produced and discuss wider questions such as the status of the soldier in Roman society Both the specially prepared illustrations and the text have been completely revised for the second edition of this detailed and authoritative handbook bringing it up to date with the very latest research It illustrates each element in the equipment of the Roman soldier from his helmet to his boots his insignia his tools and his weapons This book will appeal to archaeologists ancient and military historians as well as the generally informed and inquisitive reader

International Congress of Roman Frontier Studies 20 Ángel Morillo Cerdán,Norbert Hanel,Esperanza Martín,2009 This massive three volume set publishes the proceedings of the 2006 Limes conference which was held in Leon a total of 138 contributions Naturally these cover a vast range of topics related to Roman military archaeology and the Roman frontiers The archaeology of the Roman military in Spain and contributions by Spanish scholars are prominent whilst other themes include the internal frontiers the end of the frontiers and the barbarians in the empire the fortified town in the late Roman period soldiers on the move and the early development of frontiers Further sessions had a regional focus Majority of essays in English some in Spanish German and Italian England's Military Heritage from the Air Mark Bowden,Allan Brodie,2024-05-28 England's Military Heritage from the Air presents the story of the country's rich military heritage using photographs from the Aerofilms Collection Covering over 6 000 years it reflects the changing threats faced by England from

enemies without and conflicts within The book covers everything from hillforts to aircraft carriers and includes the castles battle sites ships and aircraft that have witnessed the changing character of warfare Ending with how victory and sacrifice are commemorated and remembered England's Military Heritage from the Air is a tribute to the courage skill and endurance of the people who have suffered yet prevailed *Roman Camps in Wales and the Marches* J. L. Davies, Rebecca H. Jones, 2006 The Roman army in Britain left a rich archaeological legacy in the form of permanently occupied installations such as legionary fortresses auxiliary forts and frontier works Less well known are those field works built by the army on campaign marching camps or as part of its rigorous training regimes namely practice works This volume presents a detailed study of these lesser known field entrenchments in Wales and the Marches a region which for a generation from the mid first century AD became the focus of operations in southern Britain Thereafter complexes of practice works in the vicinity of permanently occupied military bases illustrate the importance of the region to the training regimes of the provincial army This volume presents a detailed description of those varied camps recorded in Wales and the Marches in the form of a gazetteer together with plans of all accessible sites thereby complementing those already published for most of England by the RCAHME The camps are discussed against the background of Roman military castramentation and tactics on a wide chronological and geographical front with specific reference to the story of early campaigning in this western region as well as the subsequent garrisoning phase as illustrated by a combination of literary and archaeological evidence *Housesteads Roman Fort - the Grandest Station* Alan Rushworth, 2014-02-15 Housesteads is one of the most important forts on Hadrian's Wall Extensive excavations were carried out between 1874 and 1981 by Newcastle University Combining the results with those of excavations done between 1959 and 1961 by Durham University we now have a complete plan of the north east part of the fort These excavations uncovered principally Buildings XIII XIV and XV plus stretches of rampart between the north and east gates along with a multitude of features and stratigraphic evidence revealing not only the sequences but also large finds assemblages In addition to shedding much light on the material culture of the fort's occupants and the structural and chronological relationships between various parts of the fort limited reinvestigation of Building XIV and excavation of the east end of Building XV enabled significant reinterpretation of the original conclusions reached by the Durham investigators including some redating of structures These excavations uncover the full 300 year period during which the fort formed an integral part of the Roman military frontier for much if not all of that time the base of the cohort I Tungrorum milliaria peditum This report documents the excavations and gives full finds reports and the analysis of the evidence has enabled the authors to provide a full history of this part of the fort *Agricola* Simon Turney, 2022-02-15 The only biography of the most famous Roman general since 98AD exploring his role in the Romanisation of Britain *Roman Frontier Studies 2009* Nick Hodgson, Paul Bidwell, Judith Schachtmann, 2017-06-30 Proceedings of the 21st International Congress of Roman Frontier Studies LIMES XXI hosted by Tyne Wear Archives Museums Newcastle upon Tyne UK in August 2009 *Wroxeter, the*

Cornovii and the Urban Process. Volume 2: Characterizing the City. Final Report of the Wroxeter Hinterland Project, 1994-1997 Roger H. White, C. Gaffney, V. L. Gaffney, 2013-03-15 In the mid 1990s the site of the Roman city of Viroconium Cornoviorum at Wroxeter Shropshire was subjected to intensive geophysical survey This volume reports on the archaeological interpretation of this work marrying the geophysical data with a detailed analysis of the existing aerial photographic record created by Arnold Baker 1950s 1980s
