**State Power in Ancient China and Rome** Walter Scheidel, 2015. Two thousand years ago the Qin Han and Roman empires were the largest political entities of the ancient world developing simultaneously yet independently at opposite ends of Eurasia. Although their territories constituted only a small percentage of the global land mass, these two Eurasian polities controlled up to half of the world population and endured longer than most pre-modern imperial states. Similarly, their eventual collapse occurred during the same time. The parallel nature of the Qin Han and Roman empires has rarely been studied comparatively. Yet here is a collection of pioneering case studies compiled by Walter Scheidel that sheds new light on the prominent aspects of imperial state formation. This essential new volume builds on the foundation of Scheidel's Rome and China (2009) and opens up a comparative dialogue among distinguished scholars. They provide unique insights into the complexities of imperial rule, including the relationship between rulers and elite groups, the funding of state agents, the determinants of urban development, and the rise of bureaucracies. By bringing together experts in each civilization, State Power in Ancient China and Rome provides a unique forum to explore social evolution, helping us further understand government and power relations in the ancient world.

Rulers and Ruled in Ancient Greece, Rome, and China Hans Beck, Griet Vankeerberghen, 2021-02-04. Situated on opposite flanks of Eurasia, ancient Mediterranean and Han Chinese societies had a hazy understanding of each other's existence. But they had no grounded knowledge about one another nor was there any form of direct interaction. In other words, their historical trajectories were independent. In recent years, however, many similarities between both cultures have been detected, which has energized the field of comparative history. The present volume adds to the debate a creative method of juxtaposing historical societies. Each contribution covers both ancient China and the Mediterranean in an accessible manner. Embarking from the observation that Greek, Roman, and Han Chinese societies were governed by comparable features, the contributors to this volume explain the dynamic interplay between political rulers and the ruled masses in their culture-specific manifestation as *demos*, *Greece*, *populus*, *Rome*, and *min* *China*.

**State and Society in the Philippines** Patricio N. Abinales, Donna J. Amoroso, 2017-07-06. This clear and nuanced introduction explores the Philippines' ongoing and deeply charged dilemma of state-society relations through a historical treatment of state formation and the corresponding conflicts and collaboration between government leaders and social forces. Patricio N. Abinales and Donna J. Amoroso examine the long history of institutional weakness in the Philippines and the varied strategies the state has employed to overcome its structural fragility and strengthen its bond with society. The authors argue that this process reflects the country's recurring dilemma: on the one hand, is the state's persistent inability to provide essential services, guarantee peace and order, and foster economic development; on the other, is the Filipinos' equally enduring suspicions of a strong state. To many citizens, this powerfully evokes the repression of the 1970s and the 1980s that polarized society and cost thousands of lives in repression and resistance, and billions of dollars in corruption, setting the nation back.
