**Romantic Science** Noah Heringman, 2012-02-01 Although romantic science may sound like a paradox much of the romance surrounding modern science the mad scientist the intuitive genius the utopian transformation of nature originated in the Romantic period Romantic Science traces the literary and cultural politics surrounding the formation of the modern scientific disciplines emerging from eighteenth century natural history Revealing how scientific concerns were literary concerns in the Romantic period the contributors uncover the vital role that new discoveries in earth plant and animal sciences played in the period s literary culture As Thomas Pennant put it in 1772 Natural History is at present the favourite science over all Europe and the progress which has been made in it will distinguish and characterise the eighteenth century in the annals of literature As they examine the social and literary ramifications of a particular branch or object of natural history the contributors to this volume historicize our present intellectual landscape by reimagining and redrawing the disciplinary boundaries between literature and science Contributors include Alan Bewell Rachel Crawford Noah Heringman Theresa M Kelley Amy Mae King Lydia H Liu Anne K Mellor Stuart Peterfreund and Catherine E Ross **A Natural History of the Romance Novel** Pamela Regis, 2013-08-31 The romance novel has the strange distinction of being the most popular but least respected of literary genres While it remains consistently dominant in bookstores and on best seller lists it is also widely dismissed by the critical community Scholars have alleged that romance novels help create subservient readers who are largely women by confining heroines to stories that ignore issues other than love and marriage Pamela Regis argues that such critical studies fail to take into consideration the personal choice of readers offer any true definition of the romance novel or discuss the nature and scope of the genre Presenting the counterclaim that the romance novel does not enslave women but on the contrary is about celebrating freedom and joy Regis offers a definition that provides critics with an expanded vocabulary for discussing a genre that is both classic and contemporary sexy and entertaining Taking the stance that the popular romance novel is a work of literature with a brilliant pedigree Regis asserts that it is also a very old stable form She traces the literary history of the romance novel from canonical works such as Richardson s Pamela through Austen s Pride and Prejudice Bront s Jane Eyre and E M Hull s The Sheik and then turns to more contemporary works such as the novels of Georgette Heyer Mary Stewart Janet Dailey Jayne Ann Krentz and Nora Roberts **Romance of Natural History** Philip Henry Gosse, 1902 **The Romance of Natural History** Philip Henry Gosse, 1867 **The Romance of Natural History, Second Series** Philip Henry Gosse, 2019-12-04 In The Romance of Natural History Second Series Philip Henry Gosse weaves a captivating tapestry of scientific inquiry intertwined with poetic reflection inviting readers into the enchanting world of nature This collection of essays showcases Gosse s distinctive style marked by lyrical prose and a deep reverence for the natural world Engaging with themes of evolution adaptation and the beauty of biodiversity the book serves as both a celebration and a philosophical meditation on the interconnectedness of all living things giving readers insights into

the Victorian scientific context that shaped these explorations Philip Henry Gosse 1810 1888 was a pioneering naturalist writer and an early proponent of the idea that science and art can coexist harmoniously His rich background in marine biology and his devoutly religious upbringing significantly influenced his perspective on nature and its inherent mysteries By marrying empirical observation with aesthetic appreciation Gosse sought to inspire a sense of wonder about the natural world that was becoming increasingly threatened by industrialization This remarkable work is highly recommended for anyone fascinated by natural history literature or the philosophical implications of scientific discovery Gosse s ability to convey complex ideas through accessible language renders this book a timeless treasure encouraging readers to reflect on their own relationship with the environment

**The Romance of Natural History ... Seventh Edition** Philip Henry Gosse, 1866 Romance of Natural History Charles Wilkins Webber, 1852 **Fairy Tales, Natural History and Victorian Culture** Laurence Talairach-Vielmas, 2015-12-04 Fairy Tales Natural History and Victorian Culture examines how literary fairy tales were informed by natural historical knowledge in the Victorian period as well as how popular science books used fairies to explain natural history at a time when nature became a much debated word **Autobiography and Natural Science in the Age of Romanticism** Bernhard Kuhn, 2016-04-15 Set against the backdrop of a rapidly fissuring disciplinary landscape where poetry and science are increasingly viewed as irreconcilable and unrelated Bernhard Kuhn s study uncovers a previously ignored fundamental connection between autobiography and the natural sciences Examining the autobiographies and scientific writings of Rousseau Goethe and Thoreau as representative of their ages Kuhn challenges the now entrenched thesis of the two cultures Rather these three writers are exemplary in that their autobiographical and scientific writings may be read not as separate or even antithetical but as mutually constitutive projects that challenge the newly emerging boundaries between scientific and humanistic thought during the Romantic period Reading each writer s life stories and nature works side by side as they were written Kuhn reveals the scientific character of autobiographical writing while demonstrating the autobiographical nature of natural science He considers all three writers in the context of scientific developments in their own times as well as ours showing how each one marks a distinctive stage in the growing estrangement of the arts and sciences from the self assured epistemic unity of Rousseau s time to the splintering of disciplines into competing ways of knowing under the pressures of specialization and professionalization during the late Romantic age of Thoreau His book thus traces an unfolding drama in which these writers and their contemporaries each situated in an intellectual landscape more fragmented than the last seek to keep together what modern culture is determined to break apart **Natural History Societies and Civic Culture in Victorian Scotland** Diarmid A. Finnegan, 2016-09-12 The relationship between science and civil society is essential to our understanding of cultural change during the Victorian era Science was frequently packaged as an appropriate form of civic culture inculcating virtues necessary for civic progress In turn civic culture was presented as an appropriate context for enabling and supporting scientific progress Finnegan s

study looks at the shifting nature of this process during the nineteenth century using Scotland as the focus for his argument. Considerations of class, religion, and gender are explored, illuminating changing social identities as public interest in science was allowed even encouraged beyond the environs of universities and elite metropolitan societies. Bulletin of the Cleveland Museum of Natural History, 1922 **The Natural History of Sexuality in Early America** Greta

LaFleur, 2020-08-04 How natural history made sex scientific in the eighteenth century. If sexology, the science of sex, came into being sometime in the nineteenth century, then how did statesmen, scientists, and everyday people make meaning out of sex before that point? In *The Natural History of Sexuality in Early America*, Greta LaFleur demonstrates that eighteenth-century natural history, the study of organic life in its environment, actually provided the intellectual foundations for the later development of the scientific study of sex. Natural historians understood the human body to be a porous envelope eminently vulnerable to its environment. Yet historians of sexuality have tended to rely on archival evidence of genital-based or otherwise bodily sex acts for source material. Through careful readings of both elite natural history texts and popular print forms that circulated widely in the British North American colonies, among them Barbary captivity, execution, cross-dressing, and anti-vice narratives, LaFleur traces the development of a broad knowledge of sexuality defined in terms of the dynamic relationship between the human and the natural, social, physical, and climatic milieu. At the heart of this book is the question of how to produce a history of sexuality for an era in which modern vocabularies for sex and desire were unavailable. LaFleur demonstrates how environmental logic was used to explain sexual behavior on a broad scale, not just among the educated elite who wrote and read natural historical texts. LaFleur reunites the history of sexuality with the history of race, demonstrating how they were bound to one another by the emergence of the human sciences. Ultimately, *The Natural History of Sexuality in Early America* not only rewrites all dominant scholarly narratives of eighteenth-century sexual behavior but also poses a major intervention into queer theoretical understandings of the relationship between sex and the subject.

*Romantic Natural History*, Ashton Nichols presents a survey of the relationships between literary works and natural history prior to the release of *On the Origin of Species*, which was written by English naturalist Charles Darwin (1809–1882) and published in 1859. The survey organizes texts, images, and scholarship that link romanticism and natural history in the 100 years prior to Darwin's book. Dialectic of Romanticism, Peter Murphy, David Roberts, 2005-10-01. *Dialectic of Romanticism* presents a radical new assessment of the aesthetic and philosophical history and future of modernity. An exploration of the internal critique of modernism treats romanticism, later historicism, and post-modernism as central to the development of European modernism alongside enlightenment and, like the enlightenment, subject to its own dead ends and fatalities. An external critique of modernism recovers concepts of civilization and civic aesthetics which are trans-historical, simultaneously modern and classically inspired, and provides a counter both to romantic historicism and enlightened models of progress. Finally, a retrospective critique of modernism analyses what happens to modernism's romantic, archaic, and

technological futurist visions when they are translated from Europe to America Dialectic of Romanticism argues that out of the European dialectic of romanticism and enlightenment a new dialectic of modernity is emerging in the New World one which points beyond modernism and postmodernism     *Essays on Natural History* Charles Waterton,1871     **A Romance in Natural History** Allan Mazur,2004     *The Annals of Scottish Natural History* John Alexander Harvie-Brown,William Eagle Clarke,1911     **Transactions of the Shropshire Archaeological and Natural History Society** ,1878     *The natural history and scientific book circular* Wesley William and son,1891     *Proceedings - Dorset Natural History and Archaeological Society* Dorset Natural History and Archaeological Society,1912 List of members in each volume
