ages and of medieval attitudes and values on later periods and on the modern world Many artistic political and literary movements have drawn inspiration and sought their roots in the thousand years between 500 and 1500 AD Medieval Christianity and its rich legacy has been the essential background to European culture as a whole Gothic architecture and chivalry were two keys to Romanticism while nationalists including the Nazis looked back to the middle ages to find

emerging signs of national character In literature few myths have been as durable or popular as those of King Arthur stretching from the Dark Ages to Hollywood In *Search of the Holy Grail* is a vivid account of how later ages learnt about and interpreted the middle ages Angels of Desire Jay Johnston,2016-04-08 The idea that the human body consists of subtle bodies psycho spiritual essences can be found in a variety of esoteric traditions This radical form of selfhood challenges the dualisms at the heart of Western discourse mind body divine human matter spirit reason emotion I other *Angels of Desire* explores the aesthetics and ethics of subtle bodies What emerges is an understanding of embodiment not exclusively tied to materiality The book examines the use of subtle bodies across a range of traditions yogic tantric theosophical hermetic and sufi *Angels of Desire* shows the relevance of the subtle body for religion philosophy art history and contemporary feminist religious studies and theories of desire *Crafting the Woman Professional in the Long Nineteenth Century* Kyriaki Hadjiafxendi,Patricia Zakreski,2016-05-13 Over the course of the nineteenth century women in Britain participated in diverse and prolific forms of artistic labour As they created objects and commodities that blurred the boundaries between domestic and fine art production they crafted subjectivities for themselves as creative workers By bringing together work by scholars of literature painting music craft and the plastic arts this collection argues that the constructed and contested nature of the female artistic professional was a notable aspect of debates about aesthetic value and the impact of industrial technologies All the essays in this volume set up a productive inter art dialogue that complicates conventional binary divisions such as amateur and professional public and private artistry and industry in order to provide a more nuanced understanding of the relationship between gender artistic labour and creativity in the period Ultimately how women faced the pragmatics of their own creative labour as they pursued vocations trades and professions in the literary marketplace and related art industries reveals the different ideological positions surrounding the transition of women from industrious amateurism to professional artistry **Visual Merchandising** Louisa Iarocci,2017-07-05 Situated at the crossroads of visual culture and consumerism this essay collection examines visual merchandising as both a business and an art It seeks to challenge that scholarly ambivalence that often celebrates the spectacle but denies the agenda of consumerism The volume considers strategies in the imaging of selling from the mid nineteenth century to the present in terms of the visual interaction that occurs between the commodity and the consumer and between body and space Under the categories of Promotion Product and Place contributors to the volume examine the strategies in the presentation of retail goods and environments that range from print advertising to product design to store display and architecture *Visual Merchandising The Image of Selling* is located directly at the nexus of business practice and cultural myth where the spectator never loses sight of their status as buyer and the object of desire is always still a commodity
