Romantic Syndrome Toward A New Method In Cultural Anthropology:

The Romantic Syndrome W. T. Jones, 1974-02-28 *The Romantic Syndrome* W. T. Jones, 2014-01-15 *The Romantic Syndrome* William Thomas Jones (philosophe.), 1961 [The Romantic Syndrome](#) W.T. Jones, 2013-04-17 In this age of specialism philosophers like other specialists tend to take in each other's washing Here perhaps imprudently I attempt to break out of this pattern Though I am by profession a philosopher I am addressing primarily not other philosophers but cultural anthropologists sociologists historians of ideas and literary and art critics Thus while there are chapters in this book on metaphysics and political theory I do not ask Is the doctrine in question true which is the kind of question a philosopher might be expected to raise Instead I ask What can we learn from this doctrine about the personality structure of the individual who framed it and about the characteristic drives of the society in which he lived My reasons for asking and for trying to answer this kind of question instead of the usual philosophical question are as follows Though the material products of culture and the overt behavior patterns of societies have long been objects of scientific study the most characteristic products of high cultures artistic productions like poems and paintings and theoretical structures like metaphysical and scientific theory have not as readily yielded to exact description and analysis Not of course that there is not a very extensive discussion of these matters But most of it is carried on in terms that are regrettably vague *'Romantic' and Its Cognates* Hans Eichner, 1972-12-15 Ever since the word romantic and its many cognates in European languages began to be used as technical terms towards the end of the eighteenth century the quest for a satisfactory definition of their meanings has continued unabated This collection of essays traces the history of the word in the major European languages showing how romantic and its cognates were first introduced how their usage spread and their connotations proliferated and how their present usage became established This book opens with an introduction by the editor followed by an essay in which Professor Raymond Immerwahr Chairman of the Department of German University of Western Ontario shows how romantic and its cognates became fashionable in England France and Germany and traces the extension of the meanings of these words up to 1790 The story is then taken up in individual essays on the history of the word and its cognates in the major European countries in Germany by the editor in England by Professor George Whalley FRSC of the Department of English Queen's University Kingston in France by Professor Maurice Z Shroder of the Department of French Barnard College Columbia University in Italy by Professor Olga Ragusa of the Department of Italian Columbia University in Spain by Professor Donald L Shaw of the Department of Hispanic Studies University of Edinburgh in Scandinavia by Professor P M Mitchell of the Department of Germanic Languages and Literature University of Illinois and in Russia by Professor Sigrid McLaughlin of the Department of Slavic Studies University of California at Santa Cruz The final essay by H H H Remak Professor of German and Comparative Literature at the University of Indiana reports on trends of recent research on West European romanticism and suggests fruitful avenues for further exploration The book will be of immense value to students and specialists interested in

literary linguistic and cultural aspects of romanticism and to those concerned with comparative literature and the history of ideas Hans Eicner taught at Queen s University Kingston from 1950 to 1967 when he was appointed Professor and Chairman of German University of Toronto Among his published books are Thomas Mann Eine Einf hrung in sein Werk Friedrich Schlegel Literary Notebooks 1797 1801 Reading German for Scientists Kritische Friedrich Schlegel Ausgabe in four volumes Four Modern German Authors Mann Rilke Kafka Brecht In 1967 he was elected a Fellow of the Royal Society of Canada

The Subjective Eye Richard Valantasis, Deborah J. Haynes, James D. Smith, Janet F. Carlson, 2006-05-15 One of the great joys of the academic life is to pay homage in a Festschrift to a scholar who has influenced both colleagues and students over years of interaction and friendship both professional and personal This volume honors a scholar and theologian of historical theology a theorist and a practitioner of religion and the arts and a keen analyst of cultural trends both ancient and modern Margaret R Miles s prodigious production as a scholar has legendary qualities Her dozen plus books alone explore history patristics ancient philosophy art and art history spiritual formation and religious practice critical theory film ethics and values personal growth gender and women s studies as well as her true academic loves Augustine and Plotinus The breadth and depth of her own work and her influence upon others demands an expansive volume which the editors of this Festschrift unfortunately had to restrict to four categories Historical Theology Religion and Culture Religion and Gender and Religion and the Visual Arts in order to capture the heart of our appreciation for her from the Introduction Irony and Authority in Romantic Poetry David Simpson, 1979-06-17 *Christian Life and Practice* Owen C. Thomas, 2009-01-01 This book is a study of the Christian life and the practice of Christians and the church from an Anglican perspective It begins with an analysis and explication of the structure and process of the Christian life before God in the church and the world involving a five fold rule of life and the relation of this to spiritual direction This is followed by an analysis and critique of the current spirituality movement which arose in the 1970s and which has come to dominate and mislead the churches A sequel to the latter explains the origin of the spirituality movement in the current Romantic movement that arose in the 1960s and has influenced all aspects of our culture with ambiguous results Next there is a critique of contemporary parish ministry as practiced in residential parishes that at best ministers only to the private lives of its members followed by a fictional story of such a residential parish that suggests a new departure in parish ministry Then there is a critique of preaching in the Episcopal Church that is generally considered to be poor and a proposal of a way to overcome this The concluding three chapters treat a fundamental problem in our approach to private prayer and a way to resolve this a proposal for a way to overcome the current impasse in the Anglican Communion concerning homosexuality and a meditation on the responsibility of Christians in public life **Culture and Enchantment** Mark A. Schneider, 1993-12-15 Max Weber viewed modern life as disenchanted an arena from which scientific inquiry had banished magic In contrast Mark Schneider argues intriguingly that enchantment the sense that we are confronted by inexplicable phenomena persists in the world today although it has shifted

from the natural to the cultural arena Culture and Enchantment shows that students of culture today operate in social and intellectual circumstances similar to those of seventeenth century natural philosophers Just as Newton was drawn to alchemy scholars today are fascinated by ghostly and mercurial agents thought to account for the meanings of cultural entities For interpretive disciplines Schneider suggests meaning often behaves as mysteriously as the apparitions pursued by centuries ago by natural philosophers He demonstrates this using two case studies from anthropology Clifford Geertz's description of Balinese cockfights and Yoruba statuary and Claude Levi Strauss's analyses of myths These provide a basis for actively engaging disputes over the meaning and interpretation of culture Culture and Enchantment will appeal to an interdisciplinary audience in anthropology sociology history history and sociology of science culture studies and literary theory Schneider's provocative arguments will make this book a fulcrum in the continuing debate over the nature and prospects of cultural inquiry

The Masses are the Ruling Classes William Epstein, 2017-03-07 The Masses are the Ruling Classes proposes the radical yet seemingly innocuous view that social policy in the United States is determined by mass consent Contemporary explanations of decision making in the US typically attribute power over policy making to a variety of hidden forces and illegitimate elites holding the masses innocent of their own problems Yet the enormous openness of the society and near universal suffrage sustain democratic consent as more plausible than the alternatives conspiracy propaganda usurpation autonomous government and imperfect pluralism Contrary to prevailing explanations government is not either autonomous or out of control business and wealthy individuals have not usurped control of the nation large segments of the population are not dispossessed of the vote or of a voice in public affairs and the media has not formed a conspiracy with Hollywood and liberals to deny Americans their God given freedoms Despite the multitude of problems that the nation faces its citizens are not oppressed In this pithy yet provocative book Epstein argues that Democracy in the United States is not progressive but is instead populist and that the core of the populist ideology is romantic rather than pragmatic

Semiotics and Communication Wendy Leeds-Hurwitz, 1993 Communication is among other things about the study of meaning how people convey ideas for themselves and to one another in their daily lives Designed to close the gap between what we are able to do as social actors and what we are able to describe as social analysts this book introduces the language of semiotics a language that provides some of the words necessary for discussion of these communication issues Presenting the basics of semiotic theory to communication scholars this volume summarizes those aspects most relevant to the study of social interaction in particular signs the smallest elements of meaning in interaction and codes sets of related signs and rules for their use explaining how they come together within cultures Three common social codes food clothing and objects serve as primary examples throughout the book

J. Deane Waldman, MD Mba Deane Waldman, 2010-02 If you work anywhere in healthcare Uproot Healthcare was written to you and about you It answers two constant nagging questions Why does the system I work for make it hard to care for people What can I do to fix my most critically ill patient healthcare If you are not

directly involved in healthcare Uproot Healthcare was written for you The author can give you one guarantee some day you will need healthcare When that day comes you will want a system that provides error free high quality care that you can easily access that we can all afford and that offers better outcomes tomorrow than it does today Uproot Healthcare shows you how to get involved so you can get what you need and want Uproot Healthcare does not offer Waldman's answer another fix that fails or some solution imposed on us from above It provides the foundation for a discussion on healthcare to create a national consensus and for us to make healthcare work for everyone not easily nor quickly but surely

A Marriage of Philosophy and Music Erich Welling, 2014-04 How to use philosophy and music to open your horizons and enjoy being yourself put theory to work and help you experience personal growth is discussed in A Marriage of Philosophy and Music It is all about after After having a liberal education you are comfortable in modern culture and after further education and becoming a specialist in some field you enjoy using your skills We learn the ideas and methods of many social cultures and our own chosen specialty but we often neglect the liberal art of disciplining and enjoying the ideas and methods of our own individuality This book offers a path toward the education of privacy with the key words being selection design and beauty The book relates five areas of general human interest spirituality philosophy science art and body awareness The interrelation is accomplished by using personal patterns of experience that are available from philosophy and music Because of the plurality of subject matters and methods used in philosophy and music their patterns of discipline are comparable to self discipline A Marriage of Philosophy and Music attempts to create a path in this direction because besides the enjoyment of social culture and personal skills there is enjoyment in being yourself which is a neglected liberal art

Sciences and Cultures E. Mendelsohn, Y. Elkana, 2012-12-06 Anthropological approaches to the sciences have developed as part of a broader tradition concerned about the place of the sciences in today's world and in some basic sense concerned with questions about the legitimacy of the sciences In the years since the second World War we have seen the emergence of a number of different attempts both to analyze and to cope with the successes of the sciences their broad penetration into social life and the sense of problem and crisis that they have projected Among the of movements concerned about the earlier responses were the development social responsibility of scientists and technological practitioners There is little doubt that this was a direct outgrowth of the role of science in the war epitomized by the successful construction and catastrophic use of the atomic bomb The recognition of the deep social utility of science and especially its role as an instrument of war fostered curiosity about the earlier development of scientific disciplines and institutional forms The history of science as an explicit discipline with full time practitioners can be seen as an attempt to locate science in temporal space first in its intellectual form and secondly in its institutional or social form The sociology of science while certainly having roots in the pre war work of Robert K

Asian Medical Systems Charles M. Leslie, 1998 Asian Medical Systems provide fascinating opportunities to observe directly practices that continue ancient scientific modes of thought and to analyse the historical processes that mediate their relationship to modern science and technology Three great traditions of medical science evolved during antiquity in the Chinese Indian and Mediterranean civilizations all based on humoral conceptions of health and illness Folk curers throughout the world continue to practice humoral medicine but in Asia along educated physicians maintain its learned traditions Thus in these societies the great and little traditions of humoral medicine coexist with cosmopolitan medicine which draws upon modern science and modes of professional organization This volume has been designed to show how research on Asian medicine opens a new field of scholarship the comparative study of medical systems Such a book requires the skills of authors with many kinds of training and those who have contributed essays to this volume are trained in history sociology anthropology public health pharmacology epidemiology cosmopolitan medicine and philosophy

The Work of Art Michael D. Jackson, 2016-10-25 How are we to think of works of art Rather than treat art as an expression of individual genius market forces or aesthetic principles Michael Jackson focuses on how art effects transformations in our lives Art opens up transitional ritual or utopian spaces that enable us to reconcile inward imperatives and outward constraints thereby making our lives more manageable and meaningful Art allows us to strike a balance between being actors and being acted upon Drawing on his ethnographic fieldwork in Aboriginal Australia and West Africa as well as insights from psychoanalysis religious studies literature and the philosophy of art Jackson deploys an extraordinary range of references from Bruegel to Beuys Paleolithic art to performance art Michelangelo to Munch to explore the symbolic labor whereby human beings make themselves both individually and socially out of the environmental biographical and physical materials that affect them a process that connects art with gestation storytelling and dreaming and illuminates the elementary forms of religious life
