Studies Between the eleventh and thirteenth centuries Venice transformed itself from a struggling merchant commune to a powerful maritime empire that would shape events in the Mediterranean for the next four hundred years In this magisterial new book on medieval Venice Thomas F Madden traces the city state s extraordinary rise through the life of Enrico Dandolo c 1107 1205 who ruled Venice as doge from 1192 until his death The scion of a prosperous merchant family deeply involved in politics religion and diplomacy Dandolo led Venice s forces during the disastrous Fourth Crusade 1201 1204 which set out to conquer Islamic Egypt but instead destroyed Christian Byzantium Yet despite his influence on the course of Venetian history we know little about Dandolo and much of what is known has been distorted by myth The first full length study devoted to Dandolo s life and times Enrico Dandolo and the Rise of Venice corrects the many misconceptions about him that have accumulated over the centuries offering an accurate and incisive assessment of Dandolo s motives abilities and achievements as doge as well as his role and Venice s in the Fourth Crusade Madden also examines the means and methods by which the Dandolo family rose to prominence during the preceding century thus illuminating medieval Venice s singular political social and religious environment Culminating with the crisis precipitated by the failure of the Fourth Crusade Madden s groundbreaking work reveals the extent to which Dandolo and his successors became torn between the anxieties and apprehensions of Venice s citizens and its escalating obligations as a Mediterranean power [Paperbound Books in Print](#)

Twelve Future Acts of Napeoleon III. Michael Paget BAXTER,1872 [The History and Future of Technology](#) Robert U. Ayres,2021-07-27 Eminent physicist and economist Robert Ayres examines the history of technology as a change agent in society focusing on societal roots rather than technology as an autonomous self perpetuating phenomenon With rare exceptions technology is developed in response to societal needs that have evolutionary roots and causes In our genus Homo language evolved in response to a need for our ancestors to communicate both in the moment and to posterity A band of hunters had no chance in competition with

predators that were larger and faster without this type of organization which eventually gave birth to writing and music The steam engine did not leap fully formed from the brain of James Watt It evolved from a need to pump water out of coal mines driven by a need to burn coal instead of firewood in turn due to deforestation Later the steam engine made machines and mechanization possible Even quite simple machines increased human productivity by a factor of hundreds if not thousands That was the Industrial Revolution If we count electricity and the automobile as a second industrial revolution and the digital computer as the beginning of a third the world is now on the cusp of a fourth revolution led by microbiology These industrial revolutions have benefited many in the short term but devastated the Earth's ecosystems Can technology save the human race from the catastrophic consequences of its past success That is the question this book will try to answer The Tarragona Vortex Lawrence J. McCrank, 2022-09-30 This extensive bibliographic essay underpins the entire Tarragona Vortex study by focusing on this arena as one of the most contested frontiers in Western history comparable to Jerusalem in the East for broad issues of Romanization Westernization Islamization and Christianization Its book length chapters treat 1 diverse historiographies from local and Spanish to comparative Mediterranean and Crusade History and especially Ethno historiography and the explanatory concept of frontiers 2 the phenomena of religion conversion and reform and the conditioning agents of Islam and Latin Christianity in practice and adversity 3 religious universalism and violence especially religious war 4 the Crusade and Reconquest paradigms and century long debate 5 the environment on land and sea and setting for this History Although these themes are explored to include due reconsideration but avoid major digressions in its telling about Tarragona and the Tarraconensis they underly so much of Late Antique and Medieval historical research that this discussion pertains to the whole field of historical cultural and religious studies **Rome in America** Haein Park, 2005
