EU Counter-Terrorism and Intelligence Javier Argomaniz, Oldrich Bures, Christian Kaunert, 2017-10-02 The Treaty on the European Union stipulates that one of the key objectives of the Union is to provide citizens with a high level of safety within an Area of Freedom Security and Justice Given that the fight against terrorism is a prominent aspect of this general objective it is remarkable that in spite of its political relevance and decade long history it has only relatively recently received due attention in the academic community Yet an analysis of the successes and failures of the EU s involvement in this field is imperative and this is a particularly pertinent moment to take stock of progress The goal of this book is therefore to look back at the post 9 11 period and answer the question of whether when it comes to the measures taken to combat terrorism

following these attacks the EU has lived up to the promise made in its founding treaties In pursuing this goal this volume presents the views of leading experts casting a critical eye over the EU s performance recognising achievements but also being suitably critical when the realities did not match the European rhetoric In doing this the book makes a significant contribution not only to the scholarly investigation of European Union policies but also to the study of counter terrorism in general This book was published as a special issue of Intelligence and National Security

Militancy and Violence in West Africa James Gow, Funmi Olonisakin, Ernst Dijxhoorn, 2013-07-18 This volume provides a systematic and cross regional analysis of radicalisation militancy and violence in West Africa Concern about terrorism in or from West Africa has been recognised in academic research and the adoption of militarised approaches to addressing it questioned However the basis for that questioning the need to investigate factors such as the historical and socio economic roots of militancy is not developed nor is it substantiated in existing studies The significant impact of religiously motivated radicalisation and violence in West Africa upon international security makes it essential to understand the issues of militancy and violence in the region In this volume the authors draw upon empirical research in West Africa to develop understanding in these areas Over the course of several chapters written by leading experts in the field the book successfully blends historical and conceptual analysis with new empirical research gathered from focus group discussions and research interviews Each of these core studies is structured around five interrelated issues tracing the antecedents of radicalisation monitoring trends identifying actors anticipating possibilities and analysing the strength of existing preventive mechanisms This book will be of much interest to students of African security African politics radicalisation political Islam war and conflict studies and security studies in general

US Counter-terrorism Strategy and Al-Qaeda Joshua A. Geltzer, 2009-09-10 This book examines the communicative aspects and implications of US counter terrorist policies towards al Qaeda Recent US counter terrorist strategy has been largely based upon projecting certain perceptions of America as an actor to those drawn to al Qaeda and this book investigates in what ways and to what extent US officials believed that the signals sent by what America did and said could influence the

behaviour of the terrorist and would be terrorist The study then draws on a growing understanding of that audience to analyse how those drawn to al Qaeda were and indeed still are likely to be influenced by the perceptions of America that Washington's policies generated The study's central argument is that given al Qaeda's unconventional strategy and the particularities of the world view characterising those drawn to the group America's counter terrorist signalling proved largely counter productive to America's objective of undermining al Qaeda's strategic narrative instead serving in many ways to validate it Firstly this book seeks to reveal the significant and largely unexplored role that signalling has played in US counter terrorist policy towards al Qaeda Second it tries to capture the objectives strategy tactics ideology and other defining features of the world view characterising those drawn to al Qaeda Third it strives to combine those two lines of inquiry by applying the al Qaeda world view to a critical analysis of the signals sent by US policies Finally the book aims to offer broad policy implications that demonstrate how an informed understanding of the world view of those drawn to al Qaeda can be employed to revise and refine American counter terrorist signalling This book will be of much interest to students of US foreign policy and public diplomacy counter terrorism strategy and international security Joshua Alexander Geltzer has a PhD in War Studies from Kings College London and is currently a juris doctoral student at Yale Law School

Terrorism in the Cold War Adrian Hänni, Thomas Riegler, Przemyslaw Gasztold, 2020-09-17 Accounts of the relationships between states and terrorist organizations in the Cold War era have long been shaped by speculation a lack of primary sources and even conspiracy theories In the last few years however things have evolved rapidly Using a wide range of case studies including the KGB's Abduction Program Polish Military Intelligence and North Korea's Terrorism and Counterterrorism this book sheds new light on the relations between state and terrorist actors allowing for a fresh and much more insightful assessment of the contacts dealings agreements and collusion with terrorist organizations undertaken by state actors on both sides of the Iron Curtain This book presents the current state of research and provides an assessment of the nature motives effects and major historical shifts of the relations between individual states and terrorist organizations The articles collected demonstrate that these state terrorism relationships were not only much more ambiguous than much of the older literature had suggested but are in fact crucial for the understanding of global political history in the Cold War era

Control of Violence Wilhelm Heitmeyer, Heinz-Gerhard Haupt, Stefan Malthaner, Andrea Kirschner, 2010-11-04 The Control of Violence in Modern Society starts from the hypothesis that in modern society we will face an increasing loss of control over certain phenomena of violence This leads to unpredictable escalations and violence can no longer be contained adequately by the relevant control regimes such as police state surveillance institutions national repression apparatuses and international law However before investigating this hypothesis from an internationally and historically comparative perspective the terms and tools for this undertaking have to be rendered more precisely Since both control and violence are all but clear cut terms but rather highly debatable and contested concepts that may take multiple connotations The main question is whether an increase in certain

forms of violence can be explained by the failure or in turn overeffectiveness of certain control mechanisms It is asked for instance which contribution religion can make to limit violence and in turn which destructive potential religion might have in its fundamentalist form Moreover the concept of individual self control as well as social institutions and strategies of collective disengagement and de radicalization are investigated with regard to their potential for controlling violence The Control of Violence in Modern Society concludes with a re examination of the hypothesis of a loss of control by specifying in what cases and under which circumstances we can speak of a loss of control over violence

International Political Psychology Anna Cornelia Beyer, 2016-11-16 This book intends to harvest insights from the discipline of Psychology in its broad understanding for application to International Relations Although Psychology offers an abundance of theories that are useful for this purpose they have so far remained largely untapped In chapters on conflict hegemony terrorism mental health global consciousness and peace proposals Byer provides a synthesis of these two complimentary disciplines This innovative volume presents the first contribution to the new discipline of International Political Psychology

Terrorism and the State Kieran McConaghy, 2017-08-22 This book investigates the ways in which the particular nature and character of the state can impact upon the effectiveness of counter terrorism efforts and on the trajectory of violent conflicts Here McConaghy not only analyses historical campaigns of terrorism and the response of states to them but also highlights how factors such as emotion intra state cooperation communication and competition have all served to shape conflicts in the past This volume explains what the ramifications of these factors are for academics studying political violence for state elites with counter terrorism responsibility and for individuals or organizations who use violence to achieve their political goals

The Business of Martyrdom Jeffrey W Lewis, 2012-04-15 The Business of Martyrdom is the only comprehensive history of suicide bombing from its origins in Imperial Russia to the present day It makes use of a framework from the history and philosophy of technology to explain the diffusion and evolution of suicide bombing over the past several decades It is primarily a work of synthesis meant to reach a broad audience and endeavors to integrate as much of the recent scholarly literature as possible including reconciling explanatory mechanisms that seem to be at odds with one another In addition this book is able to draw on very recent changes in suicide bombing in the years 2008 2010 that allow it to have a slightly different perspective than earlier studies For the first time the global number of suicide attacks has declined significantly for three years in a row This book therefore has the advantage of addressing the phenomenon of suicide bombing as a bounded phenomenon with limits to its growth and diffusion To this point the impression that suicide bombers are the smartest bombs yet created has been widespread but confined to the area of metaphor Drawing well established ideas from the history of technology The Business of Martyrdom argues that the metaphor should be taken literally Suicide bombing is a technology that has been invented and re invented at different times in different areas but always for the same purpose resolving a mismatch in military capabilities between antagonists by utilizing the available cultural and human resources Over the past several years analysts have

produced a large number of monographs and articles examining suicide bombing. The best contributions in this new and growing literature have shed considerable light on the complexity of suicide bombing in practice particularly regarding the structure of the organizations that deploy suicide bombers and the relationships between these organizations and the recruits whom they utilize in their attacks. Nevertheless nagging inconsistencies and questions remain. These inconsistencies can be explained by examining suicide bombing as a technological system that integrates human beings, cultures and devices and directs them toward specific ends. Such an analysis requires that neither the individual bombers nor their sponsoring organizations be the basic unit of discussion. Instead the bombers must be understood as components within a much larger system that has been shaped by a host of social, cultural and operational constraints throughout its existence. Integrating insights from the historical analysis of other technological systems with the recent literature specifically devoted to suicide bombing therefore allows *The Business of Martyrdom* to develop a fuller understanding of suicide bombing as a unified yet diverse phenomenon.

The BRICs Superpower Challenge Kwang Ho Chun, 2016-03-23 In an imaginative and interesting way Kwang Ho Chun seeks to capture the dynamics of the changing international system and the prospects for a change in the international distribution of power. The idea that new superpowers could rise and that some of the BRICs (Brazil, Russia, India and China) could be such superpowers is particularly intriguing and the main idea explored in this study. In line with neo realist approaches this book argues that in a unipolar world competitors will rise to challenge the global hegemon. As the power profiles of the BRICs rise and they gain greater control of geo global politics they are likely to attain significant regional dominance among other regional powers although their underdeveloped tradition of hard power and internal challenges could prevent them from gaining superpower status. This book captures the dynamics of the changing international system and the prospects for a change in the international distribution of power.

Boko Haram Ojo Cheneji J. David, Lucky E. Asuelime, Hakeem Onapajo, 2015-06-25 This book investigates the socio economic determinants of the emergence and persistence of Boko Haram terrorism in Nigeria. Since 2009 Boko Haram continues to capture mainstream news headlines as well as the imagination of aspiring young Salafi jihadists around the world who support the notion of a radical Islamist socio political system. By providing an essential overview of the literature on Boko Haram and bridging research and current events the authors cover a broad spectrum of topics and suggest relevant policies for addressing the problem of Boko Haram terrorism. While Boko Haram's motivations are ostensibly religious the primary focus is on socio economic inequality as one of the main factors that predispose the disillusioned, poverty driven and jobless populace in the northern regions of Nigeria to take up arms against the state. The insights presented in this book will help researchers and policy makers alike to understand the

emergence of locally focused terrorist groups and insurgencies *Theories of Terrorism* Murat Haner, Melissa M. Sloan, 2021-09-29 *Theories of Terrorism* explains and advances the major theories of terrorism that address issues of becoming a terrorist being a terrorist and leaving terrorism in a clear and accessible format Readers will gain an understanding of the most promising explanations of terrorism that have been developed to date and how they can be used to explore core substantive issues related to the topic The content is delivered with a scholarly depth though still accessible by students at different levels The book offers explanations from prominent scholars for the three phases of radicalization covering emerging topics such as women s involvement in terrorism fear of terrorism the code of the terrorist and suicide terrorism This is the first book in the *Advances in Criminological Theory* series to address the issue of terrorism and emphasizes the use of theory to direct research development in the future The style and content coverage of the book make it appropriate as a supplemental text in undergraduate courses on terrorism and political violence The inclusion of current empirical literature and guidance for future research efforts gives the text appeal for graduate students and academics in the disciplines of criminology criminal justice political science sociology and interdisciplinary terrorism studies The emphasis on theory and the radicalization process throughout the text will also make the book useful as a reference for general graduate level theory courses within these areas
