Christopher Herbert,2018-11-13 The mid nineteenth century gold rushes bring to mind raucous mining camps and slapped together cities populated by carousing miners gamblers and prostitutes Yet many of the white men who went to the gold fields were products of the Victorian era educated men who valued morality and order Examining the closely linked gold rushes in California and British Columbia historian Christopher Herbert shows that these men worried about the meaning of their manhood in the near anarchic ethnically mixed societies that grew up around the mines As white gold rushers emigrated west they encountered a wide range of people they considered inferior and potentially dangerous to white dominance including Latin American Chinese and Indigenous peoples The way that white miners interacted with these groups reflected their conceptions of race and morality as well as the distinct political principles and strategies of the US and British colonial governments The white miners were accustomed to white male domination and their anxiety to continue it played a central role in the construction of colonial regimes In addition to renovating traditional understandings of the Pacific Slope gold rushes Herbert argues that historians understanding of white manliness has been too fixated on the eastern United States and Britain In the nineteenth century popular attention largely focused on the West It was in the gold fields and the cities they spawned that new ideas of white manliness emerged prefiguring transformations elsewhere **The**

**Lightning** Kathleen Diffley,2021-11 The Fateful Lightning is the second volume of Kathleen Diffley's trilogy on Civil War magazine fiction While her first book of the trilogy Where My Heart Is Turning Ever charted the role of magazine fiction from the Northeast in grounding the rites of citizenship following the end of the Civil War The Fateful Lightning traces the sectional conflicts in a postwar nation and how region shaped the political agendas of these postwar editorials Diffley argues that the journals she examines present stories that give unpredictable results of sectional conflict and commemorate the Civil War differently from the northeastern publishing establishments She weaves this argument through her analysis of four literary journals Baltimore's Southern Magazine Charlotte's The Land We Love Chicago's Lakeside Monthly and San Francisco's Overland Monthly Diffley uses a method of literary analysis that looks at what is not only present in the text but also present throughout its historically informed context gleaning cultural meanings from what the stories also filter out Coupling this literary analysis with city studies Diffley's innovative approach demonstrates how these editorials offer varying gauges of continued political unrest rising social opportunity and conflicting commemorative investments as Reconstruction began to unfold From Acorns to Warehouses Thomas C Patterson,2016-07-01 Thomas C Patterson's large scale history of the Inland Empire of Southern California traces the social political and economic changes in this region from the first Native American settlement 12 000 years ago to the present Framing his discussion of this region in the general growth trajectory of California's socio economic history he is able to connect landscape resources wealth labor and inequality using a Marxian framework for many key periods of the region's history In moving between large scale historical changes regional adaptations and resistance to those changes and a framework that places those responses in theoretical context Patterson's work allows the reader to see how inland Southern California developed into the warehouse empire of the 21st century and its prospects for the future **The Elusive Eden** Richard B. **River City and Valley Life** Christopher J. Castaneda, Lee M.A. Simpson, 2013-12-09. Often referred to as the Big Tomato, Sacramento is a city whose makeup is significantly more complex than its agriculture-based sobriquet implies. In *River City and Valley Life*, seventeen contributors reveal the major transformations to the natural and built environment that have shaped Sacramento and its suburbs, residents, politics, and economics throughout its history. The site that would become Sacramento was settled in 1839 when Johann Augustus Sutter attempted to convert his Mexican land grant into New Helvetia or New Switzerland. It was at Sutter's sawmill, fifty miles to the east, that gold was first discovered, leading to the California Gold Rush of 1849. Nearly overnight, Sacramento became a boomtown, and cityhood followed in 1850. Ideally situated at the confluence of the American and Sacramento Rivers, the city was connected by waterway to San Francisco and the surrounding region. Combined with the area's warm and sunny climate, the rivers provided the necessary water supply for agriculture to flourish. The devastation wrought by floods and cholera, however, took a huge toll on early populations and led to the construction of an extensive levee system that raised the downtown street level to combat flooding. Great fortune came when local entrepreneurs built the Central Pacific Railroad, and in 1869 it connected with the Union Pacific Railroad to form the first transcontinental passage. Sacramento soon became an industrial hub and major food processing center. By 1879 it was named the state capital and seat of government. In the twentieth century, the Sacramento area benefitted from the federal government's major investment in the construction and operation of three military bases and other regional public works projects. Rapid suburbanization followed along with the building of highways, bridges, schools, parks, hydroelectric dams, and the Rancho Seco nuclear power plant, which activists would later shut down. Today, several tribal gaming resorts attract patrons to the area, while Old Sacramento revitalizes the original downtown as it celebrates Sacramento's pioneering past. This environmental history of Sacramento provides a compelling case study of urban and suburban development in California and the American West. As the contributors show, Sacramento has seen its landscape both ravaged and reborn. As blighted

areas rail yards and riverfronts have been reclaimed and parks and green spaces created and expanded Sacramento's identity continues to evolve As it moves beyond its Gold Rush Transcontinental Railroad and government town heritage Sacramento remains a city and region deeply rooted in its natural environment

**Chinese Diaspora Archaeology in North America** Chelsea Rose, J. Ryan Kennedy, 2020-04-08 Showcasing the enormous amount of archaeological data available on the experiences of Chinese people who migrated to the United States and Canada in the nineteenth century this volume charts new directions for the field of Chinese diaspora archaeology by providing fresh more nuanced approaches to interpreting immigrant life

*Pasadena Before the Roses* Yvette J. **American Heathens** Joshua Paddison, 2012-06-01 In the 19th century debate over whether the United States should be an explicitly Christian nation California emerged as a central battleground Racial groups that were perceived as godless and uncivilized were excluded from suffrage and evangelism among Indians and the Chinese was seen as a politically incendiary act Joshua Paddison sheds light on Reconstruction's impact on Indians and Asian Americans by illustrating how marginalized groups fought for a political voice refuting racist assumptions with their lives words and faith Reconstruction he argues was not merely a remaking of the South but rather a multiracial and multiregional process of reimagining the nation
