Oliner, Lawrence Baron, Lawrence Blum, 1995-07 All but buried for most of the twentieth century the concept of altruism has re emerged in this last quarter as a focus of intense scholarly inquiry and general public interest In the wake of increased consciousness of the human potential for destructiveness both scholars and the general public are seeking interventions which will not only inhibit the process but may in fact chart a new creative path toward a global community Largely initiated by a group of pioneering social psychologists early questions on altruism centered on its motivation and development primarily in the context of contrived laboratory experiments Although publications on the topic have been considerable over the last several years and now represent the work of representatives from many disciplines of inquiry this volume is distinguished from others in several ways Embracing the Other emerged primarily as a response to recent research on an extraordinary manifestation of real life altruism namely to recent studies of non Jewish rescuers of Jews during World War II It is the work of a multi disciplinary and international group of scholars including philosophers social psychologists historians sociologists and educators challenging several prevailing conceptual definitions and motivational sources of altruism The book combines both new empirical and historical research as well as theoretical and philosophical approaches and includes a lengthy section addressing the practical implications of current thinking on altruism for society at large The result is a multi textured work addressing critical issues in varied disciplines while centered on shared themes **Handbook of Children's Religious Education** Donald Ratcliff, 2008-05-22 Handbook of Children s Religious Education is a thorough and comprehensive treatment of the religious education of children ages six to twelve It covers virtually all the basic information that childhood educators need to know in order to be effective teachers and communicators **Advances in Clinical Child Psychology** Benjamin Lahey, 2013-11-11 The present volume has been prepared during the International Year of the Child Designation of a special year devoted to children underscores the widespread recognition of the importance of scientific advances and humane concern over the welfare of children Clinical child psychology the topic of the present serial publication is especially important in recognition of the year of the child

Clinical child psychology at once combines areas of basic and applied research. The subject matter is concerned with understanding the nature of child development and the many influences upon which such development depends. Moreover, the clinical orientation emphasizes the extension of this research to topics that directly affect the welfare of children and adolescents. *Advances in Clinical Child Psychology* publishes scholarly reviews and evaluations of many different areas of research and application. In the current volume, the third in the series, a variety of topics are addressed. These include the development of social behavior, the emergence and modification of sex-typed behavior, family systems, self-help procedures to train parents, assessment of intelligence, childhood obesity, the development and treatment of asthma, pediatric psychology, treatment of severely disturbed children, language development, and education of disadvantaged elementary school students.

The Psychology of Sympathy Lauren Wispé, 2013-03-09. The origins of this book probably go back to Gordon Allport's seminar in social psychology at Harvard during the late 1940s and to the invitation from Gardner Lindzey, some years later, to contribute a section on Sympathy and Empathy to the *International Encyclopedia of the Social Sciences* (1968). Since those early beginnings, the book has been in the process of becoming. During that time, I have benefited greatly from the knowledge and assistance of many colleagues, especially the following who read and commented upon portions of the manuscript: Raymond Gastil, the late Joseph Katz, David McClelland, Jitendra Mohanty, Paul Mussen, Richard Solomon, and Bernard Weiner. To Kenneth Merrill for a close reading of the Hume material and to M. Brewster Smith for a careful reading of and suggestions on Chapters 7 and 8, I am especially indebted. Beverly Joyce withstood constant interruptions to provide much needed library assistance, and Vivian Wheeler gave generously of her excellent editorial experience and knowledge. A fellowship at the Battelle Research Center in Seattle and an appointment as a visiting scholar at Harvard were of incalculable help, providing opportunity, stimulation, and freedom from teaching responsibilities. To all of the above, I am deeply indebted. Just a few words about the organization of this book.

Theories of Development William Crain, 2015-10-02. The result of extensive scholarship and consultation with leading scholars, this text introduces students to twenty-four theorists and compares and contrasts their theories on how we develop as individuals. Emphasizing the theories that build upon the developmental tradition established by Rousseau, this text also covers theories in the environmental learning tradition.

Social Development as Preference Management Rachel Karniol, 2010-04-12. Karniol engagingly presents social development in children through the language of preference management. Conversational excerpts garnered from around the world trace how parents talk about preferences, how infants and children's emergent language conveys their preferences, how children themselves are impacted by others' preferences, and how they in turn influence the preferences of adults and peers. The language of preferences is used to crack into altruism, aggression, and morality, which are ways of coming to terms with other people's preferences. Behind the scenes is a cognitive engine that uses transformational thought, conducting temporal, imaginal, and mental transformations to figure out other people's preferences and to find more sophisticated means of

outmanoeuvring others by persuading them and playing with one's own mind and other people's minds when preferences are blocked This book is a unique and sometimes amusing must read for anyone interested in child development language acquisition socialisation and communication **Psychological Development From Infancy** Marc H. Bornstein, William Kessen, 2017-12-12 Originally published in 1979 this volume represented a unique attempt to connect the usually separated fields of infancy studies and studies of older children In each chapter eminent research workers attempt to cross the theoretical empirical and methodological barriers that had traditionally separated the study of preverbal infants from the study of verbal children and adults at the time These completely new and original contributions traced the developmental links between birth and conversation within three major categories perceptual cognitive and language development Although the chapters range from reports of well defined research areas to theoretical propositions the aim throughout was to relate the events of the first year of life to the child's later perceptual and cognitive activity This book will still be of interest for all concerned with child development and related areas in that it demonstrates the remarkable range of observations about infants brought under a single guiding set of questions about continuity stability and the sources of change during and after the first year of life **Handbook of Moral Behavior and Development** William M. Kurtines, Jacob Gewirtz, Jacob L.
