preoccupations facing contemporary organizations their leaders and their workforce As such these papers are representative of many that have contributed to and documented the development of the thought and praxis from a psychoanalytic perspective and systems thinking over the last quarter of century Whilst most of these papers have already been published elsewhere the ISPSO as an organization wished to include them in this volume recognising their lasting influence and legacy as well as their ongoing impact upon the thinking and the practice of its membership and beyond Organizational Learning and the Learning Organization Mark Easterby-Smith, Luis Araujo, John Burgoyne, 1999-04-16 The introduction chapter by Mark Easterby Smith and Luis Araujo introduces the reader to the unresolved issues with which the field is still grappling today All in all this is an interesting and useful book for both researcher and manager alike First and perhaps most importantly the book incorporates multiple perspectives on learning the psychological sociological and the philosophical Second the book is neither purely theory driven nor purely empirically driven Theoretical contributions are complemented by empirical studies which help to illustrate the application of the theoretical constructs I suspect that this would be of immense value to the practicing manager Finally the book provides a critical commentary on the state of the field in a nice compact way which should enhance its value to scholars in this area a book which is both useful and interesting Organizational Studies Most importantly the book incorporates multiple perspectives on learning the psychological sociological and the philosophical provides a critical commentary on the state of the field in a nice compact way which should enhance its value to scholars Organization Studies A valuable resource for academics and practitioners in management and corporate strategy as well as those involved in management training and development European Foundation for Management Development This is a particularly interesting and useful work because it combines some chapters which deal primarily in concepts or indeed theories and others which describe the experiences of trying to carry out the practices involved in creating both either organisational learning and or the learning organisation Industrial and Commercial Training The editors overall assessment is that there has been insufficient dialogue between the two camps of action research and theorizing As a contribution to mapping this divided house the text is an apt illustration of these problems The editor's overview is of interest Stephen Gibb University of Strathclyde MCB University Press The debates surrounding concepts of organizational learning and the learning organization receive a welcome synthesis in this book International experts explore the links between the two fields of enquiry which hitherto despite their intersecting concerns have represented separate constituencies literatures and perspectives The book provides a much needed integrated framework of concepts and theories which draws on current insights from management cognition theories of knowledge and learning management practice and work psychology
