**Conservation of Modern Architecture** Susan Macdonald, Kyle C. Normandin, Bob Kindred, 2015-12-08 The importance of protecting significant buildings from decay and destruction would seem to be undeniable Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference and in some cases hostility towards many important post war buildings These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time Climate change in particular has forced change in the way in which we think about buildings with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike

**Trajectories in Architecture** Michael Jasper, 2023-04-21 *Trajectories in Architecture* Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date *Trajectories in Architecture* adds to scholarship and expands our

understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture's traditions and design principles and their future expression Trajectories in Architecture includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei

**Louis I. Kahn**, 1991 **Louis Kahn** John Lobell, 2020-06-30 For everyone interested in the enduring appeal of Louis Kahn this book demonstrates that a close look at how Kahn put his buildings together will reveal a deeply felt philosophy Louis I Kahn is one of the most influential and poetic architects of the twentieth century a figure whose appeal extends beyond the realm of specialists In this book noted Kahn expert John Lobell explores how Kahn's focus on structure respect for materials clarity of program and reverence for details come together to manifest an overall philosophy Kahn's work clearly conveys a kind of transcendent rootedness a rootedness in the fundamentals of architecture that also asks soaring questions about our experience of light and space and even how we fit into the world In Louis Kahn Architecture as Philosophy John Lobell seeks to reveal how Kahn's buildings speak to grand humanistic concerns Through examinations of five of Kahn's great buildings the Richards Medical Research Building in Philadelphia the Salk Institute for Biological Studies in La Jolla the Phillips Exeter Academy Library in New Hampshire the

Kimbell Art Museum in Fort Worth and the Yale Center for British Art in New Haven Lobell presents a clear but detailed look at how the way these buildings are put together presents Kahn's philosophy including how Kahn wishes us to experience them An architecture book that touches on topics that addresses the universal human interests of consciousness and creativity Louis Kahn Architecture as Philosophy helps us understand our place and the nature of well being in the built environment

**The Embodied Image** Juhani Pallasmaa, 2011-05-16 The Embodied Image The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel

Libeskind      **Learning from Failure in the Design Process** Lisa Huang, 2020-04-03 Learning from Failure in the Design Process shows you that design work builds on lessons learned from failures to help you relax your fear of making mistakes so that you're not paralyzed when faced with a task outside of your comfort zone. Working hands-on with building materials such as concrete, sheet metal, and fabric, you will understand behaviors, processes, methods of assembly, and ways to evaluate your failures to achieve positive results. Through material and assembly strategies of stretching, casting, carving, and stacking, this book uncovers the issues, problems, and failures confronted in student material experiments and examines built projects that addressed these issues with innovative and intelligent strategies. Highlighting numerous professional practice case studies with over 250 color images, this book will be ideal for students interested in materials and methods and students of architecture in design studios.

**Architects Process Inspiration** Robert Joyce, Rossana Santos, Laura Turlington, 1997 The focus of *Perspecta 28* is the architect's persona. The essays concentrate on the role that personal vision plays in the process of perceiving, transforming, and building a world outside of oneself.      *Louis I. Kahn*, 1991      **Louis Kahn** Louis I. Kahn, 2003 This unique anthology draws from Louis Kahn's speeches, essays, and interviews, some never previously published, to capture the evolution and central tenets of the influential American architect, thinking from his early work of the 1940s to his death in 1974. Professor Twombly's introduction and headnotes offer incisive commentary on the texts.

**The Urbanism of Frank Lloyd Wright** Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city. Stunningly comprehensive, *The Urbanism of Frank Lloyd Wright* presents a radically new interpretation of the architect's work and offers new and important perspectives on the history of modernism. Neil Levine places Wright's projects produced over more than fifty years within their historical, cultural, and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century. Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City. Rather, Levine reveals Wright's larger, more varied, interesting, and complex urbanism demonstrated across the span of his lengthy career. Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods, mainly in Chicago, and continuing through projects from the 1920s through the 1950s for commercial, mixed-use, civic, and cultural centers for Chicago, Madison, Washington, Pittsburgh, and Baghdad, Levine demonstrates Wright's place among the leading contributors to the creation of the modern city. Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis. Lavishly illustrated with drawings, plans, maps, and photographs, this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives. *The Urbanism of Frank Lloyd Wright* will serve as one of the most important books on the architect for years to come.
