Scientists: An Epic of Discovery Andrew Robinson,2023-04-25 An intriguing and illuminating read for science buffs those fascinated by the lives and minds of great men and women and anyone curious about how we came to understand the physical world The ideas experiments and inventions of great scientists have revolutionized our understanding of the world around us Theories discoveries and technologies from relativity the genetic code and the periodic table to synthetic drugs nuclear weapons and brain scans have transformed the physical world and our lives Copernicus Crick Watson Galileo Marie Curie these are some of the forty pioneers behind modern science whose stories are explored here The scientists come from around the globe and represent multiple nationalities American English German French Dutch Czech Indian Japanese and more Often unorthodox thinkers they frequently had to struggle against hostile contemporaries to gain recognition for their ideas and discoveries All the major scientific disciplines are covered including astronomy biology biochemistry chemistry computing ecology geology medicine neurology physics and psychology as well as mathematics **Driving Forensic**

Innovation in the 21st Century Simona Francese,Roberto S. P. King,2024-05-13 This contributed volume offers a comprehensive and multifaceted understanding of the current forensic innovation landscape enablers road blockers and barriers to implementation It also presents all aspects that need consideration to cross the valley of death between an idea and its successful implementation It uniquely merges the technical and scientific aspects of some of the innovations that have been implemented across forensic science within the National and International landscape and with i the necessary considerations to take into account on the road to success such as business planning data privacy and legal and regulatory aspects ii the end users perspective and iii the industry perspective Case studies illustrate what success looks like by discussing forensic innovations that have made it to the market and have subsequently impacted positively on criminal investigations This book acts as a platform to facilitate the dialogue between key stakeholders in driving innovation namely academia industry and end users as well as indicating a roadmap to facilitate practical developments whilst serving as a revolutionary springboard to initiate an innovation transforming paradigm shift This volume is a valuable contribution to the field and is of great interest to graduates and researchers engaged in forensic science forensic service providers and manufacturers as well as policymakers **Entrepreneurship in Context** Marco van Gelderen,Enno Masurel,2012-03-15

This book aims to provide an insight into the role of context in the world of entrepreneurship. It studies not only narrow and wider contexts but also their interconnectedness, their dynamic nature and the actions that entrepreneurs take to involve, engage and influence their context.

Fermented Foods Christine Baumgarthuber, 2021-04-08 Fermented Foods serves up the history and science behind some of the world's most enduring food and drink. It begins with wine, beer and other heady brews before going on to explore the fascinating and often whimsical histories of fermented breads, dairy, vegetables and meat and to speculate on fermented fare's possible future. Along the way we learn about Roquefort cheese's fabled origins, the scientific drive to brew better beer, the then controversial biological theory that saved French wine and much more. Christine Baumgarthuber also makes several detours into lesser known ferments: African beers, the formidable cured meats of the Subarctic latitudes and the piquant, sometimes deadly ferments of Southeast Asia. Anyone in search of an accessible, fun yet comprehensive survey of the world's fermented foods need look no further than this timely necessary work.

Empire of the Scalpel Ira Rutkow, 2023-02-14 From the sixteenth century saga of Andreas Vesalius and his crusade to accurately describe human anatomy while appeasing the clergy who clamored for his burning at the stake to the story of late nineteenth century surgeons' apathy to Joseph Lister's innovation of antisepsis and how this indifference led to thousands of unnecessary surgical deaths, *Empire of the Scalpel* is both a history and a uniquely American tale. Readers will learn how the United States achieved surgical leadership in the twentieth century, heralded by Harvard's Joseph Murray and his Nobel Prize winning seemingly impossible feat of transplanting a kidney, which ushered in a new era of transplants that continues to make procedures once thought insurmountable into achievable successes.

Diphtheria Phillip Margulies, 2004-12-15 Describes the symptoms and spread of the contagious disease and discusses treatments, preventive measures and the search for a cure.

Vaccine History Felicia Dunbar, AI, 2025-03-19 Vaccine History explores the evolution of vaccines, tracing their path from ancient practices to modern marvels like mRNA vaccines. The book highlights the crucial role vaccines play in public health and disease prevention, emphasizing how understanding their history informs our present day perceptions of their efficacy and safety. Early methods such as variolation in ancient China and India demonstrated the potential for inducing immunity despite inherent risks. The development and acceptance of vaccines has been a continuous, multifaceted process shaped by scientific breakthroughs, public health crises, ethical considerations and societal beliefs. The book systematically unfolds, beginning with the core principles of immunology and early prevention attempts, before highlighting landmark discoveries from figures like Edward Jenner and Louis Pasteur. It delves into the challenges encountered during widespread vaccine implementation, examining modern technologies and the ethical and logistical hurdles of global vaccine distribution. By incorporating perspectives from sociology, public policy and ethics, Vaccine History goes beyond a simple chronology of events to explore the interconnectedness of scientific discovery, public health policy and societal values.

Stalking the Great Killer Larry C. Floyd, Joseph H. Bates, 2023-04-06 Imagine a time when a killer disease took lives at a rate rivaling

Covid 19 in 2020 and 2021 and continued that grim harvest year after year decade after decade Such a nightmare scenario played out in the state of Arkansas and across the United States throughout the nineteenth century and well into the twentieth when the scourge of tuberculosis afflicted populations Stalking the Great Killer is the gripping story of Arkansas's struggle to control tuberculosis and how eventually the state became a model in its effective treatment of the disease To place the story of tuberculosis in Arkansas in historical perspective the authors trace the origins of the disease back to the Stone Age As they explain it became increasingly lethal in the nineteenth century particularly in Europe and North America Among U S states Arkansas suffered some of the worst ravages of the disease and the authors argue that many of the improvements in the state's medical infrastructure grew out of the desperate need to control it In the early twentieth century Arkansas established a state owned sanatorium in the northwestern town of Booneville and thirty years later the segregated Black sanatorium outside Little Rock These institutions helped slow the Great Killer but at a terrible cost removed from families and communities patients suffered from the trauma of isolation Joseph Bates saw this when he personally delivered an uncle to the Booneville sanatorium as a teen in the 1940s In the 1960s Bates now himself a physician and his physician colleague Paul Reagan overcame a resistant medical political system to develop a new approach to treating the disease without the necessity of prolonged isolation This approach consisting of brief hospitalization followed by outpatient treatment became the standard of care for the disease Americans today having gained control of the disease in the United States seldom look back Yet in the age of the Covid 19 pandemic this compelling history based on extensive research and eyewitness testimony offers valuable lessons for the present about community involvement in public health the potential efficacy of public private partnerships and the importance of forward thinking leadership in the battle to eradicate disease
