of love shyness would never have an opportunity to develop in growing boys and teenagers in the first place Since the publication of the first edition of this book it has been determined that as many as forty percent of men afflicted with love shyness are simultaneously comorbid for Asperger s Syndrome also known as high functioning autism As many as half of all love shy males are comorbid for the male lesbian syndrome sometimes also referred to as the passive non competitive male syndrome This second edition contains a new foreword that presents the latest findings in love shyness research It is more concise than the original Shyness Love yet retains the most significant chapters

**Love, Money, and Parenting** Matthias Doepke,Fabrizio Zilibotti,2020-11-03 Doepke and Zilibotti investigate how economic forces shape how parents raise their children They show that in countries with increasing economic inequality such as the United States parents push harder to ensure their children have a path to security and success Economics has transformed the hands off parenting of the 1960s and 70s into a frantic overscheduled activity Growing inequality has also resulted in an increasing parenting gap between richer and poorer families raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds The authors discuss how investments in early childhood development and the design of education systems factor into the parenting equation and how economics can help shape policies that will contribute to the ideal of equal opportunity for all From publisher description
