Pearl Of The Desert:

Pearl of the Desert Rubina Raja, 2022 Palmyra has long attracted the attention of the world Even before its rediscovery in the eighteenth century it had gained legendary status because of its third century CE Queen Zenobia who had rebelled against the Romans and expanded Palmyra's territory into that of an Empire stretching from what is modern eastern Turkey into Egypt The city and its queen featured in European art and literature already in the century Zenobia's Palmyra already existed as a mirage in the minds of the educated Europeans Even though Zenobia's reign and extensive power was a fairly short interlude and the Romans struck hard against the Palmyrenes devastating the city this path to imperial power was one which tells us an immense amount about Palmyrene identity in the period before the devastation While Zenobia has gained renewed interest among both scholars and the press and while she has served as a political symbol for Syria's president Assad a statue of her was recently erected in Damascus the time leading up to her reign still remains underexplored With the current situation in Syria a researched based narrative is urgently needed to communicate the importance of this site to the general public Palmyra has over the last years been used as a symbol of the resistance of the rebels the power of ISIS over the region as well as the supremacy of the Syrian state UNESCO and the Russians have together with the Syrian state taken a particular interest in Palmyra and in monopolizing the potential rebuilding of the site after the destruction and looting of the past several years have subsided We are so to speak standing at yet another turning point in Palmyra's long history where history is being reinvented actively by several parties There can be no doubt that the time is ripe for a book on the archaeology and history of Palmyra as well as an analysis of the current situation including the destruction and illicit trafficking of material remains from Palmyra These three main topics will together highlight the ways in which this fascinating site has again and again captured the world's focus Organized in nine chapters this compact book will set out to provide an introduction for students and general readers Following two overview chapters the next six will give a chronological narrative of Palmyra from the late Hellenistic period through to Rome's destruction in 273 CE and its survival in the Byzantine and medieval Islamic periods The book ends with a shorter conclusion chapter which will summarize the most important findings and conclusions of the chapters of the book and will set out a number of lines of enquiry which could be taken up in research and cultural heritage management over the coming years The result will be the best and most up to date account of Palmyra in English

The Palm Springs School: Desert Modernism 1934-1975 Alan Hess, 2025-02-11 Palm Springs is at the center of a unique tradition in architecture marked by invention and a sensitivity to local conditions that has resulted in

design that exerts an influence far greater than the town's small size. The book is the first to fully explore the wide-ranging forms this architecture has taken from houses to gas stations, hotels to airports, banks to restaurants and spas. Much more than a resort destination, Palm Springs has served as a laboratory of the Modern here so much architectural innovation and design took form. From the steel and glass boxes of Richard Neutra to the earthy organic homes of John Lautner and everything in between, the solutions of architects and designers including notably William F. Cody, E. Stewart Williams and Albert Frey were diverse and are ever more relevant in the face of contemporary challenges. Their answers addressed questions that still hold urgency: How to design sustainably in harsh climates. How to use technology efficiently and creatively to meet those challenges. How to build affordable and high-quality mass-produced housing. How to reflect a region's culture, economy and distinctive atmosphere. Architects here responded to nature's climatological demands and Palm Springs became a center for innovations that were rooted in practice more than theory. Benefitting from the architectural freedoms offered by the remoteness of the California desert, designers explored new approaches that we can now identify as central to the Palm Springs School, shown here in rich archival and contemporary photography.

Magnum! The Wild Weasels in Desert Storm
 Brick Eisel, Jim 'Boomer' Schreiner, 2009-08-19
 A detailed look at the day-to-day life of a pilot serving during the Persian Gulf War against Iraq. This book is based upon a journal Jim Schreiner kept during his deployment to the Persian Gulf region for Operations Desert Shield and Desert Storm. Building upon that record and the recollections of other F-4G Wild Weasel aircrew, the authors show a slice of what life and war was like during that time. The pawns in the game, the ones that actually had to do the fighting and dying, were the hundreds of thousands of men and women who left their homes and families to live for seemingly endless months in the vast trackless desert while the world stage play unfolded. To them, the war was deeply personal. At times the war was scary; at other times it was funny as hell. Usually, if you survive the former, it turns into the latter.

Thar Desert in Retrospect and Prospect
 R.P. Dhir, D.C. Joshi, S. Kathju, 2018-01-01
 Thar Desert in India is one of the most well-investigated and densely populated regions amongst the world's arid zones. A blend of crop and animal husbandries, conservative land use practices, coping mechanisms to minimize adverse effect of drought, and a frugal lifestyle have been the characteristic features of its dwellers. Recent increase in biotic pressure has interacted with the fragile environment to create fearsome environmental problems. Governmental responses were prompt in form, creating a strong research infrastructure for multi-disciplinary and multi-location research and demonstration on the one hand, and in huge investment in irrigation from internally and externally sourced water, desertification control program, and an accelerated socio-economic and infrastructure development softening content of drought, and strengthening of livelihoods on the other. Unlike several publications on the Thar, the current effort attempts a comprehensive, pragmatic and off-beat analysis of various developments and goes further to show how the situation today is a blend of both resource degradation and economic development. Recent studies have helped rebuild the past climate history that shows that the climate has been fluctuating.
