[,prī-və-tə-'zā-shən]

The process by which a piece of property or business goes from being owned by the government to being privately owned.

Privatizing The State

Raymond M. Duch

Privatizing The State:

Privatizing the State Béatrice Hibou, 2004 In the new global political economy privatization names a transformation of the roles of public and private actors with the goal of reforming government policies and economic aid programs It is an objective a slogan a fetish But what does it signify On the one hand it refers to the process of changing industries businesses and services from governmental or public ownership to private agencies But privatization now also extends to what are normally the prerogatives of national states taxation customs internal security national defense and peace negotiations In much of the literature privatization is associated with the retreat decline or even demise of the state Using Max Weber's concept of delegation or discharge as a point of departure Hibou and the contributors of this volume propose an alternative view interpreting the contemporary restructuring of economic and political relations in much of the world as the privatization of the state This book challenges received ideas about the process of globalization and its presumed homogenization by suggesting that rather than weakening the powers of the state privatization actually strengthens it With examples from Russia Poland China Taiwan Indonesia North Africa and sub Saharan Africa the book questions the supposed inefficiency of states in regulating capitalism and the role economic and financial knowledge play as substitutes for political and social analysis

Privatising the State Béatrice Hibou, 2004 Privatisation is supposed to bring about the retreat of the state But what happens when the state privatises itself and even its core functions tax collection internal security customs are auctioned to the highest bidder Does this imply a weakening of the state Or rather does it lead to a scrutiny and control The contributors to this work examine these phenomena in the former Second and Third World Central and Eastern Europe China and other parts of Asia and Africa highlighting the very different ways in which continuing state interference and privatisation are implemented What we are witnessing according to this study is not the eclipse of the state under the impact of globalisation but the end of the relatively short era of the development state and its commanding role privatisation does not necessarily lead to a weakening of state control it leads to new and often more informal forms of interference and influence and it is these that are the book's central theme

The Privatized State Chiara Cordelli, 2022-05-03 Why government outsourcing of public powers is making us less free Many governmental functions today from the management of prisons and welfare offices to warfare and financial regulation are outsourced to private entities Education and health care are funded in part through private philanthropy rather than taxation Can a privatized government rule legitimately The Privatized State argues that it cannot In this boldly provocative book Chiara Cordelli argues that privatization constitutes a regression to a precivil condition what philosophers centuries ago called a state of nature Developing a compelling case for the democratic state and its administrative apparatus she shows how privatization reproduces the very same defects that Enlightenment thinkers attributed to the precivil condition and which only properly constituted political institutions can overcome defects such as provisional justice undue dependence and unfreedom Cordelli advocates for constitutional limits on

privatization and a more democratic system of public administration and lays out the central responsibilities of private actors in contexts where governance is already extensively privatized Charting a way forward she presents a new conceptual account of political representation and novel philosophical theories of democratic authority and legitimate lawmaking The Privatized State shows how privatization undermines the very reason political institutions exist in the first place and advocates for a new way of administering public affairs that is more democratic and just The Privatization of State Education Chris Green,2007-04-11 Anyone who wants to know what is really happening in schools behind all the hype and political rhetoric about the privatizing reforms in education should read this book It clarifies how private interests are influencing the public education process and investigates Labour s successes and failures In plain English it shows how schools are set up run and held to account through testing and inspection and how they make judgements about the relative merits of different schools performances It also indicates ways in which ordinary people can participate in shaping the future of education in order to achieve progress and better standards of achievement from schools and the education service generally This is essential reading for all those concerned about the new future of our education system and of our children

Privatizing the Police-State M. Los,Andrzej Zybertowicz,2016-01-22 This is the first book that documents and analyses the paramount role of secret services in the decomposition of the communist system and the conversion of its elites into new capitalists The surge of civil society in 1980s Poland prompted a parallel expansion of the police state apparatus The book traces the subsequent reconstruction and privatization of social political and material resources of the police state and shows how these covert operations shaped other more visible aspects of the East Central European transformation A Note from the Authors Since the publication of this book the events in Poland and elsewhere have demonstrated the extraordinary influence and longevity of the power networks spawned by the communist police state apparatus and its eventual privatization There is new evidence uncovered almost daily whose interpretation would not be feasible without the conceptual and historical framework elaborated first in this book **Privatizing the Economy** Raymond M. Duch,1991 Sheds new light on

privatization and on the reasons for the failures of state ownership **Privatization, Lessons Learned by State and Local Governments** United States. General Accounting Office,1997 **Federal Barriers to State and Local**

Privatization United States. Congress. Joint Economic Committee,1996 *Privatization and Control of State-owned Enterprises* Ravi Ramamurti,Raymond Vernon,1991-01-01 *Hostile Business and the Sovereign State* Michael J.

Strauss,2018-12-14 This book describes and assesses an emerging threat to states territorial control and sovereignty the hostile control of companies that carry out privatized aspects of sovereign authority The threat arises from the massive worldwide shift of state activities to the private sector since the late 1970s in conjunction with two other modern trends the globalization of business and the liberalization of international capital flows The work introduces three new concepts firstly the rise of companies that handle privatized activities and the associated advent of post government companies that make

such activities their core business Control of them may reside with individual investors other companies or investment funds or it may reside with other states through state owned enterprises or sovereign wealth funds Secondly imperfect privatizations when a state privatizes an activity to another state s public sector The book identifies cases where this is happening It also elaborates on how ownership and influence of companies that perform privatized functions may not be transparent and can pass to inherently hostile actors including criminal or terrorist organizations Thirdly belligerent companies whose conduct is hostile to those of states where they are active The book concludes by assessing the adequacy of existing legal and regulatory regimes and how relevant norms may evolve *State-Owned Enterprises in the Middle East and North Africa* Merih Celasun,2013-01-11 In the rapid world wide spread of privatization progress in the Middle East and North Africa region has been markedly slow This volume argues that a high level of overstaffing in public enterprises and the inability of economies to create jobs fast enough is mainly responsible for this An in depth study of the facts and a well supported conclusion makes this an impressive collection of work on a very pertinent subject **Privatization in Central and Eastern Europe** June G. Hopps, Demetrius S. Iatridis,1998-08-27 Central and Eastern European countries are facing the transition from central to market systems with different strategies and capacities As the task of societal transformation is without precedent in world history the massive economic restructuring has revealed the need for distributive justice and general well being As the editors and contributors to this volume point out the monolithic preoccupation with economic restructuring in a market economics framework is implemented at the expense of social protection and security In contrast to traditional views of privatization as only an economic or managerial phenomenon this collection approaches privatization as a broader integrated process of societal transformation Privatization as defined here consists of integrated processes of societal restructuring that affect sociopolitical economic and ideological constructs as well as human and physical capital development transformation of family structures market stabilization and organization of social care Public policymakers as well as scholars and researchers of contemporary Eastern Europe will find this collection of great interest and an important challenge to the economic models of privatization which undervalue social costs *Economic Transition in Russia and the New States of Eurasia* Bartłomiej Kamiński,1996 This volume covers the economic progress made by the new states of the former Soviet Union in the transition from command to market economies Topics discussed include political and economic adjustments the domestic dimension macropolicies restructuring and regional and world integration **Privatizing Monopolies** Ravi Ramamurti,1996 In *Privatizing Monopolies* a distinguished interdisciplinary team of business school faculty economists political scientists and practitioners from multinational companies examines the lessons of this process in two important sectors telecommunications and transport airlines and roadways *The Future of State-Owned Financial Institutions* Gerard Caprio, Jonathan L. Fiechter, Robert E. Litan,2010-12-01 Research suggests that if the majority of a country s financial institutions are owned by the state that country will experience slower financial development less efficient

financial systems less private sector credit and slower GDP growth Yet more than 40 percent of the world's population live in countries in which public sector institutions dominate the banking system In *The Role of State Owned Financial Institutions Policy and Practice* noted experts discuss the challenges presented by state owned financial institutions and offer cross disciplinary solutions for policymakers and banking regulators The issues include methods for effectively managing reforming and privatizing state owned banks the fiscal costs and contingent liabilities of state owned banks macroeconomic implications and the impact of state owned banking on access to credit in an economy guidance for effective supervision of state owned banks managerial perspectives on improving products human resources and risk management case studies of different methods of privatization such as initial public offerings employee stock ownership plans and strategic investors Contributors include David Binns Beyster Institute Robert Cull World Bank Ron Gilbert ESOP Services James A Hanson World Bank Richard Hemming International Monetary Fund Fred Huibers ING Research Arminio Fraga formerly Central Bank of Brazil Nicholas Lardy Institute for International Economics David Marston International Monetary Fund Moody's Global Investor Service Herman Mulder ABN Amro William Nichol Deutsche Bank AG Urjit Patel Infrastructure Development Finance Company India and P S Srinivas World Bank

State Lotteries and Legalized Gambling Richard McGowan, 1994-10-30 Lotteries and state sponsored gambling is big business This is the first study that evaluates the business strategies of state lotteries on two fronts First it examines which of the lottery strategies produces the most consistent source of revenue for the state Second it analyzes possible overall gambling strategies that states will need to utilize as they seek to expand gambling revenue This is must reading for those operating lotteries state legislators vendors to state lottery commissions taxpayers and scholars in public policy and government The whole question of state sponsored gambling is explored integrating both the business and policy strategies of operating a state lottery Initially gambling and lotteries were introduced into the public policy process in times of social unrest brought on by the outbreak of war Since regular sources of governmental revenue were diverted to the war effort proceeds from gambling activities were used to finance the building of roads canals and schools An Ethics of Tolerance also had to evolve in order to engender the public's acceptance of lotteries and gambling Today states are using gambling revenues to support education public transportation and aid to local towns and cities Hence gambling revenues must be maintained or increased States now must decide whether they should introduce other gambling initiatives possibly cannibalizing their existing activities in the process The basic question of whether it is actually possible for a state to establish an overall gambling strategy is explored by an analysis of the gambling policies of Massachusetts and Pennsylvania The future of gambling in the United States as states move beyond lotteries to sanctioning casino gambling by private entrepreneurs concludes this most relevant and provocative book

How Governments Privatize Mark Cassell, 2002 Governments throughout the world confront enormous challenges when divesting Whether it is poor performing bank loans in Japan and Korea military bases in the United States or real estate

in eastern Europe the challenge of public divestment is more than just a question of how to map a path to economic efficiency. Conventional wisdom in public management and privatization literature says that the execution of such enormous tasks as divestment is typically done poorly and that the government strategy is likely to be inefficient. Mark Cassell argues that privatization must be understood as a political and administrative puzzle rather than simply an exercise in economic efficiency. This study of two successful divestment agencies, the U.S. Resolution Trust Corporation and the German Treuhandanstalt, presents a complex understanding of the two agencies' performance in privatizing hundreds of billions of dollars of assets following two very different crises: the savings and loan debacle in the United States and unification in Germany. In the U.S. the worst economic problem since the Great Depression forced the government to recreate and reshape private property on an immense scale. In Germany, melding East and West Germany involved converting an entire national economy that employed more than four million people. In each case, unassuming public agencies handled two of the largest public sales of assets in this century. Cassell identifies the importance and effects of managerial structures and of national institutions, legislatures and executives on the outcomes of the reform efforts. This book will be of interest to those interested in alternatives to traditional public sector structures, electoral connections to bureaucracies, comparative political economy and the historic events of the aftermath of the savings and loan crisis and German unification. It is crucial reading for policy and public administration practitioners and scholars alike.

Case-by-case Privatization in the Russian Federation

Harry G. Broadman, 1998. Since the advent of reform in 1992, the Russian authorities have made substantial strides toward creating a market economy through privatization. Recently, Russian authorities have established an institutional framework for a case-by-case approach that ensures transparency and competition through the use of independent financial and other advisers. This paper contains the principal presentations made at a World Bank workshop on the lessons of international experience in case-by-case privatization.

Limits to Privatization Marianne Beishem, 2012. *Limits to Privatization* is the first thorough audit of privatizations from around the world. It outlines the historical emergence of globalization and liberalization and from analyses of over 50 case studies of best and worst case experiences of privatization, it provides guidance for policy and action that will restore and maintain the right balance between the powers and responsibilities of the state, the private sector and the increasingly important role of civil society. The result is a book of major importance that challenges one of the orthodoxies of our day and provides a benchmark for future debate.

Land Privatization in Mexico

Maria Teresa Vázquez-Castillo, 2004-10-28. This book analyzes ejido land as space of urbanization and location of economic activities and capital and land privatization as a redistributive process with local, urban, regional and global consequences.
