Reviews Of Neuroscience Volume 1:

Encyclopedia of Neuroscience, Volume 1 Larry R. Squire, 2009-06-12 The Encyclopedia of the Neuroscience explores all areas of the discipline in its focused entries on a wide variety of topics in neurology neurosurgery psychiatry and other related areas of neuroscience Each article is written by an expert in that specific domain and peer reviewed by the advisory board before acceptance into the encyclopedia Each article contains a glossary introduction a reference section and cross references to other related encyclopedia articles Written at a level suitable for university undergraduates the breadth and depth of coverage will appeal beyond undergraduates to professionals and academics in related fields The Oxford Handbook of Cognitive Neuroscience, Volume 1 Kevin Ochsner, Stephen M. Kosslyn, 2013-12 A rich source of authoritative information that supports reading and study in the field of cognitive neuroscience this two volume handbook reviews the current state of the science in all major areas of the field *You, the Choreographer* Vladimir Angelov, 2023-08-30 YOU THE CHOREOGRAPHER Creating and Crafting Dance offers a synthesis of histories theories philosophies and creative practices across diverse genres of concert dance choreography The book is designed for readers at every stage of creative development who seek to refine their artistic sensibility Through a review of major milestones in the field including contributions to choreography from the humanities arts and modern sciences readers will gain new perspectives on the historical development of choreography Concise analyses of traditional fundamentals and innovative practices of dance construction artistic research methods and approaches to artistic collaboration offer readers new tools to build creative habits and expand their choreographic proficiencies For learners and educators this is a textbook For emerging professionals it is a professional development tool For established professionals it is a companion handbook that reinvigorates inspiration To all readers it offers a cumulative systematic understanding of the art of dance making with a wealth of cross disciplinary references to create a dynamic map of creative practices in choreography **Art as experience of the living body / L'art comme experience du corps vivant** Christine Vial Kayser, 2024-01-23 This book analyses the dynamic relationship between art and subjective consciousness following a phenomenological pragmatist and enactive approach It brings out a new approach to the role of the body in art not as a speculative object or symbolic material but as the living source of the imaginary It contains theoretical contributions and case studies taken from various artistic practices visual art theatre literature and music Western and Eastern the latter concerning China India and Japan These contributions allow us to nourish the debate on embodied cognition and aesthetics using theory philosophy art history neuroscience and the authors personal experience as artists or spectators According to the Husserlian method of reduction and pragmatist introspection they postulate that listening to bodily sensations cramps heartbeats impulsive movements eye orientation can unravel the thread of subconscious experience both active and affective that emerge in the encounter between a subject and an artwork an encounter which following John Dewey we deem to be a case study for life in general Ce livre analyse la relation

dynamique entre l'art et la conscience subjective selon une approche phénoménologique pragmatiste et enactive. Il vise faire merger une nouvelle approche du rôle du corps dans l'art non pas comme objet spéculatif ou matériau symbolique mais comme source vivante de l'imaginaire. Les contributions théoriques et les études de cas sont prises diverses pratiques artistiques arts visuels théâtre littérature et musique occidentales et orientales ces dernières concernant la Chine l'Inde et le Japon. Selon la méthode husserlienne de réduction en cho l'introspection pragmatiste les textes témoignent que l'écoute des sensations corporelles crampes battements de cœur mouvements pulsionnels orientation des yeux mises en jeu par l'œuvre permet de dénouer le fil de l'expérience inconsciente la fois kinesthésique et affective qui merge dans la rencontre entre un sujet et une œuvre d'art une rencontre comprise la manière de Dewey comme un cas d'école de la vie en général.

If I Only Had a Brain Mark Sherry, 2013-10-14 This book offers a rich insider's viewpoint of the lived experience of brain injury. Sherry a survivor of brain injury himself uses a cross disciplinary theoretical approach drawing upon the social and medical models of disability and combining them with lessons from feminism queer theory postcolonial and postmodern literature to frame an enriching narrative about the lived experience of brain injury.

Novel Treatment of Epilepsy Humberto Foyaca Sibat, 2011-09-22 Epilepsy continues to be a major health problem throughout the planet affecting millions of people mainly in developing countries where parasitic zoonoses are more common and cysticercosis as a leading cause is endemic. There is epidemiological evidence for an increasing prevalence of epilepsy throughout the world and evidence of increasing morbidity and mortality in many countries as a consequence of higher incidence of infectious diseases head injury and stroke. We decided to edit this book because we identified another way to approach this problem covering aspects of the treatment of epilepsy based on the most recent technological results in vitro from developed countries and the basic treatment of epilepsy at the primary care level in rural areas of South Africa. Therefore apart from the classic issues that cannot be missing in any book about epilepsy we introduced novel aspects related with epilepsy and neurocysticercosis as a leading cause of epilepsy in developing countries. Many experts from the field of epilepsy worked hard on this publication to provide valuable updated information about the treatment of epilepsy and other related problems.

The fabric(ation) of consciousness Pieter F. Craffert, 2024-05-28 Consciousness is central to the quest for being human and for what the world is made of. While there is widespread agreement on the significance of consciousness for clarifying the human condition there is no agreement on the phenomenon

in search of theorising Although there is no shortage of theories and concepts of consciousness in current consciousness research the dominant critical analysis of consciousness research in this study although based on existing analyses is as far as I can see new and unique in arguing for a crisis in consciousness research This book touches on most aspects of consciousness research the hard problem of consciousness neural correlates of consciousness brain models and consciousness consciousness and dualistic thinking etc but is a critical analysis of consciousness research It is not an insider but a third person perspective on current consciousness research In this regard it differs from most introductions and overviews where these topics are presented from a first person perspective the insiders claim about their research Representing the broad spectrum of consciousness research in terms of the theoretical framework of a neuro ecological perspective is a new and innovative move

The Feldenkrais Method in Creative Practice Robert Sholl,2021-01-28 Bringing together scholars and researchers in one volume this study investigates how the thinking of the Ukrainian Israeli somatic educationalist Moshe Feldenkrais 1904 84 can benefit and reflect upon the creative practices of dance music and theatre Since its inception the Feldenkrais Method has been associated with artistic practice growing contiguously with performance cognitive and embodied practices in dance music and theatre studies It promotes awareness of fine motor action for improved levels of action and skill as well as healing for those who are injured For creative artists the Feldenkrais Method enables them to refine and improve their work This

book offers historical scientific and practical perspectives that develop thinking at the heart of the Method and is divided into three sections Historical Perspectives on Creative Practice From Science into Creative Practice and Studies in Creative Practice All the essays provide insights into self improvement training avoiding injury history and philosophy of artistic practice links between scientific and artistic thinking and practical thinking as well as offering some exercises for students and artistic practitioners looking to improve their understanding of their practice Ultimately this book offers a rich development of the legacy and the ongoing relevance of the Feldenkrais Method We are shown how it is not just a way of thinking about somatic health embodiment and awareness but a vital enactivist epistemology for contemporary artistic thought and practice *Associations' Publications in Print* ,1981 1981 in 2 v v 1 Subject index v 2 Title index Publisher title index Association name index Acronym index Key to publishers and distributors abbreviations *Towards New Therapies for Parkinson's Disease* David Finkelstein,2011-11-02 Parkinson s disease PD is characterised clinically by various non motor and progressive motor symptoms pathologically by loss of dopamine producing cells and intraneuronal cytoplasmic inclusions composed primarily of synuclein By the time a patient first presents with symptoms of Parkinson s disease at the clinic a significant proportion of the cells in the substantia nigra have already been destroyed This degeneration progresses despite the current therapies until the cell loss is so great that the quality of normal life is compromised The dopamine precursor levodopa is the most valuable drug currently available for the treatment of PD However for most PD patients the optimal clinical benefit from levodopa decreases around five to six years of treatment The aim of the chapters of this book is to work towards an understanding in the mechanisms of degeneration and to develop disease modifying therapies **Evolution and the Human-Animal Drive to Conflict** Jorge A. Colombo,2023-07-31 Evolution and the Human Animal Drive to Conflict examines how fundamental universal animal drives such as dominance prevalence survival kinship and profit greed advantage whether of material or social nature provide the basis for the evolutionary trap that promotes the unstable conflictive dominant prone individual and group human behaviours Examining this behavioural tension this book argues that while these innate features set up behaviours that lean towards aggression influenced by social inequalities the means implemented to defuse them resort to emotional and intellectual strategies that sponsor fanaticism and often reproduce the very same behaviours they intend to defuse In addressing these concerns the book argues that we should enhance our resources to promote solidarity accept cultural differences deter expansionist and uncontrolled profit drives and achieve collective access towards knowledge and progress in living conditions This entails promoting the redistribution of resources and creative labour access and avoiding policies that generate a fragmented world with collective and individual development disparities that invite and encourage dominance behaviours This resource redistribution asserts that it is necessary to reformulate the global set of human priorities towards increased access to better living conditions cognitive enhancement a more amiable interaction with the ecosystem and non aggressive cultural differences promote universal

access to knowledge and enhance creativity and cultural convivence These behavioural changes entail partial derangement of our ancestral animal drives camouflaged under different cultural profiles until the species succeeds in replacing the dominance of basic animal drives with prosocial collective ones Though it entails a formidable task of confronting financial military and religious powers and cultural inertias human history is also a challenging continuous experience in these domains for the sake of our own self identity and self evaluation we should reject any suggestion of not continuing embracing slowly constructing collective utopias channelled towards improving individual and collective freedom and creativeness This book will interest academics and students in social cognitive and evolutionary psychology the neurosciences
