precisely this theme striking the right balance between ensuring safety for children on the internet while at the same time enabling them to experiment to learn to enrich their lives to acquire skills and to have fun using this global network The authors come from various scientific disciplines ranging from law to social science and from media studies to philosophy This means that the book provides the reader with both empirical and theoretical conceptual chapters and sheds a multi disciplinary light on the complex topic of regulating online safety for children Cross-Disciplinary Advances in Human Computer Interaction: User Modeling, Social Computing, and Adaptive Interfaces Zaphiris, Panayiotis, Ang, Chee Siang, 2009-01-31 This book develops new models and methodologies for describing user behavior analyzing their needs and expectations and thus successfully designing user friendly systems Provided by publisher *Religious Diversity in Post-Secular Societies* Zakaria Sajir, Computers As Cognitive Tools Susanne P. Lajoie, Sharon J. Derry, 2013-05-13 Highlighting and illustrating several important and interesting theoretical trends that have emerged in the continuing development of instructional technology this book s organizational framework is based on the notion of two opposing camps One evolves out of the intelligent tutoring movement which employs artificial intelligence technologies in the service of student modeling and precision diagnosis and the other emerges from a constructivist developmental perspective that promotes exploration and social interaction but tends to reject the methods and goals of the student modelers While the notion of opposing camps tends to create an artificial rift between groups of researchers it represents a conceptual distinction that is inherently more interesting and informative than the relatively meaningless divide often drawn between intelligent and unintelligent instructional systems An evident trend is that researchers in both camps view their computer learning environments as cognitive tools that can enhance learning performance and understanding Cognitive tools are objects provided by the instructional environment that allow students to incorporate new auxiliary methods or symbols into their social problem solving which otherwise would be unavailable A final section of the book represents researchers who are assimilating and accommodating the wisdom and creativity of their neighbors from both camps perhaps forming the look of technology for the future When the idea of model tracing in a computer based environment is combined with appreciation for creative mind extension cognitive tools and for how a community of learners can facilitate learning a camp is created where AI technologists and social constructivist learning theorists can feel equally at home *Exoskeletal Devices and the Body* Denisa Butnaru, 2023-07-21 This book enquires from a sociological perspective into contemporary corporeal transformations brought about by exoskeletal devices Challenging material boundaries of human bodies their capacities in abilities and skills exoskeletal devices question social norms of corporeal deviance and extension Through multi sited ethnography interviews and analyses of contemporary science and technology studies STS sociological literature and current approaches from the phenomenology of the body this book shows how exoskeletons contribute to forging three contemporary corporeal worlds impairment ability and above average ability The text questions deeply held ideas about enhancement and augmentation

corporeal deviance and normality in the three studied fields of rehabilitation industry and the armed forces It will appeal to scholars and advanced students across the social sciences and humanities including from sociology philosophy body studies and science and technology studies **Cyborgs and Barbie Dolls** Kim Toffoletti, 2007-08-29 Bringing a lively and accessible style to a complex subject Cyborgs and Barbie Dolls explores the idea of the posthuman and the ways in which it is represented in popular culture Toffoletti explores images of the posthuman body from goth rocker Marilyn Manson's digitally manipulated self portraits to the famous TDK baby adverts and from the work of artist Patricia Piccinini to the curiously plastic form of the ubiquitous Barbie doll controversially rescued here from her negative image Drawing on the work of thinkers including Baudrillard Donna Haraway and Rosi Braidotti Cyborgs and Barbie Dolls explores the nature of the human and its ambiguous gender in an age of biotechnologies and digital worlds
