Cole,1963 *A History of Socialist Thought: The Second International, 1889-1914* George Douglas Howard Cole,1957 *Demonstration Culture* Kevin J. Callahan,2010 The movement of international socialism prior to World War I overcame internal disunity and external obstacles by developing a new style of political culture and communication centered on mass based demonstration This culture consisted of a diverse repertoire of activities such as public display political symbolism the popular press the issuance of manifestos massive antiwar rallies and the convening of impressive political spectacles As the largest international movement of its era international socialism articulated a powerful indictment against the European imperialist and militaristic order Claiming to represent all of humanity and to reconcile national and international identity international socialism facilitated the expression of political dissent the expansion of democratic citizenship and the spread of innovative techniques we now consider an essential part of modern political communication and culture This interdisciplinary book touches upon several fields of scholarship including European Socialism political communication social movement peace studies and World War I *The Second International 1889-1914* George Douglas Howard Cole,1953 *The Historical & International Foundations of the Socialist Equality Party* Socialist Equality Party (U.S.),2008 **Internationalism in the Labour Movement 1830-1940** Holthoon,Marcel van der Linden,2025-02-10 **Bibliography of Social Science Periodicals and Monograph Series** United States. Bureau of the Census,1961 **Revolutionary Contagion and International Politics** Chad E. Nelson,2022 A unique theory of what happens when leaders fear a revolution abroad will spread to their own country and how that affects international relations When do leaders fear that a revolution elsewhere will spread to their own polities and what are the international effects of this fear In *Revolutionary Contagion* Chad E Nelson

develops and tests a theory that explains how states react to ideological driven revolutions that have occurred in other nations To do this he analyzes four key revolutionary movements over two centuries liberalism communism fascism and Islamism He further explains that the key to understanding the response to revolutions lies in focusing on the extent to which leaders fear upheaval in their own countries According to the theory Nelson argues fear of contagion is driven more by the characteristics of the host rather than the activities of the infecting agents In other words leaders will fear revolutionary contagion when they have significant revolutionary opposition movements that have an ideological affinity with the revolutionary state A powerful theory of the profound effects revolutions have on international relations this book shows why one simply cannot make sense of international politics including patterns of alliances and wars in certain situations without considering the fear of contagion

of the modern world and the recurrent crises of capitalism *The Lost World of Socialists at Europe's Margins* Maria Todorova, 2020-09-03 Maria Todorova's book is devoted to the golden age of the socialist idea broadly surveying the period in and around the time of the Second International. It critically examines the promise for an alternative socialist utopia from 1870 to the 1920s. Todorova brings in the experience of the periphery in a comparative context in the belief that the margins can often elucidate better the character of a phenomenon and deprovincialize it from essentialist notions. In doing so, *The Lost World of Socialists at Europe's Margins* moves beyond the traditional historiographical emphasis on ideology by looking at different intersections or entanglements of spaces, generations, genders, ideas, and feelings, and different flows of historical time. The study provides a social and cultural history of early socialism in Eastern Europe with an emphasis on Bulgaria, arguably the country with the earliest and strongest socialist movement in Southeast Europe and one that had a unique relationship to both German and Russian social democracy. Based on a rich prosopographical database of around 3500 biographies of people born in the 19th century, the book addresses the interplay of several generations of leftists looking at the specifics of how ideas were generated, received, transferred, and transformed. Finally, the work investigates the intersection between subjectivity and memory as reflected in a unique cache of archival materials containing over 4000 documentary sources including diaries, oral interviews, and unpublished memoirs. A microhistorical approach to this material allows the reconstruction of structures of feeling that inspired an exceptional group of individuals.
