Second World War A Narrative History:

The Second World War John Ray, 1999 A straight chronological history emphasizing who what when and where Ray writes in a clear unadorned prose that is easily digested a well organized survey that covers all of the major military campaigns For the general reader who needs a primer in this seminal conflict Ray has provided a valuable resource Booklist The subtitle nicely captures the flavor of this work Ray describes the war concisely comprehensively and quite readably His expositions and overviews especially concerning the Eastern and African fronts and the Far Eastern theater are satisfying to a degree rarely found Publishers Weekly *The Second World War in the Twenty-First-Century Museum* Stephan Jaeger, 2020-02-24 The Second World War is omnipresent in contemporary memory debates As the war fades from living memory this study is the first to systematically analyze how Second World War museums allow prototypical visitors to comprehend and experience the past It analyzes twelve permanent exhibitions in Europe and North America including the Bundeswehr Military History Museum in Dresden the Museum of the Second World War in Gdańsk the House of European History in Brussels the Imperial War Museums in London and Manchester and the National WWII Museum in New Orleans in order to show how museums reflect and shape cultural memory as well as their cognitive ethical emotional and aesthetic potential and effects This includes a discussion of representations of events such as the Holocaust and air warfare In relation to narrative memory and experience the study develops the concept of experientiality on a sliding scale between mimetic and structural forms which provides a new textual spatial method for reading exhibitions and understanding the experiences of historical individuals and collectives It is supplemented by concepts like transnational memory empathy and encouraging critical thinking through difficult knowledge *The Story of World War II* Henry Steele Commager, Donald L. Miller, 2010-05-11 Drawing on previously unpublished eyewitness accounts prizewinning historian Donald L. Miller has written what critics are calling one of the most powerful accounts of warfare ever published Here are the horror and heroism of World War II in the words of the men who fought it the journalists who covered it and the civilians who were caught in its fury Miller gives us an up close deeply personal view of a war that was more savagely fought and whose outcome was in greater doubt than readers might imagine This is the war that Americans at the home front would have read about had they had access to the previously censored testimony of the soldiers on which Miller builds his gripping narrative Miller covers the entire war on land at sea and in the air and provides new coverage of the brutal island fighting in the Pacific the bomber war over Europe the liberation of the death camps and the contributions of African Americans and other minorities He concludes with a suspenseful never before told story of the atomic bombing of Nagasaki based on interviews with the men who flew the mission that ended the war *The History and Narrative Reader* Geoffrey Roberts, 2001 Are historians story tellers Is it possible to tell true stories about the past These are just two of the questions raised in this comprehensive collection of texts about philosophy theory and methodology of writing history *Introduction to Global Military History*

Fascism in Europe and Beyond Paul Baxa, 2025-09-18 Fascism in Europe and Beyond examines fascism from its origins to the present It begins in the fin de si cle era when the various ideas that eventually coalesced into

fascism first emerged and concludes with the re emergence of fascist ideas in recent times Historiographical discussions illustrations biographical textboxes and maps are interwoven into the text while a valuable collection of primary documents can be found at the end of the book to facilitate further study Paul Baxa focuses primarily on European experiences in countries such as Germany Italy Hungary Croatia Romania the UK France Belgium Spain and Portugal but there is also significant coverage of imperial Japan and Cold War fascism in the shape of North American movements and leaders like Rockwell s American Nazi Party Baxa even discusses The World Union of National Socialists and its attempt to build a universal fascist movement after the Second World War The aims of the fascist movements their social composition and their actions are explored extensively in the book while an emphasis is placed on the cult of personality in driving fascism in its many manifestations Baxa s underlying assertion that fascism is primarily a cultural movement a political cult in fact that relies on charismatic leaders who have been able to articulate and project the fantasies and desires of their followers provides a consistent position throughout one that both enriches and enlivens the text itself and that offers a useful jumping off point for classroom discussions
