Zawadi Job Kinyamagoha, 2014-10-07 This book examines how social change affects the role of the pastor in an African context Through field study in African churches author Zawadi Job Kinyamagoha explores how pastors work amid the tensions of rapid social change and suggests how pastors can constructively respond to social change by using it as an opportunity in their pastoral ministry Contemporary society is characterized by three cultural spheres the economic sphere the public sphere and the democratic or self governance rule the realities of which many pastors seem to overlook Church authorities seem to adhere rigidly to strict principles and rules without accommodating the realities of society Conversely a changing society demands that pastors work with the reality at hand leaving pastors caught between two conflicting tensions the pressure from church authorities and from a changing social reality The Pastor in a Changing Society seeks to help Tanzanian and African pastors rethink existing doctrines and practices in order to better respond to the reality of a changing society Social Change and the Schools Gerald Bernbaum, 2025-09-01 First published in 1967 Social Change and the

Schools is an examination of the change which took place in the English school system between 1918 and 1944 Special attention is paid throughout to the social factors operating on and within the schools and there is a close study of the conflicts and debates which the changing social forces brought about Mr Bernbaum considers the effects of industrialization and traces the growth of the educational system in terms of its relationship to the social structure and to the economic system He examines educational reconstruction and reorganisation in the 1930 s changes in educational practice during this

Mobility, Elites and Education in French Society of the Second Empire Patrick J. Harrigan, 2006-01-01 Based on a unique historical source this book examines the social origins career expectations and first jobs of 28 000 students in the elitist French secondary schools of the 1860s Using sophisticated statistical analysis as well as conventional historical sources the work concludes that schooling reached a wider audience than has been so far believed and that substantial social mobility occurred within the school system but that family background rather than educational factors directed students career aspirations and achievements It also argues that although education expanded in urban industrialized areas mobility did not increase in these areas A final chapter reconsiders nineteenth century thought concerning education in the light of findings about the social effects of schools
