Secret Messerschmitt Projects:

Secret Messerschmitt Projects Willy Radinger, Walter Schick, 1996 The P1101 was Messerschmitt's second jet aircraft after the Me 262. Designed as a fighter, the test version of this type was to serve as an experimental aircraft to test the swept wing concept. After World War II the P1101 was brought to the U S A and served there among other things as a testbed for the similar developments. Photos and data of this astonishing yet understandably unknown aircraft with its futuristic technology are rare. This new book is a comprehensive documentation where not only the development history with all the important data concerning the P1101 is gathered but also photos, detailed facts and figures about this aircraft. Of particular note are the numerous tabular comparisons with similar German and foreign aircraft from the war and post war era. While there are innumerable German technical publications about well known mass produced Messerschmitt aircraft, the authors have been successful with this book in supplementing these works with the portrayal of the last almost completed Messerschmitt aircraft. Willy Radinger and Walter Schick are also the authors of *Messerschmitt Me 262 Development Testing Production* available from Schiffer Publishing Ltd. *Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945* Dan Sharp, 2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion. Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them. As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor. And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft. Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen. They proposed rotating wing ramjet fighters, arrowhead shaped ramjets, rocket firing bat winged gun platforms, sleek speed machines, tailless flying wings, tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors. *Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945* by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs, illustrations and period documentation from archives around the world.

Luftwaffe Secret Projects Walter Schick, Ingolf Meyer, 1997 Designs from Germany's aerodynamics engineers detail proposed military aircraft including wing span and area, aspect ratio, length, height, weight, speed and armament. [Luftwaffe Secret Projects](#) Dieter Herwig, Heinz Rode, 2000 This eagerly awaited companion volume to the enormously popular volume on fighters looks at the might have been strategic German bombers. Filled with transatlantic jets and projects that were on the drawing board or in prototype form at the war's end. Full color action illustrations in contemporary markings and
