Secret Weapon U S Highfrequency Direction Finding In The Battle Of The Atlantic:

Secret Weapon Kathleen Broome Williams, 1996 The war against U boats in the Atlantic was won in part by a high frequency direction finder called Huff Duff or HF DF for short that could pinpoint the location of radio transmitters The electronic device was used extensively by the Allies to locate German submarines attacking merchant ships in the Atlantic Yet it remained little known and understood while its counterparts sonar and radar became household words The story of HF DF s development and operation in combat by the U S Navy told here for the first time in revealing detail is a fascinating tale of determination and success Many countries including Germany had known about the technology of direction finding for some time but none had been able to develop an adequate shipborne device This left Admiral Donitz confident that his U boats had little to fear Simultaneously a brilliant young French engineer working for ITT in the United States managed to create a device that was both dependable and practical Eventually the British produced a shipborne HF DF that they used to good effect in the North Atlantic This book demonstrates how the vital American version was produced and aggressively promoted by private enterprise to top American military officials The author describes its acquisition by the U S Navy and the joint effort by the Navy and ITT to see that the device was properly installed and personnel adequately trained in its operation

Hunt and Kill Theodore P. Savas, 2022-05-20 One of WWII s pivotal events was the capture of U 505 on June 4 1944 The top secret seizure of this massive Type IX submarine provided the Allies with priceless information on German technology and innovation After the war U 505 was transported to Chicago where today 1 000 000 visitors a year pass through her at the Museum of Science and Industry Hunt and Kill offers the first definitive study of U 505 The chapters cover her construction crew and commanders combat history general Type IX operations naval intelligence the eight fatal German mistakes that doomed the boat and her capture transportation and restoration for posterity The contributors to this fascinating volume a Who s Who of U boat historians include Erich Topp U Boat Ace commander of U 552 Eric Rust Naval Officers Under Hitler Timothy Mulligan Neither Sharks Nor Wolves Jak Mallman Showell Hitler s U boat Bases Jordan Vause Wolf Lawrence Patterson First U boat Flotilla Mark Wise Enigma and the Battle of the Atlantic Keith Gill Curator Museum of Science and Industry and Theodore Savas Silent Hunters Nazi Millionaires

America, Sea Power, and the World James C. Bradford, John F. Bradford, 2022-11-29 The gold standard in college level American naval history texts edited by the foremost scholar in the field In the newly revised second edition of *America Sea Power and the World* a team of distinguished researchers delivers an extensive and authoritative survey of American naval history the place of the United States in world affairs and the role of that country s naval forces during peacetime and wartime Each chapter contains a comprehensive analysis of its subject as well as brief sidebars describing a key weapon or technological development of the era and a short biographical sketch of an influential leader or representative of the navy from that era The book offers extensive illustration and maps and a throughgoing emphasis on naval policy strategy roles and missions with careful attention paid to naval

operations These factors given greater focus than the descriptions of battle tactics found in other texts Readers will also find A thorough introduction to sea power and the modern state system as well as the American War for Independence at sea Comprehensive explorations of the genesis of the United States Navy from 1785 to 1806 Practical discussions of the Naval War of 1812 and the Confirmation of Independence from 1807 to 1815 and the Squadron Navy as an agent of the commercial empire until 1890 Fulsome treatments of the Second World War in the Atlantic Mediterranean and the Pacific including defensive actions in the Pacific from 1937 to 1943 and offensive actions from 1943 to 1944 New chapters exclusive to the 2nd edition focused on the history of African Americans and women in the US Navy the development of joint operations and unified command and the naval history of the last two decades Perfect for undergraduate students taking courses on the naval history of the United States America Sea Power and the World Second Edition will also earn a place in the libraries of members of the general public interested in naval and military history

European Navies and the Conduct of War Carlos Alfaro-Zaforteza, Alan James, Malcolm H Murfett, 2018-07-17 European Navies and the Conduct of War considers the different contexts within which European navies operated over a period of 500 years culminating in World War Two the greatest war ever fought at sea Taking a predominantly continental point of view the book moves away from the typically British centric approach taken to naval history as it considers the role of European navies in the development of modern warfare from its medieval origins to the large scale industrial total war of the twentieth century Along with this growth of navies as instruments of war the book also explores the long rise of the political and popular appeal of navies from the princes of late medieval Europe to the enthusiastic crowds that greeted the modern fleets of the great powers followed by their reassessment through their great trial by combat firmly placing the development of modern navies into the broader history of the period Chronological in structure European Navies and the Conduct of War is an ideal resource for students and scholars of naval and military

history *Grace Hopper* Kathleen Broome Williams, 2013-01-15 When Grace Hopper retired as a rear admiral from the U S Navy in 1986 she was the first woman restricted line officer to reach flag rank and at the age of seventy nine the oldest serving officer in the Navy A mathematician by training who became a computer scientist the eccentric and outspoken Hopper helped propel the Navy into the computer age She also was a superb publicist for the Navy appearing frequently on radio and television and quoted regularly in newspapers and magazines Yet in spite of all the attention she received until now Amazing Grace as she was called has never been the subject of a full biography Kathleen Broome Williams looks at Hopper s entire naval career from the time she joined the WAVES and was sent in 1943 to work on the Mark I computer at Harvard where she became one of the country s first computer programmers Thanks to this early Navy introduction to computing the author explains Hopper had a distinguished civilian career in commercial computing after the war gaining fame for her part in the creation of COBOL The admiral s Navy days were far from over however and Williams tells how Hopper already past retirement age was recalled to active duty at the Pentagon in 1967 to standardize computer programming languages for Navy computers Her temporary appointment lasted for nineteen years while she standardized COBOL for the entire department of defense Based on extensive interviews with colleagues and family and on archival material never before examined this biography not only illuminates Hopper s pioneering accomplishments in a field that came to be dominated by men but provides a fascinating overview of computing from its beginnings in World War II to the late 1980s *The Machine in Neptune's Garden* Helen M. Rozwadowski, David K. Van Keuren, 2004 **Imponderable but Not Inevitable** Malcolm H. Murfett, 2009-11-12 This book fills an important gap in the literature of modern warfare by focusing on random elements in warfare often overlooked in both the planning and execution of military operations factors that can turn certain success into devastating failure By definition the unforeseeable cannot be seen but one way to bring more variables under consideration when planning a military action is to review those instances where the unforeseeable changed everything For professionals and enthusiasts alike *Imponderable But Not Inevitable Warfare in the 20th Century* does just that reviewing specific instances in 20th century warfare when things did not go according to plan *Imponderable but Not Inevitable* uses case studies to expose the Inevitability Syndrome exploring the role of luck fate and randomness in influencing both victory and defeat In essays drawn from World War II Konfrontasi the Vietnam War and the Gulf War a distinguished set of military experts looks at real scenarios of inexplicable losses illustrating why nothing nothing should be taken for granted in war

Dawn of the Electronic Age Frederik Nebeker, 2009-05-06 A comprehensive and fascinating account of electrical and electronics history Much of the infrastructure of today s industrialized world arose in the period from the outbreak of World War I to the conclusion of World War II It was during these years that the capabilities of traditional electrical engineering generators power transmission motors electric lighting and heating home appliances and so on became ubiquitous Even more importantly it was during this time that a new type of electrical engineering electronics emerged Because of its

applications in communications both wire based and wireless entertainment notably radio the phonograph and sound movies industry science and medicine and the military the electronics industry became a major part of the economy Dawn of the Electronic Age explores how this engineering knowledge and its main applications developed in various scientific economic and social contexts and explains how each was profoundly affected by electrical technologies It takes an international perspective and a narrative approach unfolding the story chronologically Though a scholarly study with sources of information given in endnotes for engineers and historians of science and technology the book is intended for the general public Ultimately it tells the story of the development of a new realm of engineering and its widespread applications during the remarkable and tragic period of two world wars and the decades in between *Naval Warfare 1919-45* Malcolm H. Murfett, 2008-11-04 *Naval Warfare 1919 45* is a comprehensive history of the war at sea from the end of the Great War to the end of World War Two Showing the bewildering nature and complexity of the war facing those charged with fighting it around the world this book ranges far and wide sweeping across all naval theatres and those powers performing major as well as minor roles within them Armed with the latest material from an extensive set of sources Malcolm H Murfett has written an absorbing as well as a comprehensive reference work He demonstrates that superior equipment and the best intelligence ominous power and systematic planning vast finance and suitable training are often simply not enough in themselves to guarantee the successful outcome of a particular encounter at sea Sometimes the narrow difference between victory and defeat hinges on those infinite variables the individual s performance under acute pressure and sheer luck *Naval Warfare 1919 45* is an analytical and interpretive study which is an accessible and fascinating read both for students and for interested members of the general public
