

Rivers

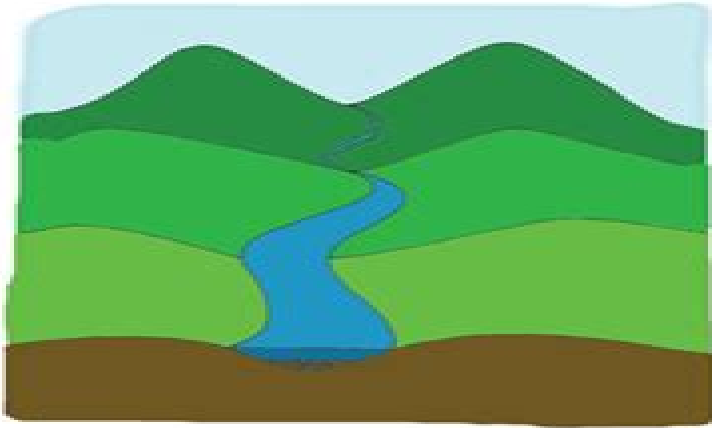

What is a river?

Rivers are **channels** of fresh water which flow downhill towards a lake or ocean. They start as tiny streams, high up in mountains or hills. Rivers are very important because plants, animals and humans need water to live.

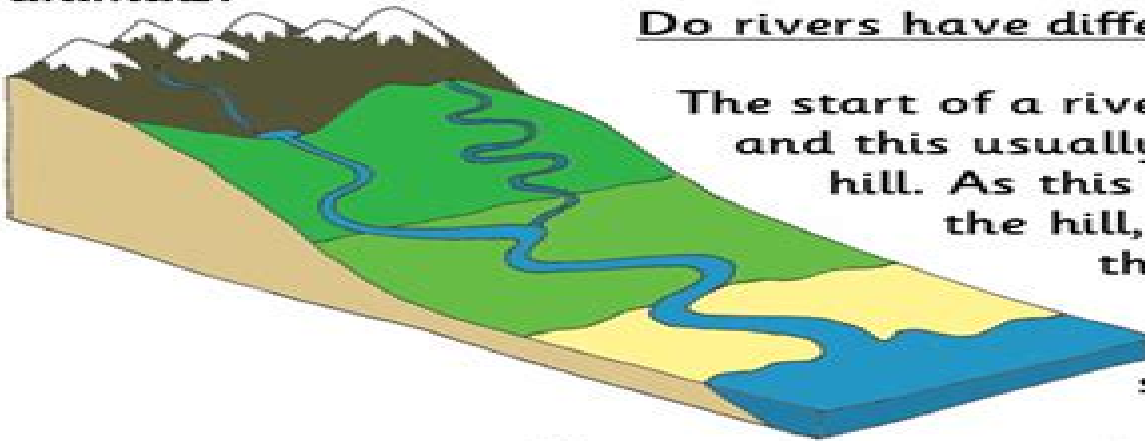

Do rivers have different parts?

The start of a river is called the **source** and this usually starts in a mountain or hill. As this tiny stream travels down the hill, it becomes bigger and the water flows more slowly. The stream is joined by other streams called **tributaries**.

What are rivers used for?

Water from rivers is used for washing, cooking and drinking. Farmers use rivers to water their **crops**. **Barges** and boats use rivers to **transport** people and **cargo**. Rivers are homes to many plants and animals.
