The Quality Management Sourcebook Christine Avery, Diane Zabel, 2002-09-11 The concept of Quality Management began in the manufacturing sector but a growing concern with quality in other areas of the economy has led to its wider application in service industries government education and other not for profit agencies A great quantity of material related to quality management has been produced in recent years much of it by small presses professional and trade associations and consultants The Quality Management Sourcebook is the first in depth international guide to the most useful material and sources of information The book begins with the origins of quality management explains how it evolved examines its current situation and explores the future The book is divided into five main sections Introduction General sources for information Applications of total quality management Focus on specific aspects of quality management Quality in the future Resource materials The Quality Management Sourcebook is an essential reference for everybody involved in either the theory or practice of quality management in manufacturing retail banking and insurance the utilities industry the transportation industry health education and other public services Over 900 citations cover books journal articles technical reports video training materials and software Each is followed by a descriptive annotation Resource materials include strategies for locating additional information training materials organizations and consultants The book concludes with a glossary of quality management terms a name index a title index and a detailed subject index

Software Maintenance - A Management Perspective Phaneendra Nath Vellanky, 2007-10-23 Computer systems play an important role in our society Software drives those systems Massive investments of time and resources are made in developing and implementing these systems Maintenance is inevitable It is hard and costly Considerable resources are required to keep the systems active and dependable We cannot maintain software unless maintainability characters are built into the products and processes There is an urgent need to reinforce software development practices based on quality and reliability principles Though maintenance is a mini development lifecycle it has its own problems Maintenance issues need corresponding tools and techniques to address them Software professionals are key players in maintenance While development is an art and science maintenance is a craft We need to develop maintenance personnel to master this craft Technology impact is very high in systems world today We can no longer conduct business in the way we did before That calls for reengineering systems and software Even reengineered software needs maintenance soon after its implementation We have to take business knowledge procedures and data into the newly reengineered world Software maintenance people can play an important role in this migration process Software

technology is moving into global and distributed networking environments Client server systems and object orientation are on their way Massively parallel processing systems and networking resources are changing database services into corporate data warehouses Software engineering environments rapid application development tools are changing the way we used to develop and maintain software Software maintenance is moving from code maintenance to design maintenance even onto specification maintenance Modifications today are made at specification level regenerating the software components testing and integrating them with the system Eventually software maintenance has to manage the evolution and evolutionary characteristics of software systems Software professionals have to maintain not only the software but the momentum of change in systems and software In this study we observe various issues tools and techniques and the emerging trends in software technology with particular reference to maintenance We are not searching for specific solutions We are identifying issues and finding ways to manage them live with them and control their negative impact **Global, Social, and**
