Secrets in Families and Family Therapy Evan Imber-Black, 1993-01-01 Secret keeping is a seemingly unavoidable part of human interaction from governments to married couples Unlike privacy which in the West is considered a healthy characteristic of the autonomous adult secrets are often troublesome creating distorted perceptions and strained relationships Secrets moreover are complex They differ in significance a surprise party versus hidden incest in the ways they shape family relationships who knows what about whom in their location between family members or between the family and society and in their effects on individual functioning Does the secret affect only one relationship or the overall way the individual responds to others Because of this complexity secrets are resistant to simple rules Therapy must comprise more than opening up the secret or addressing only the context and not the content or vice versa Therapists are confronted with the difficult task of examining their own values regarding secrecy while at the same time providing an effective therapeutic environment Practical issues of individual safety the meaning of the secret for the family the therapist's attitude towards secrets in general and the family's secret in particular all must be considered in order for treatment to be effective Here Imber Black and her contributors offer a vast array of approaches to helping families deal with secrets involving sexuality race violence parentage substance abuse illness and death The contributors explore the therapeutic social and political issues of secrets while always keeping families firmly in mind Through the many case examples they show us how families at first constricted by the need to maintain secrecy can gain strength through greater openness Part I sets the stage by defining secrets and their often shame bound origins Part II examines secrets throughout the family life cycle in couples between parents and children and with loss Part III shows how addictions such as drug abuse and eating disorders are often symptoms of unhealthy secrets In Part IV secrets of violence and abuse are discussed Part V offers a comprehensive look at social secrets involving sexism heterosexism and taboos Part VI discusses two very charged topics secret keeping involving race and racism and with AIDS Part VII concludes the book by offering a pattern for teaching and handling secrets in therapist training This diverse cast of talented therapists provides an elastic model for treating family secrets while compelling us to reevaluate our own thinking about secrets

Families and Larger Systems Evan Imber-Black, 1992-06-01 If individuals cannot adequately be understood without reference to the family system families themselves are comprehensible only in a broader social context FAMILIES AND LARGER SYSTEMS is the first single author book on families and larger systems designed specifically for the practicing therapist It offers rich descriptions of the difficulties families and larger systems often pose for one another presents a detailed assessment model for therapists and provides a careful interviewing format as well as directions for designing creative interventions Imber Black offers a consultation model for dealing with families and larger systems who have become embroiled with one another and methods for longer term work with those families who must engage with larger systems across significant portions of their life cycle due to illness handicaps or poverty Problems of labeling stigma and secrecy in families are addressed and an entire chapter is devoted to women's issues in families and related systems Utilizing numerous case illustrations and interview excerpts Dr Imber Black first delineates the problems common to family larger system situations analyzing the origins of these interactions the assessment model and interviewing methods used and the design and implementation of intervention In the second half of her book she presents in depth discussions of strategies for improving the relationship between families and related systems Through concrete example and hands on analysis Imber Black shows how the misconceptions assumptions and subsequent labeling of family functioning and family members give rise to stalemated situations FAMILIES AND LARGER SYSTEMS provides a practical guide for all clinicians regardless of theoretical orientation Therapists who wish to maintain a career in public sector settings such as mental health clinics hospitals and schools will find in this volume direction for effective work with families and the maintenance of good working relationships with colleagues Therapists in private practice will discover that Imber Black's model will aid their conceptualization of cases that have involved multiple therapists or other practitioners Much of the material presented will also be useful to human services workers both professional and paraprofessional in welfare child welfare probation drug counseling schools and other institutions The book's ecological viewpoint which enables such professionals to see their own position in the system also helps them to avoid the traps of replicating existing patterns and to position themselves for therapeutic change Finally this book will be of interest to human service system administrators and program planners The case examples offer a seldom seen view of the struggles families and multiple helpers can have with one another while its
