Secrets Of Ancient And Sacred Places:

Secrets of Ancient and Sacred Places Paul Devereux, 1999-06-23 This unique book provides a new perspective on the past and reveals how sights we all know and which are universally recognised still retain and reveal to us the old knowledge of our world and our ancestors In our march of progress we have gained untold material wealth but certain vital aspects of being human conscious and part of nature seem to have slipped from our grasp Guidelines that might help our future way ironically lie in the past In short we need to discover the secrets of ancient and sacred places Paul Devereux takes a refreshing look at the often hidden ignored or often overlooked aspects of selected major sites world wide that significantly UNESCO the cultural agency of the United Nations has also included in its world heritage list of important natural or cultural sites

Secrets of Ancient and Sacred Places Paul Devereaux, 1992 **Encyclopedia of Sacred Places** Norbert C. Brockman, 2011-09-13 Now thoroughly revised and updated this encyclopedia documents the diversity of shrines temples holy places and pilgrimage sites sacred to the world s major religious traditions and illustrates their elemental place in human culture As interest increases in the role of world religions in history and international affairs the new edition of Encyclopedia of Sacred Places which arrives 15 years after the publication of the original edition provides new and updated information on site specific religious practice and spiritually significant locations around the globe While many of the entries describe specific places like the Erawan Shrine and the Rock of Cashel others examine types of sacred sites pilgrimages and practices With articles that describe both the places and their associated traditions and history this reference book reveals the enormous diversity and cultural significance of religious practice worldwide For students and teachers of classes ranging from high school geography to university level courses in religious studies geography anthropology and sociology this book provides essential reference on places of great significance to the world s various faith traditions

Transpersonal Ecosophy, Vol. 1: Theory, Methods and Clinical Assessments Mark A. Schroll, 2016-01-24 The image on the cover of this book represents the idea that brain state alterations at sacred sites allow us to re experience memories that are woven into the morphogenetic fields of that place an idea that originates with Paul Devereux s empirical enquiry into dreams at sacred sites in Wales and England This books examines how this investigation provides us with a new way of understanding consciousness and a new direction toward a reconciliation of the divorce between matter and spirit We explore the work of David Lukoff and Stanislov and Christina Grof the connections between the varieties of transformative experience in dream studies ecopsychology transpersonal psychology and the anthropology of consciousness as well as the overlap between David Bohm s interpretation of quantum theory and Rupert Sheldrake s hypothesis of formative causation

Secret Societies Philip Gardiner, 2025-09-12 With his recent best selling books and hundreds of articles as well as radio and TV appearances Philip Gardiner has started a crusade for uncovering the truth and nothing could be more indicative of that search than his latest foray into the dark and often sinister world of secret societies Yet again Gardiner finds himself on a journey across the

world to uncover the ancient secrets of the world's most powerful men. In one dramatic episode he finds himself driven out of Berlin in a black Mercedes by a secret organization that was believed to have disappeared after the second World War and eventually arrives in a modern Nazi watering hole. Gardiner however survives this incredible journey and brings us the secrets of the Order held sacred for so long. Gardiner delves into a world that is often hidden from our eyes and finds himself in situations that seem to mirror the fictional world of the Da Vinci Code. Throughout Secret Societies Gardiner Uncover an ancient secret society thought to have died out many years ago. Gets to the core of the secret societies belief systems. Explores the secret origins of Freemasonry and the links to secret Serpent Cults. Investigates the secret hidden meaning of King Arthur and Robin Hood. Examines the claimants to the name of Illuminati and analyzes the history of the group in Europe and America. Reveals the secret links within the Vatican and the Nazi Party. Looks in depth at the white powdered gold theory supposedly kept secret by orders throughout time and radically re appraises it. Shows the link between the so called enlightenment experience and the control of our minds. Nobody in the genre involves themselves in the tale in the same way that Gardiner does and here he shows that the search for ultimate truth can often be a terrifying one.
