Rafael Viñoly Rafael Viñoly, 2002-11-21 Rafael Viñoly became famous as the architect of the stunning Tokyo International Forum 1989 1996 In Japan where land is at a premium and public spaces are rare the Forum with its 2.7 hectares and unusual design of public space was widely admired Originating in Uruguay Viñoly heads an architectural office with an impressive list of projects in the areas of architecture urban planning and interior design including significant buildings such as the Philadelphia Regional Performing Arts Center which opened recently Princeton University Stadium the New Bronx Supreme Criminal Court Complex In 1969 Viñoly founded his first office in Buenos Aires which was influenced by the Modern Movement but also by the ideas and concepts of the 1960s reflected in the work of Buckminster Fuller Archigram and the Smithsons Due to the political situation he emigrated and opened an office in New York in 1982 Despite the difficulties involved in starting over again in a new country where in the meantime post modernism was prevalent Viñoly stayed true to his style of architecture feeling bound to the ethical considerations of modernism yet constantly questioning it adapting it to changing conditions With offices in New York and Tokyo Rafael Viñoly Architects is now one of the most successful architectural offices worldwide This book documents a large number of Viñoly's most significant buildings and projects It also includes an essay by Joan Ockman one of the best known architecture theoreticians in the USA and texts by Rafael Viñoly on his career which has been marked by the difficult political situation in Argentina and the cultural exchange between S America Europe and the USA **Federal Register**, 1985 **Encyclopedia of Twentieth Century**

Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries *Architecture as Cultural and Political Discourse* Daniel Grincer, 2016-02-26 This book is concerned with cultural and political discourses that affect the production of architecture It examines how these discursive mechanisms and technologies combine to normalise and aestheticise everyday practices It queries the means by which buildings are appropriated to give shape and form to political aspirations and values Architecture is not overtly political It does not coerce people to behave in certain ways However architecture is constructed within the same rules and practices whereby people and communities self govern and regulate themselves to think and act in certain ways This book seeks to examine these rules through various case studies including the reconstructed Notre Dame Cathedral the Nazi era Munich Königsplatz Auschwitz concentration camp and the Prora resort Sydney's suburban race riots and the Australian Immigration Detention Centre on Christmas Island Introducing

Architectural Tectonics Chad Schwartz, 2025-08-29 The second edition of *Introducing Architectural Tectonics* is an exploration of the poetics of construction. Tectonic theory is an integrative philosophy examining the relationships formed between design, construction, and space while creating or experiencing a work of architecture. In this text, author Chad Schwartz presents an introductory investigation into tectonic theory, subdividing it into distinct concepts in order to make it accessible to beginning and advanced students alike. The book centers on the tectonic analysis of twenty contemporary works of architecture located in over a dozen countries across the globe: Germany, Italy, Burkina Faso, the United States, Chile, Japan, Bangladesh, Mexico, Spain, Australia, and more, and designed by notable architects such as Tadao Ando, Herzog & de Meuron, Kengo Kuma, Peter Zumthor, Xu Tiantian, and Francis K. R. Although similarities do exist between the projects, their distinctly different characteristics and range of interpretations of tectonic expression provide the most significant lessons to help you learn about tectonic theory. This second edition has been updated to include the tectonic analysis of four new architectural precedents: From Nigeria, the Makoko Floating School by NL; From Burkina Faso, Lycée Schorge by K. R. Architecture; From Mexico, the Matamoros Public Market by Colectivo C733; From China, Quarry 8 by DnA. Design and Architecture. Written in clear, accessible language, these investigations examine the poetic potential of architecture, presenting lessons and concepts that you can integrate into your own work, whether studying in a university classroom or practicing in a professional office.

Some Assembly Required Michael Sorkin, One of the best architecture critics writing today presents a new collection which previews the state of contemporary architecture and surveys the dramatic changes in the urban environment of the last decade. **Massimo Scolari** Sara Richardson, 1988 **Analogical Thinking in Architecture** Jean-Pierre Chupin, 2023-07-27 This book provides an in-depth exploration of the rich and persistent use of analogical thinking in the built environment. Since the turn of the 21st century, design thinking has permeated many fields outside of the design disciplines. It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box. This book argues that these qualities have long been supported by analogical thinking, an agile way of reasoning in which to think the unknown through the familiar. The book is organized into four case studies: the first reviews analogical models that have been at the heart of design thinking; representations from the 1960s to the present day; the second investigates the staying power of biological analogies; the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts; while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse. Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present, the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions. These visual and textual operations are explained through 36 analogical plates which can be read as an intertext demonstrating how analogy has the power to reconcile design and theories. Theorizing a New Agenda for Architecture: Kate Nesbitt, 1996-03

Theorizing a New Agenda for Architecture An Anthology of Architectural Theory collects in a single volume the most significant essays on architectural theory of the last thirty years A dynamic period of reexamination of the discipline the postmodern era produced widely divergent and radical viewpoints on issues of making meaning history and the city Among the paradigms presented are architectural postmodernism phenomenology semiotics poststructuralism deconstruction and feminism By gathering these influential articles from a vast array of books and journals into a comprehensive anthology Kate Nesbitt has created a resource of great value Indispensable to professors and students of architecture and architectural theory Theorizing a New Agenda also serves practitioners and the general public as Nesbitt provides an overview a thematic structure and a critical introduction to each essay The list of authors in Theorizing a New Agenda reads like a Who's Who of contemporary architectural thought Tadao Ando Giulio Carlo Argan Alan Colquhoun Jacques Derrida Peter Eisenman Marco Frascari Kenneth Frampton Diane Ghirardo Vittorio Gregotti Karsten Harries Rem Koolhaas Christian Norberg Schulz Aldo Rossi Colin Rowe Thomas Schumacher Ignasi de Sol Morales Rubi Bernard Tschumi Robert Venturi and Denise Scott Brown and Anthony Vidler A bibliography and notes on all the contributors are also included *Union List of Artist Names: Q-Z*, 1994

The Sources of International Law Hugh Thirlway, 2019-04-04 This new edition of Hugh Thirlway's authoritative text provides an introduction to one of the fundamental questions of the discipline what is and what is not a source of international law Traditionally treaties between states and state practice were seen as the primary means with which to create international law However more recent developments have recognized customary international law alongside international treaties and instruments as a key foundation upon which international law is built This book provides an insightful inquiry into all the recognized or asserted sources of international law It investigates the impact of ethical principles on the creation of international law whether soft law norms come into being through the same sources as binding international law and whether jus cogens norms and those involving rights and obligations erga omnes have a unique place in the creation of international legal norms It studies the notion of general principles of international law within international law's sub disciplines and the evolving relationship between treaty based law and customary international law Re-examining the traditional model it investigates the increasing role of international jurisprudence and looks at the nature of international organisations and non state actors as potential new sources of international law This revised and updated book provides a perfect introduction to the law of sources as well as innovative perspectives on new developments making it essential reading for anyone studying or working in international law **Postmodern Visions** Heinrich Klotz, Volker Fischer, 1985

Pastoral Capitalism Louise A. Mozingo, 2016-05-27 How business appropriated the pastoral landscape as seen in the corporate campus the corporate estate and the office park By the end of the twentieth century America's suburbs contained more office space than its central cities Many of these corporate workplaces were surrounded somewhat incongruously by verdant vistas of broad lawns and leafy trees In *Pastoral Capitalism* Louise Mozingo describes the evolution of these central

but often ignored features of postwar urbanism in the context of the modern capitalist enterprise. These new suburban corporate landscapes emerged from a historical moment when corporations reconceived their management structures: the city decentralized and dispersed into low density auto dependent peripheries and the pastoral in the form of leafy residential suburbs triumphed as an American ideal. Greenness writes Mozingo was associated with goodness and pastoral capitalism appropriated the suburb's aesthetics and moral code. Like the lawn proud suburban homeowner corporations understood a pastoral landscape's capacity to communicate identity status and right mindedness. Mozingo distinguishes among three forms of corporate landscapes: the corporate campus, the corporate estate and the office park and examines suburban corporate landscapes built and inhabited by such companies as Bell Labs, General Motors, Deere Company and Microsoft. She also considers the globalization of pastoral capitalism in Europe and the developing world including Singapore, India and China. Mozingo argues that even as it is proliferating pastoral capitalism needs redesign as do many of our metropolitan forms for pressing social, cultural, political and environmental reasons. Future transformations are impossible however unless we understand the past. Pastoral Capitalism offers an indispensable chapter in urban history examining not only the design of corporate landscapes but also the economic, social and cultural models that determined their form.

The Architecture of Modern Italy Terry Kirk, 2005-06-02. Modern Italy may sound like an oxymoron. For Western civilization Italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation. Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity. We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting. The ancient forum, medieval cloisters, baroque piazzas and papal palaces constitute our ideal itinerary of Italian civilization. The Campo of Siena, Saint Peter's all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations. As seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of Italy. The learning of history is always a complex task, one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years. Culture on the peninsula continues to evolve with characteristic vibrancy. Italy is not a museum. To think of it as such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the Italian cultural condition and the writing of history itself.

Historic Cities Jeff Cody, Francesco Siravo, 2019-07-30. This new volume in the GCI's Readings in Conservation series brings together a selection of seminal writings on the conservation of historic cities. This book, the eighth in the Getty Conservation Institute's Readings in Conservation series, fills a significant gap in the published literature on urban conservation. This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide; no single volume has presented a comprehensive selection of these important

writings until now This anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability With more than sixty five texts ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered The book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development

Design Actions for Shifting Conditions Fabrizia Berlingieri,Roberto Cavallo,Emilia Corradi,Hans de Boer,2022-09-06 A spatial lens on Climate Change dynamics in urban transitions considering the growing importance that the urban environments assume within contemporary territorial transformations yet little room is offered within market driven societies to critically reflect the spatial impact that cities face vis vis the urgencies for environmental rebalancing It embraces a wide range of phenomena we all live and experience nowadays not only incidentally but more in a structural way forcing us to rethink our present state and explore futures Transitions embody the fluctuating form of late capitalism with its raisings and disruptions Regarding the environmental conditions they are affecting the world regions habitability the phenomenon of progressive urbanization versus agricultural land abandonment UN 2018 With these premises transitions seem to be a proper reference for an interdisciplinary and conceptual frame addressing the transformation of urban and metropolitan contexts which will be the leading players for the coming decades Funders DASTU Territorial Fragilities Research Project funded by the Italian Ministry of Education Universities

BIM Design Richard Garber,2014-08-11 Building information modelling BIM is revolutionising building design and construction For architects

BIM has the potential to optimise their creativity while reducing risk in the design and construction process thus giving them a more significant role in the building process This book demonstrates how innovative firms are using BIM technologies to move design away from the utilitarian problems of construction engaging them in a stunning new future in the built environment Whereas recent books about BIM have tended to favour case study analyses or instruction on the use of specific software BIM Design highlights how day to day design operations are shaped by the increasingly generative and collaborative aspects of these new tools BIM strategies are described as operations that can enhance design rather than simply make it more efficient Thus this book focuses on the specific creative uses of information modelling at the operational level including the creative development of parametric geometries and generative design the evaluation of environmental performance and the simulation and scheduling of construction fabrication operations This book also engages BIM's pragmatic efficiencies such as the conflict checking of building systems and the creation of bills of quantities for costing and in so doing it demonstrates how BIM can make such activities collaborative Throughout projects are used to illustrate the creative application of BIM at a variety of scales These buildings showcase work by firms executing projects all over the world SHoP Architects and Construction New York Morphosis Los Angeles Populous London GRO Architects New York Reiser Umemoto New York Gensler Shanghai and UNStudio Amsterdam Avery Index to Architectural Periodicals, 2d Ed., Rev. and Enl Avery Library, 1992

The Cybernetic Brain Andrew Pickering, 2010-04-15 Cybernetics is often thought of as a grim military or industrial science of control But as Andrew Pickering reveals in this beguiling book a much more lively and experimental strain of cybernetics can be traced from the 1940s to the present The Cybernetic Brain explores a largely forgotten group of British thinkers including Grey Walter Ross Ashby Gregory Bateson R D Laing Stafford Beer and Gordon Pask and their singular work in a dazzling array of fields Psychiatry engineering management politics music architecture education tantric yoga the Beats and the sixties counterculture all come into play as Pickering follows the history of cybernetics impact on the world from contemporary robotics and complexity theory to the Chilean economy under Salvador Allende What underpins this fascinating history Pickering contends is a shared but unconventional vision of the world as ultimately unknowable a place where genuine novelty is always emerging And thus Pickering avers the history of cybernetics provides us with an imaginative model of open ended experimentation in stark opposition to the modern urge to achieve domination over nature and each other
