Louis I. Kahn's Jewish Architecture Susan G. Solomon, 2015-05-01 In 1961 famed architect Louis I Kahn 1901-1974 received a commission to design a new synagogue His client was one of the oldest Sephardic Orthodox congregations in the United States Philadelphia's Mikveh Israel Due to the loss of financial backing Kahn's plans were never realized Nevertheless the haunting and imaginative schemes for Mikveh Israel remain among Kahn's most revered designs Susan G Solomon uses Kahn's designs for Mikveh Israel as a lens through which to examine the transformation of the American synagogue from 1955 to 1970 She shows how Kahn wrestled with issues that challenged postwar Jewish institutions and evaluates his creative attempts to bridge modernism and Judaism She argues that Kahn provided a fresh paradigm for synagogues one that offered innovations in planning decoration and the incorporation of light and nature into building design

Utopias and Architecture Nathaniel Coleman,2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re invention of what is Through a detailed and innovative re assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture *Trajectories in Architecture* Michael Jasper,2023-04-21 *Trajectories in Architecture* Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date *Trajectories in Architecture* adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture s recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture s traditions and design principles and their future expression *Trajectories in Architecture* includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei *Structures and Architecture* Paulo J. Cruz,2013-06-27 Although the disciplines of architecture and structural engineering have both experienced their own historical development their interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persua **The Architecture of Ruins** Jonathan Hill,2019-03-25 *The Architecture of Ruins* Designs on the Past Present and Future identifies an alternative and significant

history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change
