Exercises on Morris's grammar John Wetherell, 1882 *Korean* Ho-min Sohn, 2019-08-21 This work first published in 1994 provides a framework which covers the major aspects of contemporary standard Korean and allows cross language comparisons It offers a wide ranging and comprehensive grammatical description of Korean covering syntax morphology phonology ideophone interjections and lexicon Triangulating Methodological Approaches in Corpus Linguistic Research Paul Baker, Jesse Egbert, 2016-06-10 Contemporary corpus linguists use a wide variety of methods to study discourse patterns This volume provides a systematic comparison of various methodological approaches in corpus linguistics through a series of

parallel empirical studies that use a single corpus dataset to answer the same overarching research question Ten contributing experts each use a different method to address the same broadly framed research question In what ways does language use in online Q A forum responses differ across four world English varieties India Philippines United Kingdom and United States Contributions will be based on analysis of the same 400 000 word corpus from online Q A forums and contributors employ methodologies including corpus based discourse analysis audience perceptions Multi Dimensional analysis pragmatic analysis and keyword analysis In their introductory and concluding chapters the volume editors compare and contrast the findings from each method and assess the degree to which triangulating multiple approaches may provide a more nuanced understanding of a research question with the aim of identifying a set of complementary approaches which could arguably take into account analytical blind spots Baker and Egbert also consider the importance of issues such as researcher subjectivity type of annotation the limitations and affordances of different corpus tools the relative strengths of qualitative and quantitative approaches and the value of considering data or information beyond the corpus Rather than attempting to find the best approach the focus of the volume is on how different corpus linguistic methodologies may complement one another and raises suggestions for further methodological studies which use triangulation to enrich corpus related research

Noun Phrase Structure in the Languages of Europe Frans Plank, 2008-08-22 The result of over five years of close collaboration among an international group of leading typologists within the EUROTYPE program this volume is about the morphology and syntax of the noun phrase Particular attention is being paid to nominal inflectional categories and inflectional systems and to the syntax of determination modification and conjunction Its areal focus like that of other EUROTYPE volumes is on the languages of Europe but in order to appreciate what is peculiarly European about their noun phrases a more comprehensive and genuinely typological view is being taken at the full range of cross linguistic variation within this structural domain There has been no shortage lately of contributions to the theory of noun phrase structure the present volume is however unique in the extent to which its theorizing is empirically grounded
