The Slain God Timothy Larsen, 2014-08-28 Throughout its entire history the discipline of anthropology has been perceived as undermining or even discrediting Christian faith Many of its most prominent theorists have been agnostics who assumed that ethnographic findings and theories had exposed religious beliefs to be untenable E B Tylor the founder of the discipline in Britain lost his faith through studying anthropology James Frazer saw the material that he presented in his highly influential work *The Golden Bough* as demonstrating that Christian thought was based on the erroneous thought patterns of savages On the other hand some of the most eminent anthropologists have been Christians including E E Evans Pritchard Mary Douglas Victor Turner and Edith Turner Moreover they openly presented articulate reasons for how their religious convictions cohered with their professional work Despite being a major site of friction between faith and modern thought the relationship between anthropology and Christianity has never before been the subject of a book length study In this groundbreaking work Timothy Larsen examines the point where doubt and faith collide with anthropological theory and evidence

Performing Interpersonal Violence Werner Riess, 2012-01-27 This book offers the first attempt at understanding interpersonal violence in ancient Athens While the archaic desire for revenge persisted into the classical period it was channeled by the civil discourse of the democracy Forensic speeches curse tablets and comedy display a remarkable openness regarding the definition of violence But in daily life Athenians had to draw the line between acceptable and unacceptable behavior They did so by enacting a discourse on violence in the performance of these genres during which complex negotiations about the legitimacy of violence took place Performances such as the staging of trials and comedies ritually defined the meaning of violence and its appropriate application Speeches and curse tablets not only spoke about violence but also exacted it in a mediated form deriving its legitimate use from a democratic principle the communal decision of the human jurors in the first case and the underworld gods in the second Since discourse and reality were intertwined and the discourse was ritualized actual violence might also have been partly ritualized By still respecting the on going desire to harm one's enemy this partial ritualization of violence helped restrain violence and thus contributed to Athens relative stability

Boundaries of Self and Other in

Ghanaian Popular Culture Joseph K. Adjaye, 2004-03-31 Rituals are among the most enduring aspects of the African cultural landscape. They appear to exist outside of time, eternal and unchanging. Joseph Adjaye argues that while rituals may seem to be static in reality, they are dynamic and changing. Through intense analysis of child naming ceremonies, libations, puberty initiation, rights, funerals, and two major Ghanaian festivals, Adjaye explores the interplay between ritual and audience interaction and participation. By so doing, he shows the many ways rituals have provided Ghanaians with a means to conceptualize and change their present and shape their future. In other words, rituals help individuals escape the boundaries of self by promoting a sense of collective purpose and agency. This book will appeal to not only Africanists but to readers interested in the roles rituals play in their own lives and the ways that rituals encourage socially transforming initiatives.

Liminality and the Modern Bjørn Thomassen, 2016-05-06 This book provides the history and genealogy of an increasingly important subject: liminality. Coming to the fore in recent years in social and political theory and extending beyond is original use as developed within anthropology, liminality has come to denote spaces and moments in which the taken-for-granted order of the world ceases to exist and novel forms emerge, often in unpredictable ways. *Liminality and the Modern* offers a comprehensive introduction to this concept, discussing its development and laying out a conceptual and experiential framework for thinking about change in terms of liminality. Applying this framework to questions surrounding the implosion of non-spaces, the analysis of major historical periods, and the study of political revolution, the book also explores its possible uses in social science research and its implications for our understanding of the uncertainty and contingency of the liquid structures of modern society. Shedding new light on a concept central to social thought as well as its capacity for pushing social and political theory in new directions, this book will be of interest to scholars across the social sciences and philosophy working in fields such as social, political, and anthropological theory, cultural studies, social and cultural geography, and historical anthropology and sociology. **The Hausa of Nigeria** Frank A.
