THE SECOND STEP : CHAPTER TWO

Second Chapter

Isaak Ilyich Rubin

Second Chapter:

The Mystical Element of Religion Friedrich von Hügel, 2021-05-07 Hügel's *The Mystical Element of Religion* features a critical but largely appreciative philosophy of mysticism. The author's three elements of religion are his most enduring contribution to theological thinking. The human soul, the movements of western civilization and the phenomena of religion itself he characterized by these three elements: the historical institutional element, the intellectual speculative element and the mystical experiential element. This typology provided for him an understanding of the balance, tension and friction that exists in religious thinking and in the complexity of reality and existence. It was an organizing paradigm that remained central to his project. The effort to hold these sometimes disparate dimensions together was structurally and theologically dominant throughout his writing. The main subject of Hügel's study are the life and teaching of Catherine of Genoa, 1447-1510, the Italian Roman Catholic saint and mystic, admired for her work among the sick and the poor and remembered because of various writings describing both these actions and her mystical experiences.

Contents: The Three Chief Forces of Western Civilization, The Three Elements of Religion, Catherine Fiesca Adorna's Life up to her Conversion and the Chief Peculiarities predominant throughout her Convert Years, Catherine's Life from 1473 to 1506 and its Main Changes and Growth, Catherine's Last Four Years, 1506-1510, Catherine's Doctrine, Catherine's Remains and Cultus, Battista Vernazza's Life, Psycho-physical and Temperamental Questions, The Main Literary Sources of Catherine's Conceptions, Catherine's Less Ultimate This World Doctrines, The After Life Problems and Doctrines, The First Three Ultimate Questions, The Two Final Problems, Mysticism and Pantheism, the Immanence of God, And Spiritual Personality, Human and Divine, Back Through Asceticism, Social Religion and the Scientific Habit of Mind to the Mystical Element of Religion.

Ulysses and the Poetics of Cognition Patrick Colm Hogan, 2013-09-05 Given *Ulysses* perhaps unparalleled attention to the operations of the human mind, it is unsurprising that critics have explored the work's psychology. Nonetheless, there has been very little research that draws on recent cognitive science to examine thought and emotion in this novel. Hogan sets out to expand our understanding of *Ulysses* as well as our theoretical comprehension of narrative and even our views of human cognition. He revises the main narratological accounts of the novel, clarifying the complex nature of narration and style. He extends his cognitive study to encompass the anti-colonial and gender concerns that are so obviously important to Joyce's work. Finally, through a combination of broad overviews and detailed textual analyses, Hogan seeks to make this notoriously difficult book more accessible to non-specialists.

N. I. Sorkar, 2022-03-16 This book puts forward a new angle of understanding the society of states in the milieu of the contemporary world The absence of a regulatory mechanism i e anarchy has been the fundamental issue of international relations This book explains how the normative imperatives information and communication technology ICT and nuclear deterrence generated ambiance have poised the states in a society where they are bound to follow certain normative imperatives that dilute the color and meaning of anarchy and obliges the states to act in a certain way It develops a theoretical proposition with regard to state power defined in terms of the capability of determining the outcomes The proposition first elaborates how international institutions foster normative imperatives then in line with this ontology it narrows down the focus solely on the power of the states in the contemporary world It explains how the power that can determine the outcome today is holistic in nature comprising both materialistic and normative factors In the next step it tailors the proposition in a way so as to employ it for a specific empirical work The book does not end just positing the theoretical proposition the proposition is testified through some case studies with regard to climate negotiations under the UNFCCC The empirical part not only serves to examine the plausibility of the theoretical proposition but it also presents the logic of the major actors and the politics with respect to some of the major issues of climate change i e mitigation funding policy and mechanism and adaptation The scholars in this arena climate activists and climate conscious people in general would find this book worth reading as it kindles a different angle to understand the issues in the context of the contemporary world and as it elaborates the logic framing process and mechanism of reaching outcomes through complex negotiation process No other work has so far analyzed the issues covering the entire period of 21 apex UNFCCC negotiations that led to the Paris Agreement Apart from university libraries this book thus has the prospect to be sold in the markets targeting the academicians climate change experts bureaucrats negotiators and the common readers Structures of European Civil Codes Ewelina Rogalska, The study presents ways of structuring civil codes on the basis of selected codifications from Central and Eastern Europe since the end of 18th century until the modern times In five chapters the author depicts the arrangement of an possible general part of the law of obligations of ius in re of family law and the law of persons as well as of inheritance law The focus of the study is searching the most common systematic patterns and the main differences between the socialist and bourgeois codifications **Essays on Marx's Theory of Value** Isaak Ilyich Rubin, 2025-02-20 This book is an English translation of Essays on Marx's Theory of Value first published by Isaak Illich Rubin in 1923 in the Soviet Union Rubin's book sparked a fierce value controversy with contemporary Soviet economists during the late 1920s As such the present translation is conceived as a variorum edition including for the first time in English all the essential supplementary
