Second Front Censorship And Propaganda In The Gulf War:

Second Front John R. MacArthur, 1993 The recipient of the 1992 Harry Kalven Freedom of Expression Award this study scrutinizes the US government's assault on the constitutional freedom of the American media during Operation Desert Storm It outlines restrictions on Gulf War reports and the mockery of press government relations Atrocity Fabrication and Its Consequences A.B. Abrams, 2023-03-15 Atrocity fabrication the invention and reporting of atrocities committed by an adversary without knowledge that they ever occurred has a centuries long history at the heart of propaganda and power politics as an effective means of moving public and international opinion Its use can provide pretext for a range of hostile measures against its targets transforming in the public eye wars of unprovoked aggression into wars of liberation of the oppressed or turning blockades to starve enemy civilians into humane efforts to pressure abusive governments under the moralistic label of sanctions As it plays a large and growing role in global conflict in the 21st century understanding atrocity fabrication and the consistent means by and ends to which it has been used has become crucial to comprehending geopolitical events in the present day This book elucidates the seldom explored but central role played by atrocity fabrication in eleven major conflicts from the 1950s to the present day from Korea Vietnam and Cuba during the Cold War to Iraq Libya and the emerging Sino U S cold war more recently It highlights the many variations of atrocity fabrication the strong consistencies in how atrocity fabrication is used and the consequences it has for the populations of the targeted countries The book demonstrates the roles played by media and both government and non governmental organizations in misleading the public as to the actuality of these highly publicized events The emerging trend towards this mode of action and the deep implications this has for world order make an understanding of its history particularly critical *Seymour Hersh* Robert Miraldi, 2013-10-01 Seymour Hersh has been the most important famous and controversial journalist in the United States for the last forty years From his expos of the My Lai massacre in 1969 to his revelations about torture at Abu Ghraib prison in 2004 Hersh has consistently captured the public imagination spurred policymakers to reform and drawn the ire of presidents From the streets of Chicago to the newsrooms of the most powerful newspapers and magazines in the United States Seymour Hersh tells the story of this Pulitzer Prize winning journalist and author Robert Miraldi scrutinizes the scandals and national figures that have drawn Hersh's attention from My Lai to Watergate from John F Kennedy to Henry Kissinger This first ever biography captures a stunningly successful career of important exposés and outstanding accomplishments from a man whose unpredictable and quirky personality has turned him into an icon of American life and the unrivaled scoop artist of American journalism **International Media Research** John R. Corner, Philip Schlesinger, Professor Philip R Schlesinger, Roger Silverstone, 2004-01-14 International Media Research offers a rigorous and critical review of key approaches and concerns that have recently defined the field of media research In this clearly argued collection of essays the contributors analyze and reflect upon dominant themes and debates that have made media research an increasingly important element of cultural

theory The volume begins with a critical evaluation of the work of the leading media scholar Elihu Katz and continues with an exploration of the relationship between media studies and adjacent disciplines cultural studies and gender and sexuality Contributors drawn from Britain America Canada and Belgium consider the relationships between media research and media policy in different national and international contexts Focusing on the European Union East Central Europe North America and Latin America chapters assess the impact of social economic and political circumstances on policy debates and the shaping of the research agenda The final chapter adopts a transatlantic perspective in tracing and analysing the history of the media's role in reporting war

War and Press Freedom Jeffery A. Smith, 1999-02-25 War and Press Freedom The Problem of Prerogative Power is a groundbreaking and provocative study of one of the most perplexing civil liberties issues in American history What authority does or should the government have to control press coverage and commentary in wartime First Amendment scholar Jeffery A. Smith shows convincingly that no such extraordinary power exists under the Constitution and that officials have had to rely on claiming the existence of an autocratic higher law of survival Smith carefully surveys the development of statutory restrictions and military regulations for the news media from the ratification of the Bill of Rights in 1791 through the Gulf War of 1991 He concludes that the armed forces can justify refusal to divulge a narrow range of defense secrets but that imposing other restrictions is unwise unnecessary and unconstitutional In any event as electronic communication becomes almost impossible to constrain soldiers and journalists must learn how to respect each other's obligations in a democratic system

Jean Baudrillard David B. Clarke, Marcus Doel, William Merrin, Richard G. Smith, 2008-09-25 Containing two previously unpublished essays by Jean Baudrillard this book provides a series of dazzling demonstrations of the power of Baudrillard's thought from many of his most accomplished commentators

The "Man" Question in International Relations Marysia Zalewski, Jane Parpart, 2019-04-05 Originally published in 1998 The Man Question in International Relations looks the prevalence of man in the world of international relations The book argues that focusing on women as a way of changing the gender of international relations can position women as the problem The authors of this book suggest that the problem is not woman but man Rather than highlighting the absences and presence of women in the theories and practices of international relations the authors concentrate on questioning the practices of masculinities the hegemony of men and the subject of man In this way they hope to destabilize the field in ways that adding women and stirring has not

The US Army and the Media in the 20th Century Robert T. Davis, 2009 Surveys the US Army's approach to media relations from the Spanish American War to the first Gulf War The relationship between the Army and the media is considered in the broader context of the US Government's approach to information management Given the growing importance of information operations in 21st century warfare this study provides a succinct overview of how the US Army has approached its relations with the media over the previous century The study highlights the recurrent tension that exists in both the Army and the US Government's information management writ large This tension arises from the need for

operational security and effective deception and psychological operations and the need to provide transparency to secure public acceptance and support for military operations The long running debate over how the Government s information management should be organized and operated reflects this tension Thus since World War I a number of bureaucratic manifestations of information management have been tried in wartime including the Committee on Public Information the Office of War Information the Psychological Strategy Board the United States Information Agency and most recently the Office of Global Communications With the exception of the United States Information Agency whose tenure spanned the period from 1953 to 1999 all the other manifestations of bureaucratic information management rose and fell during the wars in which they were created The growing pains of these organizations sometimes colored the Army s relationship with the media The need for units in the field to participate in information management is a major challenge for future operations This study reminds us that those commanders who have gone out of their way to engage the media have in many cases had the greatest success with information management
