Second Life German Cinemas First Decades:

A Second Life, 1996 **The German Cinema Book** Tim Bergfelder, Erica Carter, Deniz Göktürk, Claudia Sandberg, 2020-02-20 This comprehensively revised updated and significantly extended edition introduces German film history from its beginnings to the present day covering key periods and movements including early and silent cinema Weimar cinema Nazi cinema the New German Cinema the Berlin School the cinema of migration and moving images in the digital era Contributions by leading international scholars are grouped into sections that focus on genre stars authorship film production distribution and exhibition theory and politics including women s and queer cinema and transnational connections Spotlight articles within each section offer key case studies including of individual films that illuminate larger histories Heimat Downfall The Lives of Others The Edge of Heaven and many more stars from Ossi Oswalda and Hans Albers to Hanna Schygulla and Nina Hoss directors including F W Murnau Walter Ruttmann Wim Wenders and Helke Sander and film theorists including Siegfried Kracauer and Bela Balazs The volume provides a methodological template for the study of a national cinema in a transnational horizon *The A to Z of German Cinema* Robert C. Reimer, Carol J. Reimer, 2010-04-01 German film is diverse and multi faceted its history includes five distinct German governments Wilhelmine Germany the Weimar Republic the Third Reich the Federal Republic of Germany and the German Democratic Republic two national industries Germany and Austria and a myriad of styles and production methods Paradoxically the political disruptions that have produced these distinct film eras as well as the natural inclination of artists to rebel and create new styles allow for the construction of a narrative of German film While the disjuncture generates distinct points of separation it also highlights continuities between the ruptures Outlining the richness of German film *The A to Z of German Cinema* covers mainstream alternative and experimental film from 1895 to the present through a chronology introductory essay appendix of the 100 most significant German films a bibliography and hundreds of cross referenced dictionary entries on directors actors films cinematographers composers producers and major historical events that greatly affected the direction and development of German cinema The book s broad canvas will lead students and scholars of cinema to appreciate the complex nature of German film *Finance and the World Economy in Weimar Cinema* Owen Lyons, 2025-10-01 After the First World War the effects of financial crisis could be felt in all corners of the newly formed Weimar Republic The newly interconnected world economy was barely understood and yet it was increasingly made visible in the films of the time The complexities of this system were reflected on screen to both the everyday spectator as well as a new class of financial workers who looked to popular depictions of speculation and crisis to make sense of their own place on the shifting ground of modern life *Finance and the World Economy in Weimar Cinema* turns to the many underexamined depictions of finance capital that appear in the films of 1920s Germany The representation of finance capital in these films is essential to our understanding of the culture of the Weimar Republic particularly in the relation between finance and ideas of gender nation and modernity As visual records

these films reveal the stock exchange as a key space of modernity and coincide with the abstraction of finance as a vast labour of representation in its own right In so doing they introduce core visual tropes that have become essential to our understanding of finance and capitalism throughout the twentieth century **A Second Life** Thomas Elsaesser, Michael Wedel, 1996 In the Beginning Recollections of Software Pioneers records the stories of computing's past enabling today's professionals to improve on the realities of yesterday The stories in this book clearly show that modern concepts such as data abstraction modularity and structured approaches date much earlier in the field than their appearance in academic literature These stories help capture the true evolution The book illustrates human experiences and industry turning points through personal recollections by the pioneers people like Barry Boehm Peter Denning Watts Humphrey Frank Land and a dozen others **Different Germans, Many Germanies** Konrad H. Jarausch, Harald Wenzel, Karin Gohl, 2016-12-01 As much as any other nation Germany has long been understood in terms of totalizing narratives For Anglo American observers in particular the legacies of two world wars still powerfully define twentieth century German history whether through the lens of Nazi era militarism and racial hatred or the nation's emergence as a model postwar industrial democracy This volume transcends such common categories bringing together transatlantic studies that are unburdened by the ideological and methodological constraints of previous generations of scholarship From American perceptions of the Kaiserreich to the challenges posed by a multicultural Europe it argues for and exemplifies an approach to German Studies that is nuanced self reflective and holistic **Weimar Cinema, Embodiment, and Historicity** Mason Kamana Allred, 2017-01-20 In its retrieval and reconstruction the past has become interwoven with the images and structure of cinema Not only have mass media especially film and television shaped the content of memories and histories but they have also shaped their very form Combining historicization with close readings of German director Ernst Lubitsch's historical films this book focuses on an early turning point in this development exploring how the medium of film shaped modern historical experience and understanding how it moved embodied audiences through moving images **Celebrating 1895** John Fullerton, 1998 Includes 27 of the finest papers presented at The Centenary of Cinema conference in June 1995 **Encyclopedia of Early Cinema** Richard Abel, 2005 One volume reference work on the first twenty five years of the cinema's international emergence from the early 1890s to the mid 1910s The Europeanization of Cinema Randall Halle, 2014-06-15 In this innovative study German and film studies scholar Randall Halle advances the concept of interzones geographical and ideational spaces of transit interaction transformation and contested diversity as a mechanism for analyzing European cinema He focuses especially on films about borders borderlands and cultural zones as he traces the development of interzones from the inception of central European cinema to the avant garde films of today Throughout he shows how cinema both reflects and engenders interzones that explore the important questions of Europe's social order imperialism and nation building in the late nineteenth and early twentieth centuries first contact between former adversaries such as East and West

Germany following World War II and the Cold War and migration neo colonialism and cultural imperialism in the twenty first century Ultimately Halle argues that today s cinema both produces and reflects imaginative communities He demonstrates how rather than simply erasing boundaries the European Union instead fosters a network of cultural interzones that encourage cinematic exploration of the new Europe s processes and limits of connectivity tolerance and cooperation
