Secret Fallout Ernest J. Sternglass, 1981 **Low-Level Radiation and Immune System Damage** Joseph J. Mangano, 2018-01-31 Atomic weapons and nuclear power plants they promised to ensure world peace and provide efficient energy to Americans during the 1940s and 1950s Meanwhile the post war prosperity led to the most dramatic population explosion ever witnessed in the United States the baby boomer generation Times and politics may change but many baby boomers as well as their descendants now live with an unforeseen result of the nuclear age Rates of immune related diseases have risen steadily throughout the past few decades from allergies to cancer While advances in medical care have kept death rates relatively low the increased prevalence of certain diseases cannot be ignored Low Level Radiation and Immune System Damage An Atomic Era Legacy establishes an undeniable connection between the nuclear build up of the past and the widespread health problems seen today While baby boomers were growing up in the 40s and 50s above ground atomic bomb tests and start ups of civilian nuclear power plants were carried out without fear of public exposure to radioactive emissions Although the consequences of low level radiation are still hotly debated Mangano's research findings emphasize a direct link between nuclear exposure and immune system deficiency In addition to substantial data on immune disease trends among Americans born between the mid 1940s and mid 1960s Mangano also examines similar issues concerning baby boomer children and grandchildren Health professionals environmentalists historians and students alike will find much to learn from these pages As America and the world come to terms with the post Cold War era there are still many lessons to recognize consider and learn from the still recent past Low Level Radiation and Immune System Damage An Atomic Era Legacy explores a relentless trend that will not soon be over with potential repercussions into the 21st century **Secret Fallout** Ernest J. Sternglass, 1981 This book presents evidence on the cumulative effects of low level radiation on health

Downwind of the Atomic State James C. Rice, 2025-04 2024 Outstanding Academic Title given by Choice Reviews How the scientific community overlooked ignored and denied the catastrophic fallout of decades of nuclear testing in the American West In December of 1950 President Harry Truman gave authorization for the Atomic Energy Commission to conduct weapons tests and experiments on a section of a Nevada gunnery range Over the next eleven years more than a hundred detonations were conducted at the Nevada Test Site and radioactive debris dispersed across the communities just downwind and through much of the country In this important work James C Rice tells the hidden story of nuclear weapons testing and the negligence of the US government in protecting public health Downwind of the Atomic State focuses on the key decisions and events shaping the Commission's mismanagement of radiological contamination in the region specifically on how the risks of fallout were defined and redefined or importantly not defined at all owing to organizational mistakes and the impetus to keep atomic testing going at all costs Rice shows that although Atomic Energy Commission officials understood open air detonations injected radioactive debris into the atmosphere they did not understand or seem to care that

the radioactivity would irrevocably contaminate these communities The history of the atomic Southwest should be a wake up call to everyone living in a world replete with large complex organizations managing risky technological systems The legacy of open air detonations in Nevada pushes us to ask about the kinds of risks we are unwittingly living under today What risks are we being exposed to by large organizations under the guise of security and science

Footprints to a Legacy Robert L. Campbell,2009-04-02 In this sometimes disturbing and frightening memoir of experiences interviews and government documents Robert Campbell seeks to level the playing field for many atomic veterans after he discovered how great a difference could exist between contemporaneous records and later reconstructed versions of the same nuclear operations Using the Freedom of Information Act Robert tried to match real time data with the footprints experiences of veterans who lived it and compare this information when possible to later versions postulated by officials who were not present at these operations Very interesting reading

Mad Science Joseph Mangano,2012-10-01 Will Americans once again play nuclear roulette Just one year after the Fukushima meltdown all 54 reactors in Japan have been closed and may never be restarted Germany recently closed several reactors and will shutter them all within a decade Italy revoked its pledge to build new reactors keeping that nation nuclear free All these decisions are based on the understanding that reactors are extremely dangerous and expensive In the U S the remnants of the once overwhelmingly powerful nuclear lobby are making their last stand for clean nuclear energy The sixty year old vision of power too cheap to meter words originally uttered by a banker promoting the industry is back While other countries end their reliance on nuclear energy Americans contemplate its revival even as existing reactors which produce a fifth of U S electricity pass retirement age and are corroding In Mad Science Joseph Mangano strips away the near smothering layers of distortions and outright lies that permeate the massive propaganda campaigns on behalf of nuclear energy He explores the history of the industry with its origins in the Manhattan Project through its heightening promotion during the Cold War and its entwinement with nuclear weapons Mad Science includes an account of nuclear accidents and meltdowns and their consequences from Chernobyl to Santa Susana and beyond as well as a point by point refutation of pro nuke arguments Atomic energy is unsafe it deals with staggeringly poisonous substances at every stage of its creation un economical in the extreme and impractical
