Sex Museums Jennifer Tyburczy, 2016-01-11 Museums have lengthy history going back to the Renaissance Cabinets of Curiosity and they are indices of changing fashions of perception insofar as the categories museum curators use to classify objects change over time The major focus of Tyburczy s study is sexuality on display which sets up in turn her investigation of the effects of museum display on the history of sexuality Historical context for the museum is one of her themes and how categories of normacy and perversity change over time with another themes being the work of sex museums in redefining what sex means in the modern public sphere she also folds in consideration of the pleasures and dangers of exhibiting marginalized sexual subjects women nonwhite races LGBT individuals and the like last she explores the paradox of asserting as she does that all museums are sex museums bodies move around and toward objects on display they reshape the typical dances of museum goers along with their preconscious motivations in visiting a museum She proposes that explicit display or restagings of sexual artifacts provides new ways for approaching and understanding issues of desire sexual identity and sexual practices as they intersect with the history of the modern museum and with sexual history during the past two centuries Her fieldwork sites are the Leather Archives Museum in Chicago the Museum of Sex in New York the World Erotic Art Museum in Miami Beach and El Museo del Sexo in Mexico City Such institutions allow Tyburczy to show how alternative sexuality inclusive of kink fetish and sadomasochistic cultures and slavery dangerously crisscross on the surface of objects There are plenty of cases here in short to keep the casual reader titillated and the erudite reader surprised

Dialectic of Pop Agnes Gayraud, 2020-01-28 A philosophical exploration of pop music that reveals a rich self reflexive art form with unsuspected depths In the first major philosophical treatise on the subject Agn s Gayraud explores all the paradoxes of pop its inauthentic authenticity its mass production of emotion and personal resonance its repetitive novelty its precision engineering of seduction and calls for pop in its broadest sense encompassing all genres of popular recorded music to be recognized as a modern technologically mediated art form to rank alongside cinema and photography In a thoroughgoing engagement with Adorno s fierce critique of standardized light popular music *Dialectic of Pop* tracks the transformations of the pop form and its audience over the course of the twentieth century from Hillbilly to

Beyoncé from Lead Belly to Drake Inseparable from the materiality of its technical media indifferent and intractable to the perspectives of high culture pop subverts notions of authenticity and inauthenticity original and copy aura and commodity medium and message Gayraud demonstrates that far from being the artless and trivial mass produced pabulum denigrated by Adorno pop is a rich self reflexive artform that recognises its own contradictions incorporates its own productive negativity and often flourishes by thinking against itself Dialectic of Pop sings the praises of pop as a constitutively impure form resulting from the encounter between industrial production and the human predilection for song and diagnoses the prospects for twenty first century pop as it continues to adapt to ever changing technological mediations **Cultus**

Carpenter,2013-01-04 This book concerns the challenges and tensions rising from mass migration flows unbalanced north south and east west relations and the increasing multicultural nature of society The scope of the book s theme is global addressing diversity and identity intercultural encounters and conflict and the interrogations of a new socio political order or paradigm Thus it highlights some of the most poignant and challenging outcomes of cultural diversity faced more or less

palpably by everyone everywhere in today's societies. The book's theme of multi and pluriculturality is of particular current interest in the academic, socio-political, economic and entrepreneurial spheres. It covers Western and non-Western perspectives representing a valuable resource in terms of international dialogue and experimentation. The chapters are complementary, completing a rigorous theoretical framework offering detailed presentation and analysis of the phenomenon of diversity as encountered in society and the educational setting and at large viewed in a multidisciplinary, multiperspective fashion. Among the theories and concepts represented are those intrinsic to sociology, psychology, political science, economics, history, literature, pedagogy, communication and linguistics.

The senses in interior design John Potvin, Marie-Ève Marchand, Benoit Beaulieu, 2023-09-05. The senses in interior design examines how sight, touch, smell, hearing and taste have been mobilised within various forms of interiors. The chapters explore how the body navigates and negotiates the realities of designed interiors and challenge the traditional focus on star designers or ideal interiors that have left sensorial agency at the margins of design history. From the sensually gendered role of the fireplace in late sixteenth century Italy to the synaesthetic discourses of Comte, Robert de Montesquiou and the sensorial stimuli of Aesop's fables, each chapter brings a new perspective on the central role that the senses have played in the conception, experiences and uses of interiors.
