Young Adults Martha Seif Simpson,2015-11-16 School and public libraries often provide programs and activities for

children in preschool through the sixth grade but there is little available to young adults For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost So how do librarians recapture the interest of teenagers This just might be the answer Here you will find theme based units such as Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV and 44 others that are designed for young adults Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school library to adapt them to their particular needs *The New Partridge Dictionary of Slang and Unconventional English* Tom Dalzell,Terry Victor,2015-06-26 Booklist Top of the List Reference Source The heir and successor to Eric Partridge's brilliant magnum opus *The Dictionary of Slang and Unconventional English* this two volume *New Partridge Dictionary of Slang and Unconventional English* is the definitive record of post WWII slang Containing over 60 000 entries this new edition of the authoritative work on slang details the slang and unconventional English of the English speaking world since 1945 and through the first decade of the new millennium with the same thorough intense and lively scholarship that characterized Partridge's own work Unique exciting and at times hilariously shocking key features include unprecedented coverage of World English with equal prominence given to American and British English slang and entries included from Australia New Zealand Canada India South Africa Ireland and the Caribbean emphasis on post World War II slang and unconventional English published sources given for each entry often including an early or significant example of the term's use in print hundreds of thousands of citations from popular literature newspapers magazines movies and songs illustrating usage of the headwords dating information for each headword in the tradition of Partridge commentary on the term's origins and meaning New to this edition A new preface noting slang trends of the last five years Over 1 000 new entries from the US UK and Australia New terms from the language of social networking Many entries now revised to include new dating new citations from written sources and new glosses *The New Partridge Dictionary of Slang and Unconventional English* is a spectacular resource infused with humour and learning it's rude it's delightful and it's a prize for anyone with a love of language **High-technology-crime Investigator's Handbook** Gerald L. Gresley Staniford-Chen,1995 Unwelcome intrusions into computer systems are being perpetrated by strangers and the number of such incidents is rising steadily One of the things that facilitates this malfeasance is that computer networks provide the ability for a user to log into multiple computer systems in sequence changing identity with each step This makes it very difficult to trace actions on a network of computers all the way back to their actual origins We refer to this as the tracing problem This thesis attempts to address this problem by the development of a technology called thumbprinting Thumbprinting involves forming a signature of the data in a network connection This signature is a small quantity which does not allow complete reconstruction of the data but does allow comparison with signatures of other connections to determine with reasonable confidence whether the data were the same or not This is a potential basis for a tracing system The specific technology developed to perform this task is local thumbprinting This involves forming linear combinations of the frequencies with which different characters occur in the network data sampled The optimal linear combinations are chosen using a statistical methodology called principal component analysis The difficulties which this process must overcome are outlined and an algorithm for comparing the thumbprints which adaptively handles these difficulties is presented A number of experiments with a trial implementation of this method are described The method is shown to work successfully when given at least a minute and a half of reasonably active network connection This requires presently about 20 bytes per minute per connection of storage for the thumbprints In addition the existing very limited literature on the tracing problem is reviewed

Cyberspace Crime D.S Wall,2017-11-30 This book was published in 2003 This book is a collection of key texts that have contributed towards or have reflected the various debates that have taken place over crime and the internet during that past decade The texts are organised into three parts The first contains a number of viewpoints and perspectives that facilitate our broader understanding of cyberspace crime cybercrimes The second part addresses each of the major types of cybercrime trespass hacking cracking thefts deceptions obscenities pornography violence and illustrate their associated problems of definition and resolution The third and final part contains a selection of texts that each deal with the impact of cyberspace crime upon specific criminal justice processes the police and the trial process
