Poem Of The Cid A Modern Translation With Notes:

Poem of the Cid Paul Blackburn, George Economou, 1998 Few works have shaped a national literature as thoroughly as the Poem of the Cid has shaped the Spanish literary tradition Tracing the life of the eleventh century military commander Rodrigo Diaz de Vivar called El Cid from the Arabic Sayyidi My Lord this medieval epic describes a series of events surrounding his exile The text of the poem survives in only one early thirteenth century manuscript copied by a single scribe yet centuries later the figure of the Cid still was celebrated in the Spanish popular ballad tradition Today almost every theme that characterizes Spanish literature honor justice loyalty treachery and jealousy derives from the Poem of the Cid Restored by poet and medievalist George Economou this elegant and spirited translation by Paul Blackburn is judged by many the finest English translation of a great medieval poem A Guide to Spanish Literature in Translation Lawrence J.

Olszewski, 2025-07-16 There's more to Spanish literature than Don Quixote In addition to Miguel de Cervantes Saavedra's immortal classic Spain produced the earliest evidence of works in a Romance dialect debuted the picaresque genre and introduced the Don Juan figure to the world This guide analyzes the merits and shortcomings of nearly 300 English translations of 100 major works of Spanish literature in poetry prose and theater Each entry summarizes the importance of the author and the work discusses elements of the translations such as the source text formats supplementary material and translators methodology and provides commentary that evaluates the fidelity and readability of the translations and the utility of the supplementary material **The Middle Ages in Texts and Texture** Jason Glenn, Robert Brentano, 2011-01-01 The essays in this collection present a textured picture of the medieval world and offer models for how to reflect fruitfully on medieval sources **Modernity and Epistemology in Nineteenth-Century Spain** Ryan A. Davis, Alicia Cerezo

Paredes, 2016-12-14 The fraught tension between science and religion has loomed large in scholarship about the nineteenth century in Spain especially given the prominence of the Catholic Church and the discoveries made by Wallace and Darwin The struggle for epistemological superiority between these two discourses science and religion has served to overshadow certain corners of the cultural landscape that though prominent sites of intellectual exploration in their day have received comparatively less scholarly attention until recently *Fringe Discourses* brings together a group of essays that seeks to restore a sense of the epistemological richness of nineteenth century Spain By exploring the relationship between epistemology modernity and subjectivity these essays recover significant efforts by Spanish authors and intellectuals to explain human nature and their world which seemed to be changing so radically before their eyes In doing so the essays also reveal just how elastic the relationship was between science and pseudoscience genius and quackery Offering a veritable Wunderkammer the authors collected here train their sights both on curious fields of study from pogonolgy the science of beards to Spiritualism and curiouiser people from a government spy on undercover assignment in Morocco dressed as a Moorish prince to a hypnotic huckster who dupes the queen regent With other authors focusing on science fiction dystopias mystical
