The Anatomy of Poetry (Routledge Revivals) Marjorie Boulton, 2014-06-17 It is impossible to appreciate poetry fully without some knowledge of the various aspects of poetic technique First published in 1953 with a second edition in 1982 this title explains all the usual technical terms in an accessible manner Marjorie Boulton shows that it is possible to approach a poem from a business like perspective without losing enjoyment This reissue will be of particular value to students as well as those with a general interest in the specifics of poetry **A Comparative Study of the Indian Poetics and the Western Poetics** Mohit Kumar Ray, 2008

Contemporary Indian Poetry B. K. Pandey, 2004 A Poetics Handbook Daniel Mario Abondolo, 2001 Most books in English on poetics deal with abstract and theoretical issues with a few mostly English examples whereas this book focuses on the formal aiming to provide a concise systematic overview of the linguistic context of European poetics It is richly documented with concrete examples particularly from Hungarian and other languages and traditions of Europe The Mind of a Poet Raymond Dexter Havens, 2020-02-03 Originally published in 1941 This book stresses the transcendental rather than purely aesthetic qualities of William Wordsworth's work It argues that the unusual aspects of Wordsworth's mind are not isolated and did not seem to him fanciful or merely personal they were for him so many paths difficult to find and harder to follow yet leading to the great central truth that is the goal of all humankind's loftier strivings *American and British Poetry* Harriet Semmes Alexander, 1984 **The Experimental Psychology of Beauty** C.W. Valentine, 2015-06-05 Originally published in 1962 the experimental study of aesthetics was a field particularly associated with the name of C W Valentine who in this book provided a critical review of research carried out since the end of the nineteenth century principally by British and American psychologists The investigations described many of them conducted by the author are concerned with individual responses to what is commonly regarded as beautiful in painting music and poetry an important distinction being made between the perception of objects as beautiful as opposed to pleasing The reactions of children and adults and of people having different ethnic and social backgrounds are explored in a variety of experiments dealing with specific elements

including colour form and balance in painting musical intervals discord harmony melody and tempo and rhythm metre imagery and associations in classical and romantic poetry Other experiments seek to disclose the temperamental and attitudinal factors underlying individual differences in the judgement and appreciation of specific works of art Of particular interest are the studies of responses to modern paintings poems and musical compositions The findings throw light on the development of discrimination and taste and suggest the possibility of some common factor in the appreciation of these three arts It was felt that critics as well as psychologists and aestheticians would find much to encourage reflection and to stimulate further research

A Guide to English Literature F. W. Bateson, 2008-12-31 At first glance A Guide to English Literature may seem to be no more than a short bibliography of English literature with perhaps rather more extensive and certainly more outspoken comments on the principal editions commentaries biographies and critical works than bibliographies usually provide But it is something more this guide contains long inter chapters that provide reinterpretations of the principal periods of English literature in the light of modern research

as well as two final sections summarizing in unusual detail the literary criticism that exists in English and recent scholarship in the field. The purpose of this book then is to provide the reader with convenient access to a disciplined study of the texts themselves. This guide proposes itself as a new kind of literary history. The conventional history of literature has often tended to become a substitute for the reading of the literature it describes the better the history the greater the temptation to substitute it. The present combination of reading lists and inter chapters cannot be a substitute for anything else. Meaningless as literature in themselves they nevertheless provide the necessary preliminary information to meaningful reading. Since oddities of arrangement derive from these assumptions the authors are not arranged alphabetically. Instead there are chronological compartments with the divisions circa 1500 1650 and 1800 in which authors succeed each other in the order of their births. This pioneering handbook is primarily a bibliographical laborsaving device. It is meant mostly for students and the general reader in that it stops where original research by the reader is expected to begin. However the last chapter on literary scholarship is devoted specifically to the research specialist and provides indispensable equipment for the reader. There is also a general section on literary criticism which will be of use to all.

F W Bateson 1901-1978 was University Lecturer in English Literature at Oxford and a Fellow and Tutor of Corpus Christi College. Founder and editor of the periodical *Essays in Criticism* he is also editor of the four volume *Cambridge Bibliography of English Literature* and the author of a number of critical studies of English poetry and drama.

Poetry, Geography, Gender Alice Entwistle, 2013-09-15

Poetry Geography Gender examines how questions of place identity and creative practice intersect in the work of some of Wales best known contemporary poets including Gillian Clarke Gwyneth Lewis Ruth Bidgood and Sheenagh Pugh. Merging traditional literary criticism with cultural political and geographical analysis Alice Entwistle shows how writers different senses of relationship with Wales its languages history and imaginative as well as political geography feeds the form as well as the content of their poetry. Her innovative critical study thus takes particular interest in the ways in which author text and territory help to inform and produce each other in the culturally complex and confident small nation that is twenty first century Wales.

Writing Poetry Chad Davidson, Gregory Fraser, 2008-11-26

Writing Poetry combines an accessible introduction to the essential elements of the craft with a critical awareness of its underpinnings. The authors argue that separating the making of poems from critical thinking about them is a false divide and encourage students to become accomplished critics and active readers of poetic texts.
